

AVOCADO

Categories : fruits

The avocado is the fruit of the avocado tree, a tree of the Lauraceae family, native to Mexico. There are three main varieties. The most popular variety is the Hass avocado. It is a fruit that can only ripen when it is detached from the tree. The avocado is a very caloric fruit, rich in fat.

ZUNATO / L'avocat précoce

Facilement identifiable grâce à sa peau brillante, vert-jaune, cet avocat est l'une des premières variétés récoltées quand la saison commence.

Sa chair savoureuse est légère en matière grasse.

BACON / A sweet variety

Good quality oval shaped variety. She is round dark green with a thin and soft skin. Its yellow-green flesh is a little soft when ripe.

FUERTE / A creamy avocado

Fruit in the typical pear shape, with thin, matte skin of dark green color. Its creamy soft green flesh has a very pleasant pronounced flavor. Average weight: 250 to 400 g.
