Al-Madina Company For Gypsum Manufacture was established in 2012. It is an Egyptian joint stock company. The company succeeded in penetrating the gypsum industry in Egypt.

Al-Madina Company is working on the safe production and high quality of the product that matches the local and international standards in terms of quality and providing a product on a global level using the latest production lines.

The gypsum industry is one of the most important industries in Egypt which in turn leads in this sector to be part of the success of the Egyptian economy to support the growth and the continuous need witnessed by the local and international markets.

The vision of Al Madina Company

**To contribute to the development of the gypsum industry
and to become one of the leading companies in Egypt
and the Arab world.**

**Working to achieve continuous growth by using the latest types
of environmentally friendly technology and by maximizing
the capabilities of employees in order to reach institutional
excellence in a safe environment while ensuring the satisfaction
of our customers and thus maximizing the return
for all our partners in success.**

Our Company Strategy

The strategy is underpinned by a series of values that guide management decisions and behaviors and set standards of excellence and trust that satisfy our customers, employees and partners.

Industry: Pursuing world-leading technologies and manufacturing capabilities.

Quality: Reaching first-class standards.

Business: Adhering to the best ethical standards and emphasizing the integrity and solidity of our business plan with our customers.

Protection and the environment: Our principle is to advance and support the principle of a green economy that "preserves the environment".

Society: We value opportunities and responsibilities that make a dramatic difference in people's lives.

It is our contribution to society that justifies our existence

People: We rely on talents and cadres.

We are in Al Madina Company For Gypsum Manufacture

**Our goal: To increase the efficiency of the product
and conform to international quality standards.**

**Excellence from competitors with the quality
and addition of new production lines
to raise the level of competition
and increase production capacity.**

**Selecting, hiring, developing and retaining the best
human cadres in the labor market.**

Brand promotion

**Follow the latest environmental health
and safety policies.**

**Developing the organizational structure
of the work system.**

**Building the largest network of customers,
distributors and dealers, and introducing
the product to new markets.**

Al Madina gypsum is very soft

1) Harden, so you will save corbels from breaking

2) Higher production because its softness makes its density higher

3) You will save linen

4) You will save white cement
