Organic Certified Products

OUR LOCATION

State of the Art facility, based in North India at Rampur (Uttar Pradesh)

Well connected with surface and air transport (180 kms from New Delhi)

Strategically placed in close vicinity with the menthol fields.

A heritage town at the foothills of picturesque Himalayas.

What Makes Us Different

Technology

World class facility for all our products resulting from continuous R&D.

Learning

Dedicated team to continuously monitor domestic & global markets and respective trends are conveyed to our esteemed buyers time to time

On-time

99.9% delivery record to our prestigious clients all across the world

Quality

No quality related complaint received since inception of the organization

Transparent

Known in industry for following best business practices and ethics

Our Legendary Timeline of 44 Years

- 1978: Started Crystal Facility with just 200 sq. yards. Production just 15 MT/month
- 1985: Started fractional distillation of mint products. Pioneers in this trade since the time when Menthol was being imported from Brazil & Japan
- 1989: Became the first person to export menthol
- 1990: Increased production of Menthol to 50MT/month
- 1996: Became the first company to export Menthol to China
- 2004: Started Dihydromyrcenol with 40 MT/month
- 2008: Increase in the Menthol production to 200 MT/month
- 2010: Production of Dihydromyrcenol increased to 200 MT/month
- 2012: Started Thymol production with 125 MT/month
- 2015: Started construction of new factory in 50,000 sq. yards
- 2019: Started the production with new techniques to increase the production of Menthol and its derivatives to 500 MT/month and Dihydromyrcenol to 600 MT/month
- 2021: Started cosmetic ingredient division with development of PO, HMS & OS.

Manufacturing Facility

Facility Overview

**24 Chambers of 7500kg
each**

For Manufacturing Menthol Large
Crystal

**6 Chambers of 10 MT
Capacity**

For Producing Menthol Small Crystal

**6 Chambers of 10 MT
Capacity**

For producing menthol powder

10 Distillations Column of 800 to 1000 mm diameter for producing Molten menthol, Peppermint oil and other mint related products.

Separate Distillation column for Producing Cis-3-Hexenol and Cis-3-Hexenyl Acetate.

Different types of Glass and SS reactors for making acetates and other products.

Multiple Hydrogenators in our facility.

In house pyrolysis plant is present.

ETP Plant to treat effluent from all the plants.

More than 24 Distillation Columns, 50 Reactors, Centrifuge, Fluidized Bed Dryer etc.

Research & Development Centre

Our Idea of Quality

**Quality Control and R&D
Laboratory is fully
equipped with state-of-
the-art
testing equipment & pilot
facilities**

10 GLC units with polar &
non-polar capillary columns
Anton Par equipment's to
check RI, OR, Density

Melting point apparatus
Mini fractional distillation
Agilent HPLC

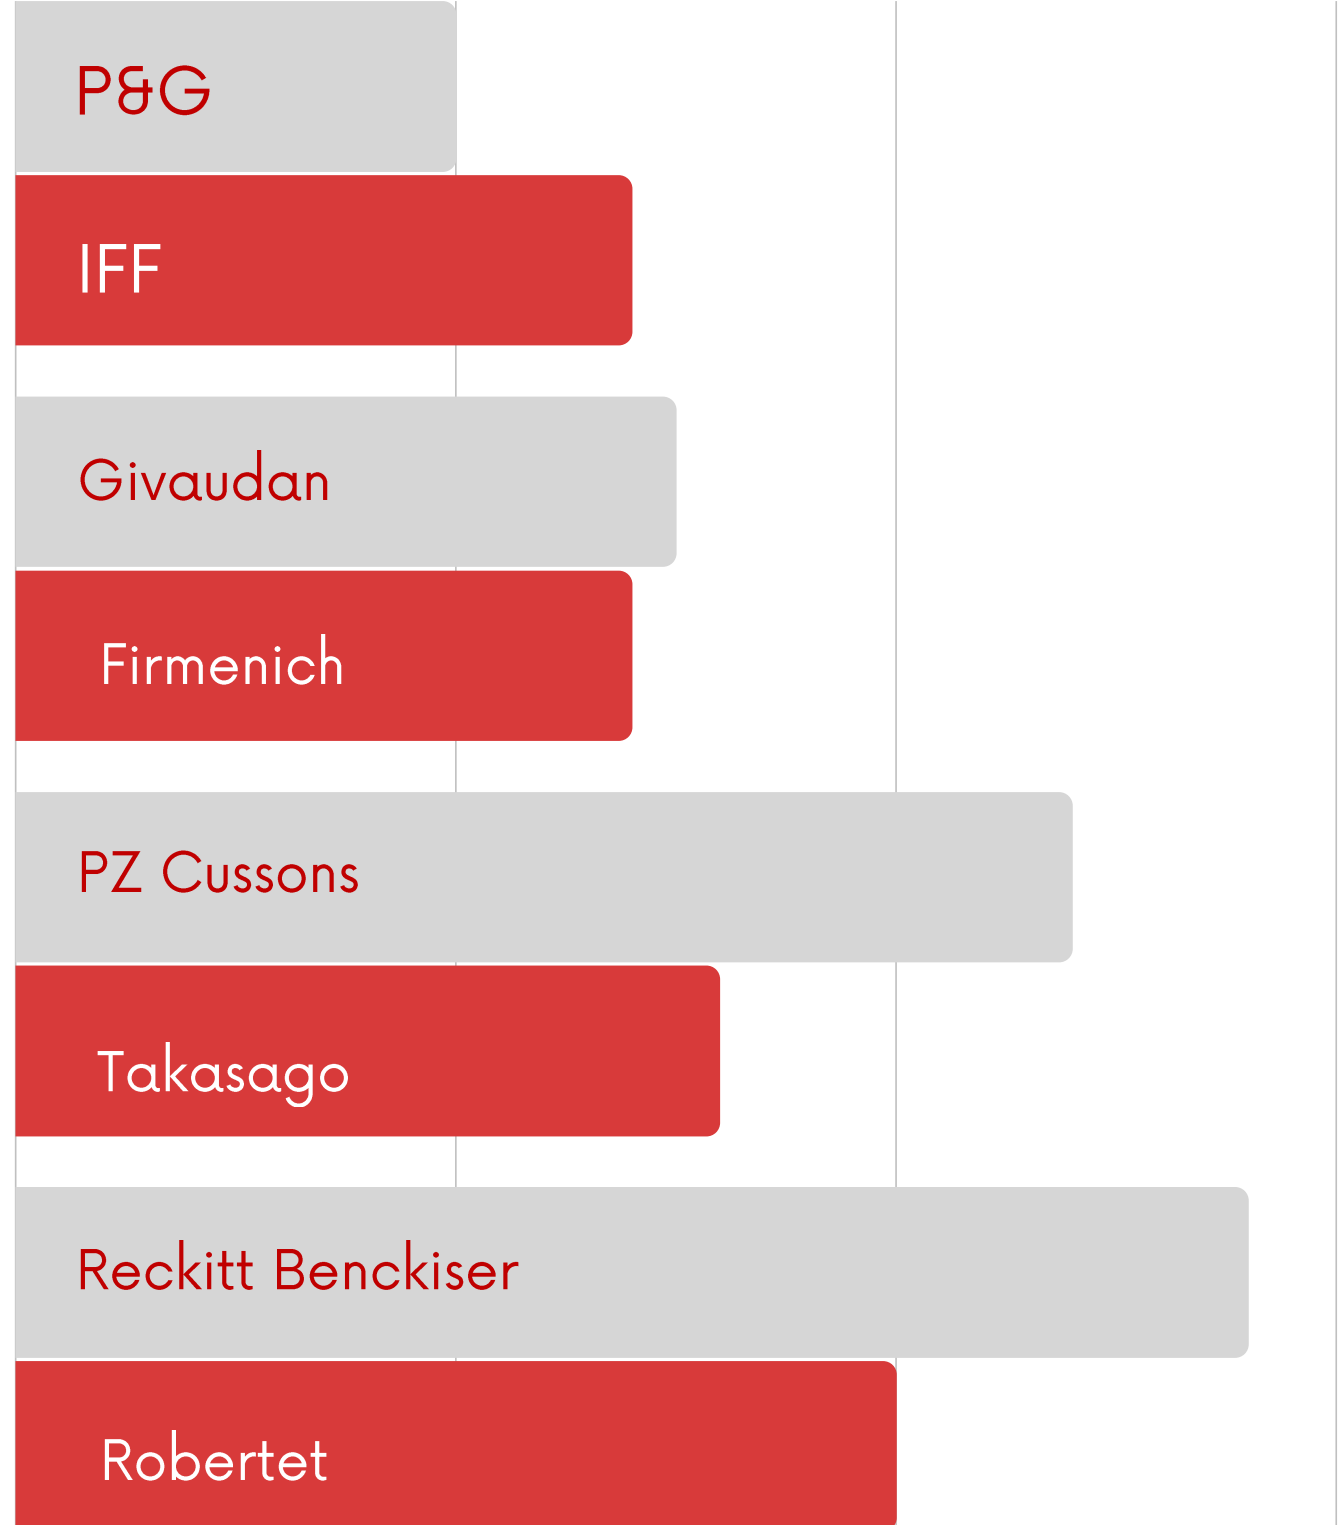

Agilent GCMS
Titration facility
Polarimeter

Reaction vessel
PH meter
Refractometer
