# How To Use

1. Start by turning on the tap and adjusting it to a comfortable temperature. You want the water to be warm, not too hot or too cold.
2. Stand under the running water and wet your body. Make sure the water reaches all the areas you want to cleanse. The warm water helps to open up your pores and prepare your skin for washing.
3. Take the herbal bath soap in your hand and rub it onto your wet skin. Create a lather by gently rubbing the soap in circular motions all over your body. Be sure to cover all areas, including your arms, legs, torso, and back.
4. Once you've lathered up, rinse off the soap by standing under the warm water again. Make sure to rinse thoroughly to remove all traces of soap from your skin.
