Product Guide for Sales Executives

ambersun

**March  
2018**

Started thinking about the ear bud problem & how to solve it

**May  
2018**

Conceptualized the design and gave it the name  
**“Megabud”**

**June  
2019**

Started working on product engineering to make a prototype

**Company**

**History**

9 months of hard work in the midst of the pandemic & a prototype was ready

**Feb  
2020**

Spent sleepless nights to file a Patent & bring  
**“Megabud”**  
to life

**Jan  
2021**

Implemented industrial controls for mass production & launched in India

**August  
2022**

# Product Datasheet

## Two Cotton Bud sizes currently available

### Standard Cotton Bud

4mm Tip

Plastic Stick –  
not good for  
the  
environment

- Can touch the Ear Drum that can lead to hearing loss
- Can cause a scratch or wound to the wall of the ear canal leading to an acute secondary infection

### Baby Cotton Bud

4.5 mm Tip

Plastic Stick –  
Sale of single  
use plastic has  
been banned  
from 1<sup>st</sup> July  
2022

- Can damage the ear canal as there is no room for cushion to the ear wall
- When applied in babies, it can absorb the much needed ear wax that keeps the ear canal wet and moisturized.

# Megabud

\* 9 mm Thickness with soft padding  
avoids injuries in the ear canal

\* Zero Defect Manufacturing policy

9 mm Tip

100% Pure  
Surgical Grade  
Cotton

Paper stick –  
no single use  
plastic used

100%  
Biodegradable –  
Environment  
friendly

Export quality  
product at local  
prices

- Does not allow contact with Ear Drums
- Leaves ear wax that is required
- Extra soft cushion
- Excellent Tickle Relief after a shower
