Selective Pallet Racking

Selective Pallet Racking are the most popular functional shelves in the industry, as the best storage system for palletizing products, which can store various types of goods. It is mainly used in e-commerce warehouses, factory workshops and logistics centers. It is used with various types of pallets, bins and forklifts, which greatly improves the utilization rate of warehouse space and optimizes the operation convenience of storage equipment.

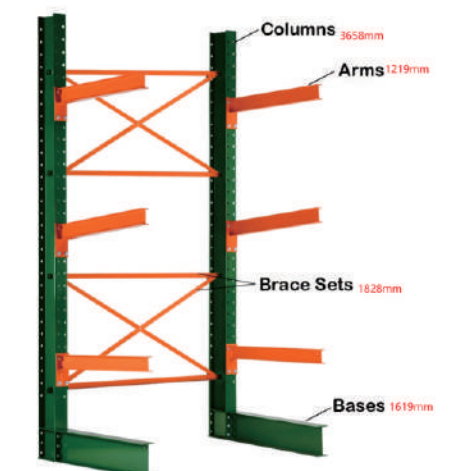

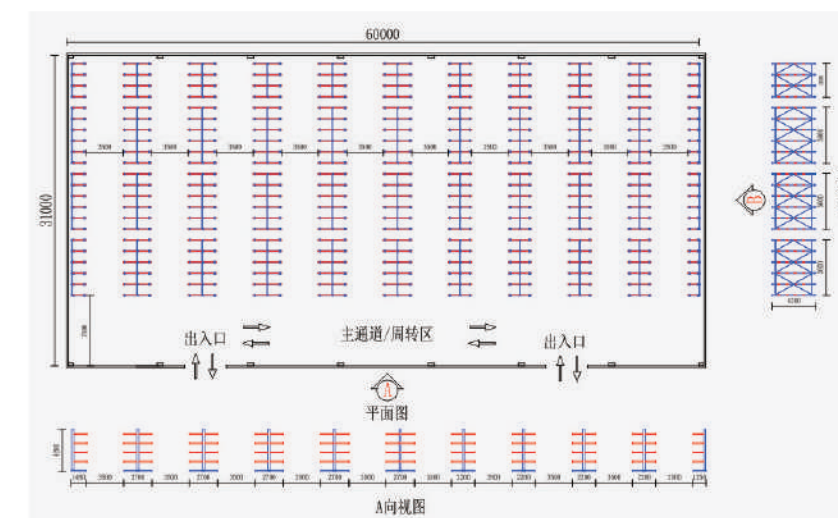

Cantilever Racking

CANTILEVER RACKING
08 — GUANG MING

Cantilever Racking is mainly used to store long materials and shaped materials, such as: profiles, pipes, plates, cables, etc., is the best choice for storing irregular materials, heavy long materials. Its feature is that the cantilever of the shelf can be adjusted according to needs. It is mainly suitable for warehouses with small space and low height, convenient management, wide field of view, and very efficient use with forklifts and cranes.
