

PLANT DERIVATIVES

for the

COSMETIC and

HERBAL – PHARMACEUTICAL industries

Tincture Mother - Waters Distilled

Phytochemical Compounds - Juices - Fluid Extracts

Extracts
Glyceric - Lipolic - Glycolic

Only the **active part** of each medicinal plant is used for the **extraction process**, choosing the most appropriate alcohol content to obtain extracts rich in **active ingredients** and therefore more effective.

On specific request, it is possible to create **customized extracts**, suitable for the needs of the customer.

ORGANIC CERTIFIED* PLANT EXTRACTS

The **COSMOS / ECOCert organic certifications** of some products guarantee the **exclusion of synthetic chemicals** for the entire production process.

The majority of allergies are caused by chemical components and additives, while **ORGANIC / BIO** certified products are free of impurities deriving from pesticides or synthetic fertilizers and can therefore also be used for the production of products for the most sensitive skin.

In addition to ensuring greater **consumer protection**, thanks to their natural characteristics, the use of organic extracts also allows you to **safeguard the environment and natural resources**, encouraging the development of sustainable and environmentally friendly farming techniques.

MOTHER TINCTURE

(Hydroalcolic Macerates)

The Mother Tinctures are produced by means of classic maceration in hydroalcoholic solution and have the main characteristic of seeing fresh plants used, harvested strictly in balsamic time, to optimize the extraction of active ingredients.

DRUG/EXTRACT EXTRACTION RATIO 1:10

Mother Tinctures ORGANIC/BIO*

* Certified COSMOS - ECOCert

Product Description	Botanical Name	Parts Used	Alcohol Content
ARNICA	<i>Arnica montana L.</i>	Summit	45°

DISTILLED WATERS

(Hydrolates)

Distilled Waters, also called Hydrolates, are produced by steam extraction of fresh or dried plants. This type of extraction is suitable for plants with volatile active ingredients and is suitable for insertions in particularly delicate formulations.

DRUG/EXTRACT EXTRACTION RATIO 1:10

Distilled & Distilled ORGANIC/BIO*

PHYTO-CHEMICAL COMPOUNDS

(Phytoextracts)

Extracted by hydroglycolic solvents, the compounds are made thanks to an accurate mix to exploit the synergistic compositions of the different constituent extracts. Especially indicated to maximize results on specific and targeted applications.

DRUG/EXTRACT EXTRACTION RATIO 1:1

Product Description	Application
ANTI-CADUTA	Hair
ANTI-FORFORA	Hair
ANTI-PRURITO	Hair
BALSAMICO & TONIFICANTE	Hair
HAIR DELICATI	Hair
HAIR GRASSI	Hair
HAIR SECCHI / COLORATI	Hair

TONIFICANTE & RINFRESCANTE	Face / Body

JUICE BIO*

* Certified COSMOS - ECOCert

(Triturate)

Juices are preparations obtained by pressure of the plant and represent a very simple form of administering medicinal plants while maintaining the advantage of not having undergone drying, capable of causing enzymatic alterations of some components.

MAXIMUM EXTRACTION RATIO <99%

Product Description

TRUE ALOE Juice (Leaves)

Methodology

Cold Extraction and Filtering

FLUID EXTRACTS

(Leachate)

The Fluid Extracts have a high concentration of active ingredients and are obtained from dried medicinal plants, scrupulously selected, by maceration and percolation in hydroalcoholic solution until the same concentration of active ingredient of the plant is obtained.

DRUG/EXTRACT EXTRACTION RATIO 1:1

Product Description	Botanical Name	Parts Used	Alcohol Cont.
ACEROLA	<i>Malpighia punicifolia</i> L.	Fruit	30°

GLYCERIC EXTRACTS

(Glycerinates)

Glyceric Extracts are produced through an extraction process in hydroglyceric solution composed of 20% water and 80% vegetable glycerine and are optimal for particularly delicate and fragile plants, which would not stand alcohol.

DRUG/EXTRACT EXTRACTION RATIO 1:2

LIPOLIC EXTRACTS

(Oleolites)

Lipolic Extracts are produced by extraction through a maceration process in sunflower oil that allows the complete release of fat-soluble active ingredients. Protection from oxidation is guaranteed by the addition of natural tocopherols.

DRUG/EXTRACT EXTRACTION RATIO 1:2

Lipolic & Lipolic ORGANIC/BIO*

* Certified COSMOS - ECOCert

GLYCOLIC EXTRACTS

(Glycolates)

Glycolic Extracts are obtained from plants of the highest quality through the extraction in propylene glycol which, thanks to its polarity, is a good solvent for both hydrophilic and lipophilic active ingredients ensuring the maximum content of actives in the final product.

DRUG/EXTRACT EXTRACTION RATIO 1:2 AND 1:1
