We Connect **Indian Agriculture**

Ashwatha Agri Commodities specializes in Producing, manufacturing, exporting, and trading various agricultural products, including Makhana (Fox Nuts), Mangos, Liche and other seasonal fruits. With a strong global network of suppliers and buyers, the company connects farmers and producers to domestic and international markets, **ensuring fair trade and competitive prices**

Why Ashwatha Agri Commodities?

One of the key strengths of Ashwatha Agri Commodities is its deep knowledge and understanding of the agricultural industry. The company's team of experts monitors global market trends, weather conditions, and crop forecasts to make informed decisions and provide valuable insights to their clients. This helps in managing market risks and optimizing supply chains.

In addition to trading, Ashwatha Agri Commodities also focuses on quality control and food safety. The company adheres to strict quality standards and works closely with farmers and suppliers to ensure that products meet international quality specifications. By collaborating with trusted partners and implementing rigorous quality control measures, the company is able to deliver superior products that satisfy the requirements of their customers.

Overall, Ashwatha Agri Commodities is a trusted name in the agricultural trading industry, known for its reliable sourcing, excellent quality, and professional service. With its strong market presence and customer-centric approach, the company continues to play a significant role in connecting agricultural producers and buyers worldwide.

What is Makhana?

Makhana is the most popular name in India for Euryale ferox, a flowering plant classified in the water lily family (Nymphaeaceae) and the only extant species in the genus Euryale.

It is extensively grown in marshy wetlands, tanks, ponds and lakes, and harvested for its seed. Other common names include prickly water lily seeds, popped lotus seeds, foxnut or gorgon nut.
