PROFESSIONAL OPEN CAST MINING SOLUTIONS

OTR Tyre Presses, Heavy Duty Hydraulic Jacks, Tyre
Handlers, Trestles, Wheel Chocks and Buggy Whips for
Mining & Other Industries.

TYRE PRESS

Powerpress

Powerworks manufactures a range of tyre presses capable of handling wheel assemblies from 24" through 76" which are recognised worldwide as being the safest and fastest method when mounting, de-mounting and inflating large OTR wheel assemblies.

Requiring only one operator, this fully self contained OTR tyre press will demount tyres from 3 and 5 piece rims quickly and safely.

TYRE HANDLERS

IMT

Offering a range of Tyrehands capable of handling wheel assemblies weighing from 170 kgs to 16 tons, inclusive of chains. For more than 60 years, IMT has kept the wheels of mining fleets turning the world over.

Gripper

Gripper offers a complete plug & play control system and can be mounted on to small loaders, telehandlers or truck cranes. Ideal for LHD's, ADT's, surface or underground mining, due to its compact design.

Powerlift & Hydralift

Manufactured in a range of closed heights from 500mm to 1000mm, with lift capacities of 50, 100, 150 and 200 tons and 100, 200, 300, and 400mm stepped extension dollies, air, electric or petrol driven.

Trestles

Powerworks jacking stands offer the safest method of supporting a vehicle. Height adjustment is easily done and with a unique detachable transporter, which enables the operator to safely place the trestle under the vehicle from a safe distance - they are unbeatable in terms of safety.

HEAVY DUTY JACKS

Mammut

Cattini for over 50 years have been manufacturing and supplying their versatile range of one, two and three stage low profile air/ hydraulic jacks. Ideally suited for vehicles with a low ground clearance such as articulated dump trucks and load haul dumpers.

Established in 1977, Powerworks, previously known as Fluid Precision, has been reliably providing open cast mining customers with cost effective solutions to optimise safety and efficiency.

Wheel Chocks

Checkers Industrial Safety Products are designed for but not limited to the mining and construction industries. Wheel chocks are made from tough damage-resistant polyurethane which are virtually unaffected by oils, acids and fuels.

Buggy Whips

Checkers gorilla-strength buggy whips are an invaluable addition for safety. Flexible fibreglass whips are available in lengths up to 12 foot, include a heavy duty flag, spring mount base, lighting options and a 15 year guarantee.
