# LABELS

## Labels

Latest technology that allows us to print braille code on roll labels. Great contribution for the blind community and therefore for pharmaceuticals and any type of industry that wishes to place this language on their labels.

All our labels and shrink sleeve are printed with UV inks, which achieves a high range of color intensity.

### Advantages:

- Facilitate the lives of people with visual disability.
- Our inks are Benzophenone free.

### Finishes:

- Matte and bright reserves
- Laminates
- Prints
- Cold Foil (metallic effects in any color)
- Backrest printing
- Cast and cure (holographic print)
- Screen (high relief)
- Perforated

## Plastic label “No label look”

With a very transparent adhesive coating, giving the label a crystal finish, creating the idea of direct printing on the bottle (the label does not change the color of the bottle).

### Advantages:

- You can see the contents of the package if it is transparent.
- If the container is colored, no label look labels respect the pigmentation.
- The use of these labels allows to obtain a competitive advantage for companies.
- Our inks are Benzophenone free.

### Finishes:

- Matte and bright reserves
- Laminates
- Prints
- Cold Foil (metallic effects in any color)
- Backrest printing
- Cast and cure (holographic print)
- Screen (high relief)
- Perforated

# SHRINK SLEEVES

PVC and PET material (environmentally friendly) that can adapt to the shape of the bottle, allowing safety solutions and great finishes.

## Advantages.

360° decoration

Printing on the reverse, protecting the design from consumer manipulation

100% utilization of the entire container structure, ensuring that the packaging has not been violated.

# Types of Shrink sleeves

## › Security seals

on the top to prevent tampering and adulteration of the product

## › Partial shrink sleeve

label type

## › Total shrink sleeve

cover the entire bottle, including the top for more security. It is recommended with perforation

## › Promotional covers

they are usually made without printing (medium or small bottles)

# Types of Shrink sleeves

## > Cold foil print

With our technology we achieve metallic effects in any color, in addition to gold and silver.

## > holograms

three-dimensional light effects that provide a high impact to the aesthetics of the label, making it more attractive to the clients.

## > Matte effect

gives the printed surface a style without bright. This type finish is considered to soften the appearance of a printed image.

## FOLDING BOXES

We manufacture folding boxes for the cosmetic and beauty, pharmaceutical, food, cleaning products and spirits industry. We have excellent finishes, modern structural designs and versatility in sizes.
