Our delivery of White / Red Sanderswood conforms to the highest standard procedure by the Forest Department and is of high standard quality with deep wavy grains. Our standard parameters for procurement of logs are of very high standards.

- Logs perfectly dressed upto heart-wood.
- Logs length not below 150 cm or as per customers requirement.
- Sound logs taken from more than 30 years old tree.
- Logs with top end girth of 36 cm and above or as per customers requirement.
- Straight logs

We have direct links with the farmers, who grow Red sandalwood trees in their private Lands or farms particularly nearby forest area for more than 30 years in remote villages of Andhra Pradesh and some hill areas in Tamil Nadu, Telangana & Idukki District of Kerala, wherein standard quality trees are generally grown by the farmers. We locate such farmers and test the soil condition of the area wherein such trees are grown and also make laboratory test of the wood in order to ascertain the quality of the wood and if found up to our standard, we procure such wooden logs.

We have a Team to bridge the gap between the need and supply, we have recruited the best and experienced people in the organization who are committed to serve the client with qualitative products. Our team is comprised of experienced and true professionals. All the efforts lead to provide maximum level of satisfaction to the clients.

Backed with various strategic warehouses, we are able to meet the small and bulk orders within stipulated time frame. Our warehouse are divided into various units with different assortment of materials with essential facilities. Our warehouse provide favorable environment to the product.

Finally the strength of the company lies in the quality of its products, to assure the quality, stringent quality tests are conducted starting from the procurement of the raw products to the finished
