GLOBAL QUALITY PHARMACEUTICAL BLISTER PACKING FILM NOW MANUFACTURED HERE

The Pharmaceutical industry of Nigeria and West Africa is gearing up to meet the rapidly growing demand of the region.

Nigeria's demand for pharmaceutical packaging material alone is growing by leaps and bounds. Couple that with growing emphasis on quality standards and better regulation, the background is ideal for a quality manufacturer of world class films to begin operations.

Enter Jackpak Industries Nigeria Ltd. (Jackpak). The pioneer in Pharmaceutical grade Blister film manufacturing in Nigeria. A venture of the Sankil Pharmaceutical Group and the Karishma Group, it brings the best packaging materials knowledge into the service of the pharma industry.

With a dedicated facility in Otta, near Lagos, it produces high grade blister packing film in a modern automated plant. The film is made from high-quality raw materials and produced as per specifications for pharmaceutical packaging.

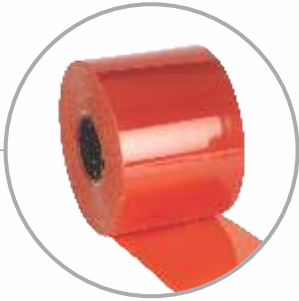

Besides providing film of world class quality, Jackpak will enable pharma manufacturers to come a step closer to just-in-time inventory management of packaging consumables. Thus helping them become more efficient.

VISION

To be a preferred packaging partner for it's customers and deliver better value at all times.

MISSION

To provide Packaging Materials of consistent quality, efficiently and in timely fashion to our customers.

Superior Quality

The film is made from pure virgin resin from the world's top manufacturers. Other chemicals used are pharma grade with full quality certifications.

Wide Range

The Jackpak Range includes: Clear 250 microns, Orange, Amber, Bottle green, Smoked, Red, and Blue and White tinted in transparent and opaque varieties among others.

Perfect Blister Forming

High quality film for trouble free operations with perfect blister forming and bright blister for high visibility. Suitable for tablets, capsules, softgels, vials & ampoules.

Superior Sealing and uniform protection

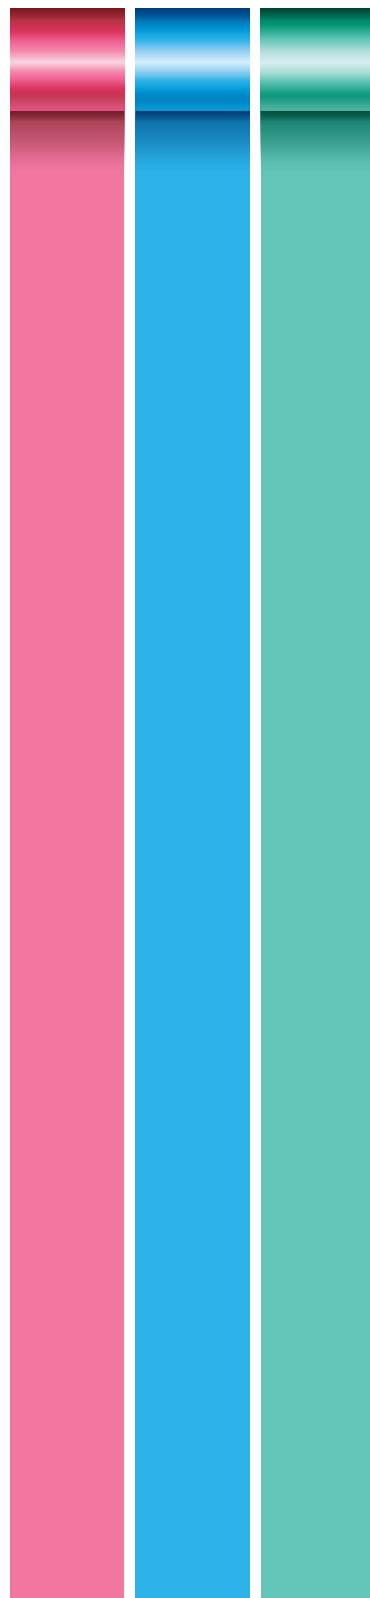

Jackpak films will consistently provide superior sealing, and uniformity of film characteristics provides high grade protection to the pharmaceutical dosage.

THE JACKPAK ADVANTAGE

- ✓ Local service for quick turnaround frees up your space and reduces inventory.
- ✓ Plant has been scientifically planned, professionally built and boasts of an automatic line. Expert manufacturing team oversees production of consistent quality.
- ✓ Small orders possible. Being local has its own advantages, we can work with your R&D teams to develop specialised and innovative films for stronger product differentiation.
- ✓ Suitable for a wide variety of applications such as packaging tablets, capsules, lozenges, ampoules, vials, pre-filled syringes and much more.
- ✓ Films that have universal appeal in terms of look & feel.
