# LOCKOUT / TAGOUT ( STAY SAFE )

MOST INDUSTRIAL ACCIDENTS ARE CAUSED BY THE UNEXPECTED ENERGIZATION OR START-UP OF MACHINES OR EQUIPMENT OR BY THE UNCONTROLLED RELEASE OF ENERGY. MANY OF THESE ACCIDENTS CAN BE PREVENTED BY IMPLEMENTING LOCKOUT / TAGOUT PROCEDURES.

## LOCKOUT TAGOUT

Accidents Happen in the  
absence of Lockout Tagout

- IT TAKES A MINUTE TO WRITE A SAFETY RULE.
- IT TAKES AN HOUR TO HOLD A SAFETY MEETING.
- IT TAKES A WEEK TO PLAN A SAFETY PROGRAM.
- IT TAKES A MONTH TO PUT IT IN PRACTICE.
- IT TAKES A YEAR TO WIN A SAFETY AWARD.
- IT TAKES A LIFETIME TO MAKE A SAFE WORKER.

BUT IT ONLY TAKES A SECOND TO DESTROY IT ALL IN  
ONE ACCIDENT.

Lockout Tagout is a powerful weapon that can help you prevent any accident caused due to the release of Hazardous Energies.

# LOCKOUT / TAGOUT ( STAY SAFE )

**LOCKOUT / TAGOUT** products are made for #EnergyIsolation, Workplace Area Safety, and Site Management to protect industrial workers during maintenance or repair of machinery.

**LOCKOUT** - Means to physically neutralize all energies in a piece of equipment before beginning any maintenance or repair work. It generally involves stopping all energy flows ( by turning off switches or valve lock on supply line. Locking switches and valves securing the machine, devices, or power transmission line in a de-energized state.

**TAGOUT** – Means placing a visual warning TAG or SIGN on an energy Isolating device, warning not to operate the machinery until the TAGOUT device is removed. It alerts other employee as to the status of a machine or system, about why it has been taken out of service and the identity of the individual who has applied the lockout.
