SUSTAINABLE DEVELOPMENT GOALS

17 GOALS TO TRANSFORM OUR WORLD

OUR SUSTAINABLE GOALS

We provide training to women workers and skilling them to enable them to earn their livelihood. Thereby reducing their economic dependence on others and help them to be self-reliant, which eventually empowers them and makes them significant in the mainstream society.

We work with sustainable supply chain with traceability and fair business ethics. Through the whole supply chain we ensure certified and accredited vendors, suppliers and other stake holders working in harmony with environment and approved global norms of responsible and ethical sourcing as well as manufacturing.

We are committed to work with under-developed regions and economies by setting up and expanding manufacturing units in those areas. We work with local workforce and help develop their skillsets and create an independent ecosystem where everyone will have equal opportunity to earn their livelihood and grow in their familiar environment.

We encourage optimization of resources for sourcing, manufacturing and distribution thereby reducing carbon footprints and wastage of natural resources. We are committed to use of renewable energy and other resources wherever possible. This even though increases the per unit cost but at the same time drastically reduces the each use cost. Thereby impacting positively the conservation of material resources which could be utilized for expanded lifespan.

WEAR WHAT WORKS

Sustainable workwear solutions company. Manufacturing and sourcing of Professional performance Apparel and Wearables.

We are keen to become your most trusted partner specially for workwear. We specialize in sourcing a wide range of products from different regions of Asia, catering to a clientele stretching across the Globe.

Wear What Works
