

D.K.EXPORTS

*Manufacturer and Exporter of Fabricated
and Machined components for Automotive,
Material-handling, Furniture and other
Industrial Applications.*

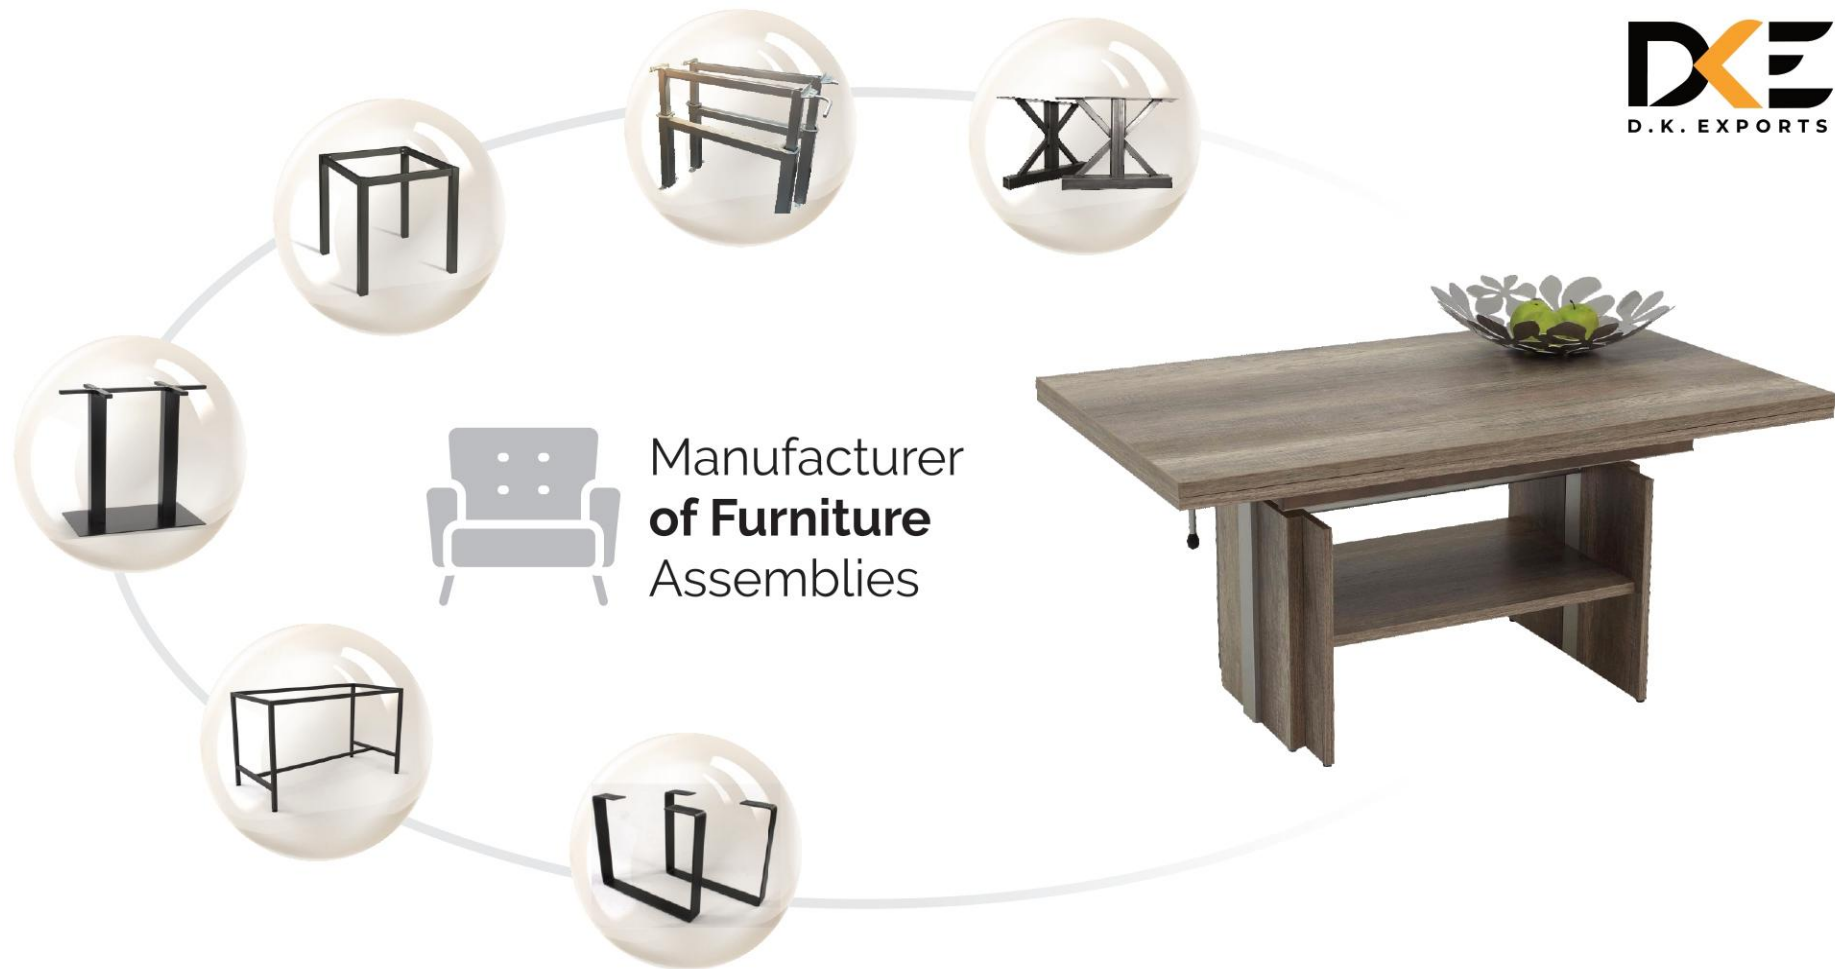

What do we do?

Manufacturer of
Material Handling
components

Manufacturer
of Fabricated
Storage Cages

What is our Strength ?

Sheet Metal
Components

Precision Machined
Components

Tubular Frames &
Welded Assemblies

Complete Hydraulic
Cylinders

Rubber & Rubber
to Metal Bonded Parts

Metal Stillages
& Storage Cages

How do we do it?

State-of-the-Art Machining Capabilities

Our expansive machining facility contains advanced CNC turning centers from leading manufacturers like Mazak and LMW, featuring 4 to 6 foot beds for high-precision machining of components. We also house an extensive collection of milling machines, radial arm drills, and surface grinders for versatile milling, drilling, boring, tapping operations on complex metal parts. Our diverse precision machining equipment enables us to manufacture top-quality components for various industries.

Comprehensive Sheet-metal Forming Capabilities

Our sheet metal shop contains a wide range of single and double action mechanical and hydraulic presses from 10 to 100 tons for precision forming and stamping of sheet metal components. We also have 10 foot hydraulic sheet cutting and bending machines for precision sheet metal fabrication. Additionally, we offer laser cutting capabilities up to 20 mm. This diverse equipment allows us to form and fabricate sheet metal parts to meet the needs of various industries and applications.

Complete Welding & Metalworking Capabilities

Our facility is equipped with an extensive range of MIG, TIG and arc welding machines for fusion welding of mild steel, stainless steel, and aluminum. Our skilled welders can work with various metal alloys and thicknesses. We also have hydraulic tube benders for shaping tubes into coils, U-bends, and custom shapes. Our jigs and fixtures ensure efficient, consistent welding and fabrication of metal components for a diverse range of industries and applications.

In-house Painting, Powder Coating, & Finishing Facilities

Our painting and powder-coating facility allows us to apply high-quality finishes in a variety of colors and textures. We have the capabilities to paint and powder-coat parts of most sizes and configurations. Our ovens cure coatings for maximum durability and corrosion resistance. Our comprehensive painting, powder-coating, and finishing services allow us to provide complete solutions from fabrication to final finish.

Our Quality

Low rejections

20PPM for some high-quantity items and 50PPM for some others. Weekly Red Bin Analysis and QCM meetings.

Near-perfect repeatability of close tolerances in

high-quantity production items being supplied to customers.

Robust and well-established processes and systems

ISO 9001:2015
certification.

Awards

Awarded for Contribution to
UP Industry

Recognition for Excellence in Exports
UP Government.

Silver Medal for Exports in the year 2015-16
in North India

Whom do we do it for ?

-  **India**
-  **Germany**
-  **Belgium**
-  **Poland**
-  **United Kingdom**
-  **United States**
-  **Canada**
-  **Australia**
-  **New Zealand**

Our components are fitted in some of the best global brands
