TR- Kullanım Talimatı: Orta ve sert derecedeki sular için, tam olarak yüklenmiş 12 kişilik bulaşık makinesi içinde normal kirli bulaşıklar için 1 tablet kullanılması yeterlidir. Kullanmadan önce tabletin koruyucu folyosunu çıkarınız, makinenizin deterjan gözüne yerleştiriniz ve yıkamayı başlatınız. UniMaxi Tablet tuz etkisi kireçli sularıda uygun sonuç verir. Aşırı kireçli sularıda UniMaxi Tablet ile birlikte tuz ve parlatıcı kullanmanızı tavsiye ederiz. Her kullanımdan sonra paketin ağzını kapatarak serin ve kuru yerde saklayınız. Makinenizin ve filtrenizin temizliğine özen gösteriniz. El boyama, eski porselen, kristal bardaklar, ahşap, kemik, gümüş, varak bakır ve alüminyum ürünlerin bulaşık makinesinde yıkanması uygun değildir.

TR- Tüketicinin Dikkatine: Kullanma talimatını mutlaka okuyunuz. •El, yüz, vücut ve gıda maddeleri temizliğinde kullanmayınız. •Ciddi göz tahrişine yol açar. •Tıbbi tavsiye gerekiyorsa, ambalajı veya etiketi saklayınız. •Çocuklardan uzak tutunuz ve çocukların erişemeyeceği yerde saklayınız. •Göz ile teması halinde: Su ile birkaç dakika dikkatlice durulayınız. Takli ve yapması kolaysa, kontak lensleri çıkartınız. Durulamaya devam edin. Göz tahrişi kalıcı ise: Tıbbi yardım/bakım alınız.

RU- Инструкция по применению: для средне- и жестких вод достаточно использовать 1 таблетку для обычных грязных блюд в полностью загруженной посудомоечной машине на 12 человек. Перед использованием снимите защитную пленку планшета, поместите ее в глаз моющего средства вашей машины и начните стирку. Эффект соли в таблетках UniMaxi дает благоприятные результаты в известковых водах. Мы рекомендуем использовать соль и отбеливатель вместе с таблеткой UniMaxi в чрезмерно меловой воде. Храните в прохладном и сухом месте, закрывая рот упаковки после каждого использования. Позаботьтесь о чистоте вашей машины и фильтра. Ручная роспись, старый фарфор, хрустальные чашки, дерево, кость, серебро, листовая медь и алюминиевые изделия не подходят для посудомоечной машины.

RU- Внимание потребителя: обязательно прочитайте инструкцию по эксплуатации. Не используйте для чистки рук, лица, тела и пищи, это может привести к серьезному раздражению глаз. Сохраните упаковку или этикетку в случае медицинской консультации. Хранить в недоступном для детей месте. При попадании в глаза: тщательно продолжайте промывать водой несколько минут. Снимите контактные линзы, если они есть и их легко снять. Продолжайте промывать. Если раздражение глаз не проходит, обратитесь к врачу.

GB- Instruction for use: With moderate and highly limy water, one UniMaxi Tablet is sufficient for a full load of normally dirty dishes in a 12 persons machine. Remove the protection folio before use! place the tablet in the machine's tablet compartment and start the washing cycle. The salt effect on UniMaxi Tablet provides suitable results with limy waters. In extremely limy water conditions it is recommended to use salt and rinse aid together with UniMaxi Tablet. Close properly the pack after use and keep it in a dry and cool place. Pay attention to your machine and filter's cleanliness. Hand painted, wood or bone made, suitable for dishwasher machine wash.

GB- Caution: Read the special instructions before use. •Do not use for hands, face, body and food cleaning. Keep away from food, drink and animal feeding areas. •Causes serious eye irritation. If medical advice is needed, have product container or label in hand. •Keep out of reach of children.

•IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice attention.

AR- طريقة استخدام unimaxi إن المنتج مقاوم للمياه ذات نسبة الأملاح العالية والمتوسطة تعد القطعة الواحدة تعمل على غسل بما يعادل 12 صحن 13 شخصاً عند الاستعمال يجب إزالة السليفيون أو الغلاف الخارجي للقرص وتثبيت في مكان المناسب بالإضافة إلى استخدام مسحوق غسل الأواني والملح معاً *ملاحظة يرجى عدم استخدام الصحن والأواني المصنوعة من الألمنيوم والنحاس والفضة والكريستال والخشب والأواني المصنوعة يدوياً والملونة يدوياً بسبب احتمال إلحاق الأضرار بالصحن التي ذكرنا عدم غسلها باستخدام unimaxi القرص

TURKEY'S NATURAL DETERGENT

**NO HAZARDOUS CHEMICALS
YOU CAN USE WITH CONFIDENCE**

CLEANING PRODUCTS

www.bortablet.com.tr

BORTAB

DISHWASHER TABLET

It never contains petroleum and its derivative harmful chemicals.

We expect a lot from the dishwasher tablet. Of course, tablets should be able to affect different stains from egg to tea and be able to be used effectively and safely on a range of materials, from glass to plastic. To clean the dishes, they should help soften the water, give you perfect shine without residue, and dissolve without leaving a lime scale or dirt layer so that rinsing is not necessary. Finally, one of the important points is that they are safe to use - as they come into contact with the plates and cutlery on which we eat our meals every day.

Chemical substances are the major cause of diseases such as cancer, asthma, bronchitis and ulcers, which are among the biggest problems of today.

Unfortunately, chemical products used in the dishwasher threaten the health of our closest relatives.

For this reason, it was developed by patriotic Turkish engineers, chemists and scientists as a result of 2 years of R & D work with the laboratory and consultancy support of our universities.

BORTAB

LIQUID DISHWASHING DETERGENT

If you want every dish to be clean and shiny, from the pots you will wash in the dishwasher to your glasses and all other tableware, you should pay attention to choosing the right detergent. Although there are detergent options in "tablet", "powder" and "capsule" form that you can use in your dishwasher in the market, you can use "liquid detergent" if you are looking for a different alternative. Liquid detergent has high cleaning power even in short programs. It does not leave any residue in your machine compared to other detergent alternatives and provides maximum hygiene without damaging your glass dishes.

It is used during hand washing. It does not harm the skin with its special formula made of natural minerals. It can be used safely in sensitive hands. It does not leave any residue on the dishes. It has the effect of hot water when used in difficult dirt. You no longer need to protect from dishes.

BORTAB liquid dishwashing detergent is with you. Try it out and see the difference.

It provides high quality cleaning and hygiene.
There are no harmful chemicals.
Does not leave dirt and stains.

BORTAB

DISHWASHER POLISH

What is Dish Polisher?

Brighteners contain a substance called surfactant that reduces the surface tension of water. For this reason, when you use BORTAB Polisher in your machine, water does not accumulate in the form of droplets on the dishes and easily slips over the dishes. Both water stains are prevented and dishes become shiny. It is a product polisher that ensures that your plates, glasses, cutlery are removed from the machine without stains and dry.

How to Use Shine? Where to Put the Shine?

Lime in the water stains especially on glasses. The only way to prevent the formation of these stains is to use a rinse aid in your machine. Likewise, it is only possible to avoid accumulation of residue on the dishes with rinse aid. Super strong tablets such as the new and enhanced BORTAB DOUBLE EFFECT offer a practical use by keeping both detergent and brightener together. If you wish, you can use detergent and rinse aid separately; If you wish, you can use these products that offer two functions together. You should not forget that using products such as vinegar in your dishwasher, other than special products produced for this purpose instead of rinse aid, is harmful especially for the plastic parts of your machine.

The rinse aid is put into the rinse aid compartment located on the cover of the machine. The rinse aid compartment is located right next to the detergent compartment. By opening the lid of the chamber, the product is slowly poured into the hole. You can continue adding liquid until the transparent appearance disappears and the reservoir is full. Then, the density should be adjusted by choosing one of the steps between 1 and 5 on the chamber.

BORTAB

DISHWASHER SALT

It can be frustrating to open the door of your dishwasher and see the glasses and dishes not cleaned sufficiently. Water spots and stains are common problems faced by dishwasher users sooner or later. However, there is an easy solution like BORTAB Dishwasher Salt. Dishwasher salt can prevent these by helping soften hard water and reduce limescale deposits.

What is Dishwasher Salt?

It consists of sodium chloride, which is also found in dishwasher salt, table salt and rock salt. However, the difference from salt used for food is that it is produced only for dishwashers and does not contain substances such as iron and carbonate in table salts. The dishwashing salt provides the desired result from the dishwashing process and softens the hard mains water so that the dishes are not scratched. Too much calcium and magnesium in the tap water causes the water to be hard. However, the sodium chloride, which is produced when the dish salt dissolves, replaces the calcium and magnesium substances in the softening unit. Granulated specifically for use in the dishwasher, BORTAB Dishwasher salt prevents lime that can accumulate on the parts of your machine and cause performance loss. The product does not come into contact with your dishes during washing. The reason why dish salt is in a larger granular form compared to normal table salt is to allow it to dissolve slowly. If it is finer or powdered, it will clog the softening unit.

Prevents Lime Deposits

The most important reason why BORTAB dishwasher salt is beneficial for your dishes is to prevent the formation of lime scale. It does this by softening it as the water flows into the washing chamber. Water hardness depends on your local supply and can have a significant effect on your detergents. If you live in an area with hard water, lime in the water can clog sprinklers and affect heating components. When the dishwasher uses salt, the water softens and the blockages in your machine will not be much of an issue.

BORTAB

ANTİBACTERIAL HAND SOAP

- One of the most basic needs for a hygienic hand cleaning is hand soap.
- Anti-bacterial hand soap is one of the most effective ways to destroy bacteria that accidentally get on hands. Antibacterial soap, developed to get rid of bacteria that spread everywhere you touch, is mostly ineffective thanks to its powerful disinfectant effect.
makes.
- Antibacterial hand soaps, which are used frequently recently to ensure hand hygiene, meet your skin cleansing needs and purify your hands from harmful bacteria.

BORTAB

HAND CARE CREAM

BORTAB HAND CARE CREAM is exactly what you need nowadays when we wash our hands for hand hygiene.

Unfortunately, the skin is unfortunately affected by constant contact with products such as disinfectants, soaps and detergents.

Considering this situation, BORTAB products contain mixtures that prevent the skin from drying and damage.

In addition, BORTAB HAND CARE CREAM, which will keep your hands moisturized and have a cottony texture, will be indispensable.
