Maoming Xiongda Chemical Co.,Ltd

INTRODUCTION

COMPANY PROFILE

We specialized in supplying superior chemical raw materials and reagents, catering to the diverse needs of manufacturing enterprises and laboratories.

PART 01

INTRODUCTION

COMPANY PROFILE

COMPANY INTRODUCTION

We specialized in supplying superior chemical raw materials and reagents, catering to the diverse needs of manufacturing enterprises and laboratories.

01

We have a standardized chemicals warehouse in Huaibei area of China, covering an area of over 2000 square meters, providing high-quality products to local enterprises and laboratories.

02

We have been serving the agriculture and mining industries in Central Asia, Africa, and South America for an extended period, offering both standard and customized products to meet the production needs of businesses.

INTRODUCTION

COMPANY PROFILE

300,000,000

In 2023, our turnover reached **300** million RMB, of which domestic sales accounted for **89%** and exports accounted for **11%**. The annual growth rate of our export business is **7%**.

2000+

Over **2,000** square meters of standardized chemical warehouse in Huaibei area.

2900+

Approved for **2,930** legal chemical products in China, all are officially registered and legally permitted by the Chinese authorities.

X D - C H E M I C A L

INTRODUCTION

COMPANY PROFILE

Our warehouse is located in Huaibei City, Anhui Province. This warehouse primarily provides chemical raw material services to surrounding enterprises, as well as serving as a loading point for some export businesses. Here, we can conduct activities such as product repackaging, concentration customization, and logistics transportation.

INTRODUCTION

COMPANY PROFILE

COMPANY ADVANTAGE

We have a solid foundation of suppliers with whom we have cooperated for many years, ensuring that we receive the latest industry news and competitive prices. Every batch of goods is supervised and randomly inspected by our quality management system to ensure product quality.

Supply Chain Management

Effective supply chain management ensures the smooth flow of products from production to end-users.

Save Your Cost

We stand with buyers, ensure quality while offering our clients the best possible price.

Quality Control

We have a standardized quality control process to ensure chemical products standards.

Maoming Xionгда Chemical Co.,Ltd

PRODUCTS

MAIN PRODUCTS

Our product range mainly consists of liquid and solid chemical products, including acids, alkalis, salt compounds, and various organic compounds.

PART 03

PRODUCTS

MAIN PRODUCTS

MAIN PRODUCTS

Our company specializes in providing essential raw chemical materials and reagents, catering to various industrial needs and ensuring seamless integration into clients' production processes.

LIQUID CHEMICALS

Liquid chemical products include acids (both organic and inorganic), alkalis, and organic solvents.

SOLID CHEMICALS

Various flake, granular, powder alkalis, powder acid, salt compounds, and organic compounds, etc.

PRODUCT

All our products are warranted being manufactured according to China and national standard.

PRODUCTS

MAIN PRODUCTS

LIQUID CHEMICALS

more products please visit our website: www.xd-chemical.com

Hydrochloric acid (HCl) is a strong, corrosive acid commonly used in various industrial and laboratory applications.

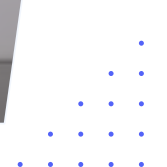

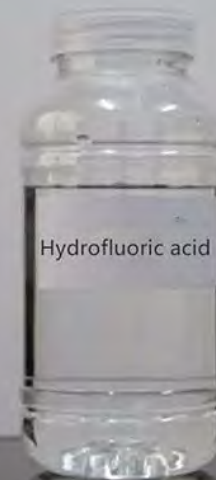

Sulfuric acid is known for its strong acidity and powerful dehydrating properties.

Nitric acid (HNO₃) is a highly corrosive and toxic mineral acid.

Hydrofluoric acid (HF) is a highly corrosive acid, known for its ability to dissolve glass, something most other acids cannot do.

PRODUCTS

MAIN PRODUCTS

SOLID CHEMICALS

more products please vist our website: www.xd-chemical.com

FLAKE

e.g.

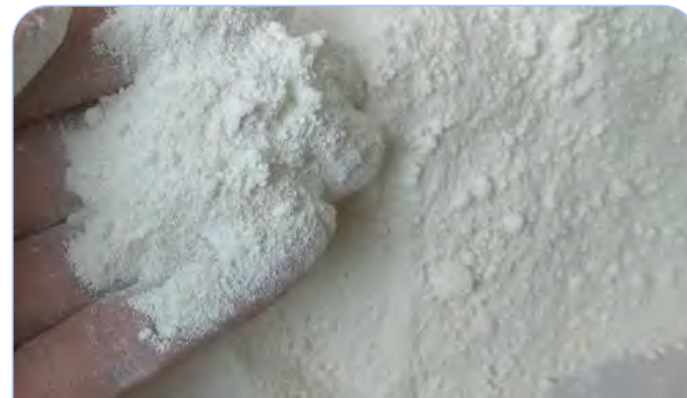

Sodium hydroxide (NaOH) flakes, also known as caustic soda flakes, are a solid form of sodium hydroxide, which is a highly versatile and important chemical compound.

GRANULAR

e.g.

Calcium hypochlorite is a chemical compound with the formula $\text{Ca}(\text{ClO})_2$. It is a white solid that is widely used for its disinfectant and sanitizing properties.

POWDER

e.g.

Titanium dioxide sulfate, is a white, crystalline solid that is commonly used in various industrial applications.

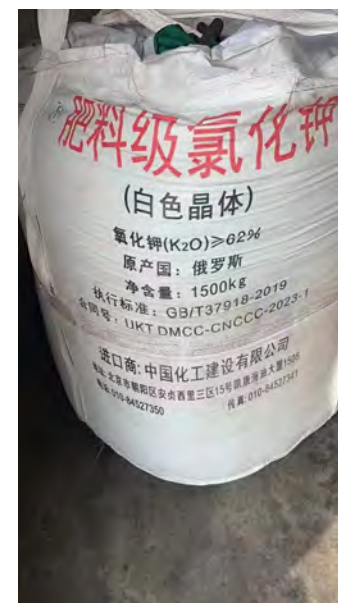

Potassium Chloride 7447-40-7

Industrial Grade KCl

White crystal industrial grade potassium chloride properties: Colorless elongated rhombic or cubic crystals, or white crystalline powder; odorless, with a salty taste; readily soluble in water, soluble in glycerol, slightly soluble in ethanol; relative density 1.987, melting point 773°C.

Application

Nutritional supplement; gelling agent; salt substitute; yeast food; similar to table salt, it can be used for seasoning agricultural products, aquatic products, livestock products, fermented products, condiments, canned goods, convenience foods, etc.

Packing

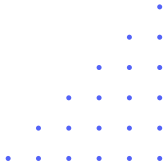

The outer bag is made of woven bag, lined with polyethylene plastic bag, with a net weight of 25 kg per bag.

ITEM	INDEX	RESULT
Potassium chloride	99%min	99.2
K ₂ O	60%min	62
Moisture	2.0%max	1.8
Water-insoluble	0.1%max	0.1
NaCl	1.2%max	1.0
Ca	0.2%max	0.2

CERTIFICATE OF ANALYSIS

The K₂O content indicator is a standard used in the agricultural fertilizer industry to measure the amount of potassium available to plants in a fertilizer.

K₂O, which stands for potassium oxide, is not actually a chemical compound present in the fertilizer; rather, it is a conventional expression used to indicate the total potassium content. This is because agriculturally, the potassium in fertilizers is quantified as potassium oxide (K₂O), even though potassium actually exists in the form of ions such as potassium chloride (KCl) or potassium sulfate (K₂SO₄) within the products.

PRODUCTS

MAIN PRODUCTS

Calcium Stearate 1592-23-0

The content is usually expressed as a weight percentage (w/w%), indicating the proportion of calcium stearate in the total weight of the product. For example, if a plastic additive product is labeled "Calcium Stearate: 10%", it means that in this product, there are 10 grams of calcium stearate per 100 grams of the product.

Maoming Xiongda Chemical Co.,Ltd

SERVED

SERVED INDUSTRY

Our services cater to a diverse clientele including biomedical, scientific research institutions, high-tech enterprises, circuit boards, laboratories, military, semiconductor, nuclear power, photovoltaics, high-end electronics, electronic materials, sewage treatment, petrochemical, and pharmaceutical enterprises.

PART 04

SERVED INDUSTRIES

B U S I N E S S S E R V E D

SERVED INDUSTRIES

Wastewater Treatment

Disinfectants, Coagulants and Flocculants, Precipitants, pH Adjusters, Softeners, Iron and Manganese Removers, Membrane Separation Agents, Dechlorinators.

Agricultural Chemicals

Fertilizers, Pesticides, Seed treatment agents, Soil conditioners, Plant growth regulators, Soil wetting agents and yield enhancers.

Cleaners and Sanitizers

Cleaners and Sanitizers

Surfactants,Bleaches and Oxidizing Agents,Alcohols and Solvents,Alkaline and Acidic Chemicals,Disinfectants and Antiseptics,Fragrances and Aromatics,Preservatives and Stabilizers,Deodorizers.

Plastics and Polymers

Monomers and polymer raw materials,Additives,Catalysts and reaction aids,Solvents and dissolution aids,Mold and shaping aids,Polymer processing and modification agents,Recycled materials and biodegradable polymers.

SERVED INDUSTRY

B U S I N E S S S E R V E D

Pharmaceutical and Biotechnology

Drug raw materials and intermediates, Biopharmaceutical products, Medical solvents, Pharmaceutical excipients, Pharmaceutical-grade chemicals, Biochemicals, Surfactants and emulsifiers, Separation and purification agents, Reaction catalysts.

Coatings and Paints

Resins and polymers, Solvents, Pigments and fillers, Additives, Curing agents and catalysts, Paint additives, Light stabilizers and preservatives

Cosmetics and Personal Care

Surfactants, Preservatives, Moisturizers, Sunscreen Agents, Hair Dyes and Beauty Chemicals, Fragrances and Perfumes, Adhesives and Thickeners, Active Ingredients and Skincare Agents.

Petrochemicals and Energy

Acidifiers and Desulfurizers, Catalysts, Corrosion Inhibitors and Anticorrosive Agents, Dehydrating Agents and Desiccants, Surfactants and Emulsifiers, Polymers and Polymer Additives.

BUSINESS SERVED

We offer you comprehensive one-stop procurement services, ensuring product quality while maintaining competitive pricing to help you effectively reduce costs.

Whether it's bulk commodities or specialized chemicals, we can meet your needs and ensure rapid and efficient delivery.

SERVED INDUSTRIES

B U S I N E S S S E R V E D

SERVED INDUSTRIES

Food Additives

Preservatives,Antioxidants,Food Colorants,Thickeners and Gelling Agents,Flavor Enhancers,Leavening Agents and Fermentation Aids,Enzyme Preparations,Preservative Packaging Materials.

Electronic

Etchants,Cleaning Solvents,Plating Materials,Encapsulation and Encapsulation Materials,Lubricants.

Rubber and Adhesives

Rubber Plasticizers and Vulcanizing Agents,Rubber Antioxidants and Anti-aging Agents,Rubber Fillers and Reinforcement Agents,Adhesive Resins and Polymers,Adhesive Additives,Surfactants,Anti-adhesive and Release Agents.

Textiles

Dyes,Auxiliaries for Dyeing,Finishing Agents,Antishrink Agents,Ant-wrinkle Agents,Bleaching Agents,Flame Retardants,Antistatic Agents,Water Treatment Chemicals,Fiber Additives
