

K&K Minerals

About us

K&K Minerals was founded in 2015 with a vision to showcase the timeless beauty and versatility of Industrial Minerals to the world. Over the years, we have honed our skills and expertise, leveraging cutting-edge technology and traditional craftsmanship to create awe-inspiring Minerals products.

K&K Export is a leading exporter of premium Industrial Minerals powder. With unmatched expertise and a commitment to quality, we provide top-grade Talc / Soapstone powder sourced from the finest mines. Our reliable services and customer-centric approach make us the preferred choice for Industrial Minerals in export worldwide.

Talc / Soapstone Powder

Talc powder is a finely ground mineral product derived from talc, a naturally occurring mineral primarily composed of magnesium, silicon, and oxygen. Recognized for its exceptional softness, talc is one of the gentlest minerals known. Its characteristic greasy or soapy texture makes it a versatile ingredient extensively utilized across various industries and consumer products./

Forms – Lumps & Powder

Whiteness – 75% / 85% / 90% / 97%

Mesh up to – 1250.

CaO – 2% Max.

Talc in plastics

Talc in papers

Talc in paints

Talc uses

Talc in electronic components

Talc in ceramics

Talc in rubber

Quartz Powder

Introducing our exceptional Quartz Powder - a finely ground mineral obtained from superior quality quartz crystals. Composed of silicon dioxide, this versatile powder exhibits outstanding properties, including high hardness, heat resistance, and electrical conductivity. Its applications span diverse industries, such as electronics, ceramics, construction, and cosmetics, delivering optimal performance and premium results. Embrace the power of Quartz Powder to elevate your products and processes to new heights of excellence.

Grades of Quartz Powder :

- **Normal Grade** : This is the widely used grade of Quartz Powder. Silica content 95% to 97 %.
- **White Grade** : Silica content here is in the range of 97% to 98%.
- **Snow White Grade** : Silica content here is in the range of 98% to 99%.

Calcium Carbonate Powder

calcium carbonate powder - a premium mineral product finely ground from high-quality sources. Composed predominantly of calcium, carbon, and oxygen, our calcium carbonate powder boasts remarkable versatility. Whether enhancing industrial processes, fortifying products, or serving as a filler, our product guarantees superior performance and unparalleled quality. Trust in our expertise to deliver the finest calcium carbonate powder for your specific needs, setting new standards of excellence in your applications

Dolomite Powder

Step into the realm of excellence with our dolomite powder - a finely processed mineral extracted from premium-grade dolomite rocks. Comprising calcium, magnesium, and carbon, our dolomite powder exudes versatility and functionality. Its unique composition makes it ideal for applications across various industries, from construction and agriculture to ceramics and plastics. Trust in our commitment to quality as we provide you with the finest dolomite powder, ensuring optimal results and enhancing the performance of your products and processes.
