BRAND

SP2S is one of the leading electronic cigarette brands in the vaping industry.

A fundamental feature of Vaping is its no tar, no smell & convenience of enjoying a multitude of incredible flavours in a smoke-free environment whilst offering a healthy alternative to adult smoker.

2016 FIRST PRODUCT

The first product, Spring (SP) was launched in July 2016. To achieve premium user experience, our investors and employees of over 5,000 invested tremendous time and effort to create unique authentic flavours that took the market by storm.

3 years and millions of dollars later, the second product Spring-2 (SP-2) was born.

2019 SECOND PRODUCT

Within 12 months, over 1 million users became frequent users and are growing at its fastest rate. SP-2 distributes over 1600+ stores from China mainland to Eastern Asia and Canada.

In 2021, the brand name changed into SP2S, which indicates the attitude on the product development: From super to superior.

2021 FROM SUPER TO SUPERIOR

Continual innovation is at the core of our product design and development. Yearly over millions of dollars are invested in our R&D lab and we're pleased to release our innovative SP2S-Star pre-filled pod system, which made 60 million sales in its first year!

To handle the production growth and capacity needs, a second factory which was equipped with automatic production lines was put into operation.

2022 ENTERED THE UK MARKET

The original aspiration was never forgotten, in 2022, SP2S developed the brand new product line of disposable vapes and entered the U.K. market.

With wide selection of products that covered all the vaping needs, SP2S is confident in providing the market leading & premium tastes that are vastly distinct and better than all competitors. That's our promise to you.

Excellent taste

brilliant experience

deep insights into global users

4+20

Perfect taste born from the research in 4 dimensions 20 indexes.

WHY THEY ALL LIKE SP2S?

**Excellent taste,
brilliant experience.**

Meticulous and professional research center put the taste experience evaluation from 4 dimensions in 20 items into the research category.

**Based on deep insights
into global users.**

Create unique products for customers in different regions according to local customers' habits and preferences.

Prefilled
Pods System

POD SYSTEM

SP2S has designed and produced a series of high-quality and very popular pod system products. Mainly star, spring II, star mini and

joy, and will continue to develop new pod system products.

DISPOSABLE VAPES

Disposable
Vapes

Using simply disposable e-cigarettes are the most popular e-cigarettes in the world.

We design and launch different products and flavors according to different market demands to meet the needs of different markets and customers.
