

Wake Up to Warmth

ABOUT VENUS

VENUS HOME APPLIANCES (P) LTD., manufacturers of Venus Water Heaters for 60 years is a market leader and pioneer in the Water Heater industry. Venus is one of the leading brands of water heaters in India and stands for Quality, Reliability and Performance.

Appliances that provide a continual supply of hot water are called water heaters or Electric geysers. Venus Home Appliances is the leading manufacturer of water heaters and geysers in India. Venus has been providing a wide range of water heaters in India that include electric instant water heaters, electric storage water heaters, gas water heaters, solar water heaters and heat pump water heaters. Venus Home Appliances strives to design, manufacture, supply water heaters and accessories to national/international standards. Venus has got ISO 9001 certification from BVQI and is ISO14001:2004 and BSOHSAS 18001:2007 certified; a measure of its commitment to quality.

LARGEST EXPORTER

VENUS HOME APPLIANCES (P) LTD., manufacturers of Venus Water Heaters for 60 years is a market leader and pioneer in the Water Heater industry. Venus is one of the leading brands of water heaters in India and stands for Quality, Reliability and Performance. Venus water heaters have sleek exteriors that complement the performance.

With a Presence in more than 22 countries across the World, Venus Home Appliances is the No.1 in Exports with reference to the Water heater Industry.

No. 1 in Exports is based on customs exports data

NATIONAL & INTERNATIONAL CERTIFICATION

Winner of the 'National Award for Quality Product' in 2000 by Govt. of India

Twice winner of the 'Tamil Nadu Quality Award'

60 years market leader and a pioneer in the water heater industry

ISO 9001 & 14001 Certification from BVC

Enameling Process- Hi-Tech Plant

Porcelain Enamel Glass lined tanks are produced in a world-class fully automated plant in Venus using the best raw materials and the highest quality assurance practices.

Stage 1 - **FORMING:**

Deep drawing of 1.8-2mm steel blanks to form lids in a heavy duty Hydraulic Press.

Stage 2 - **WELDING:**

Welding of lids and shells in an automatic, Plasma/MIG Welding Line. All welded tanks are tested immediately at 3 bars pressure; 100% leakage free.

Stage 3 - **PRE-TREATMENT:**

Inner surface of the tank is blasted at high pressure in the shot blasting machine to remove any surface impurities and oxides.

Stage 4 - **ENAMEL APPLICATION:**

Dry Powder Enamel is sprayed on the tanks by 2 robots. Automatic controls maintain a homogeneous coating thickness of 250 μ across the surface of the tank.

Stage 5 - **FIRING:**

Enamel coated tanks are fired inside the high temperature furnace at 830°C – 850°C. The enamel melts to fuse and bond with the steel to form a protective glass lining.

UNIQUE FEATURES

DURABILITY

Porcelain Enamel Glass Lined Tank

30% larger anode for longer Protection

Full face Gasket with Neck Protection

Zn-Ni coated fasteners 5X Rust Resistance

Double side enameling prevents rusting of flange and door plate

PERFORMANCE

Porcelain Enamel Glass Lined Tank: Manufactured in a modern, automated plant using European Technology. Protects the tank from rust and corrosion.

100% pure copper tank: For long life and corrosion free performance.

Glass lined Incoloy 800 element: Withstands temperatures up to 1000°C Long lasting even in hard water reduces scale formation. Prevents premature element failure.

Glasslined Double Ceramic Heating Elements: Shock-proof, hard water proof and long-lasting.

Hard water protection: Low density, Glasslined elements for long life in hard water areas.

8 bar pressure: Suitable for pressure pumps and multi-storey buildings.

6 bar pressure: High Working pressure that is double that of ordinary Instant water heaters.

Flexi Mount: Flexible mounting options (Horizontal Model) Wall/Floor mounting. Left/right side opening options available - Ideal for modern apartments.

SAFETY

Multi-function valve: Acts as pressure release valve, non-return valve, drain valve, expansion valve and vacuum release valve.

Sacrificial Magnesium Anode: A special device to enhance the corrosion protection of the tank by means of "Cathodic action".

Triple Safety : Multi-function Safety Valve, Capillary Thermostat & Thermal cutout.

IPX4 : Resistant to water splashes from any direction.

ENERGY SAVINGS

5 Star rating for more energy savings.

3cm Thick Polyurethane Foam (PUF) insulation: Reduces heat loss and keeps water hot for much longer.

Power meter: To show actual energy consumption for daily, weekly, monthly, and Annually.

DIGITAL

IoT Empowered : W/H Operation from across the World

Wi-Fi - Enabled : Lets you Set, Schedule & view at your convenience

Smart Modes: Three Energy Saving Smart Shower Modes

Digital Display: For visual indication of temperature.

Multi-function Display: For visual indication of temperature and program options.

Temperature Display : The display will show the real time temperature.

ENDURANCE

10 Years* Guarantee: On Copper tank

7 Years** Guarantee: On Porcelain Enamel GlassLined Tank

4 Years*** Guarantee: On Heating Element

Porcelain Enamel Tank

Manufactured in a modern, automated plant using European Technology. Glass lined coatings protects the tank from rust and corrosion.

Scale Guard Technology

In Ceramic heating element, heat is transferred over a much larger surface area, which reduces the stress on heating element, lowers watts density/sq.cm and ensures less scale deposition on the heating element.

Types of Heating Element

We use different types of heating elements in our water heaters. Which ensures hard water protection and shock protection. They are designed for reliable & energy efficient performance in all types of water conditions. We have higher grade heating elements for hard water areas to resist scale deposits & premature failure. There are 3 types of heating elements : 1. Ceramic Heating element, 2. Glass lined incoloy element, 3. Copper Heating element.

Ceramic
Heating Element

Glass lined Incoloy
Heating Element

Super Heavy Gauge
Copper Element

More Hot Water Output

Ceramic heating element heats water across the entire height of the tank with minimum or no cold zone. Ordinary tubular elements have a long cold zone. As a result lowest portion of the tank is not heated average hot water output is more with the ceramic heating element as a result.

Tubular Element

Cold Zone

Ceramic Heating Elements

Uniform Heating

WARMTH FOR LIFE

Venus water heaters are built with state-of-the-art technology and comes equipped with the most innovative features.

- STORAGE WATER HEATERS

- INSTANT WATER HEATERS

- TANKLESS WATER HEATERS

- GAS WATER HEATER

Environmental Friendly Initiatives

Venus Water heaters and innovation goes hand in hand. To add the feather in the crown are certain initiatives that are environment friendly. A Major move to move away from Thermocol packaging has been in process for quite a few years and the alternate solutions have been innovative on that front. The use of molded pulp buffers in domestic and export water heaters and Ceiling Fans, corrugated buffer (made of kraft paper) replacing instapack buffer, Column airbags (which is bio-degradable and at the same time recyclable) for Instant Water heaters and 6 Ltr Storage Models Our Water heaters have CFC/HCFC Free Insulation that has low global warming potential and Zero Ozone depletion potential and zero ozone depletion potential. This ensures minimum damage to the ozone layer and minimum impact on global warming. We use dry enameling process that uses less amount of water and generates lesser waste
