NATURAL

www.alsanaturalsoapbars.com

We are glad to present high quality natural handmade soaps aromatherapy shower and body products which we export to USA, UK, and worldwide including China recently. With a highly attentive and professional form of natural raw materials, organic diversity, pure aromatherapy oils, our products are able to create natural and fresh smells, magnificent aromas and refreshing effects that create miracles on your skin. We never use artificial and chemical odors that have the potential to cause allergic effects on your skin. We do not use any petrochemicals or synthetics and our products do not contain SLS (sodium laureth sulphate).

Our products are not tested on animals and do not contain any animal substances. We are proud of our handmade glamorous organic soaps produced in small batches by the cold process method. Rich in vegetable glycerin, our natural and organic soaps are now a luxury which you can access every day. We offer you a very soft, innovative and creatively designed natural soap range that attracts attention with its aesthetic beauty. We develop our soap further with organic vegetables, fresh fruits, natural French clay, milk varieties and vegetable dyes.

In addition to these, we put unsaponified oil which is named as "superfat" in our soaps which cleanses and nourishes and moisturizes the skin.

NATURAL ORGANIC

In fact, there is very few number of natural soap in this quality, and we believe that with our soap making experience we offer our customers the best quality handmade soap that they can find. All our handmade soaps are 100% natural and organic (except for a few products containing milk yogurt and Honey) and these are suitable for vegetarians and vegetarians.

NATURAL ADDITIVES

All of our herbal soaps contain natural Olive Oil, Coconut, Date Palm, Sunflower, Castor Oil and Shea Butter. To obtain a creamy, moisturizing and rich soap bubble; we feed our soaps with natural and organic oils such as avocado, apricot, hemp, almond, flaxseed and Coconut Oil. They can be used in baths and showers, as well as soaps that are effective and natural solid shampoos and soft enough to be used as facial cleansers and shaving soaps.

AREA OF USE

INGREDIENTS

- Extra Virgin Olive Oil
- Coconut Oil
- Cocoa Butter
- Sweet Sweat Almond Oil
- Sulfur
- Aqua

Sulfur soap, which is very often preferred for the removal of acne spots, has been used since ancient times. Sulfur soap, which is produced from natural materials which are in the category of clay soap and obtained from nature, is good for many ailments and can be preferred in skin care. Sulfur soap, which is one of the best cures for the skin, has a structure that prevents the formation of acne.

It has the features such as controlling the body's oil and Aqua balance and preventing the body from sweating by spreading bad odor in hot weather. Soap that has an effect on oily skin prevents excessive oiling and prevents the emergence of acne and oil glands. Sulfuric soap, also known as seborrheic dermatitis or eczema, is a soap with significant benefits in the treatment of vulgaris. Thanks to its antibacterial properties, acne and acne formation does not occur. In another area preferred by dermatologists; it provides cleaning in a short time thanks to the drying effect of the oil glands that have already formed. Sulfur soap, which is good for many skin diseases, also has an important effect on the removal of rosacea. Soap cure, which causes redness and swelling in various parts of the body to disappear after a while, provides a very high benefit.

Sulfur soap which has great benefit to the skin regulates the oil balance of oily skin and prevents excessive lubrication. Use once or twice a day will be enough for the skin to regain its natural form. Sulfur soap that is intended to be applied to the hair can be used several times a week. This will prevent excessive lubrication. It contains natural olives and ingredients such as castor oil, castor oil, sulfur, almond oil and Aqua, providing significant benefits for both hair and skin. It can be used throughout the body and there are no side effects.
