About us

Golden oil : Pioneers of excellence

We are an Egyptian Conglomerate with the essence of a limited partnership company Almagd Group for Investment, dedicated to pioneering excellence in the realm of the vegetarian oil industry. Operating as a singular entity, we seamlessly embody the functions of three distinct factories - encompassing extraction, refining and bottling processes all under one roof.

Golden Oil highlights its commitment to excellence through the use of modern and innovative technologies.

OUR CERTIFICATES

Our system standards are a testament to the exhaustive efforts invested by our expert committee. The FSMS certification we seek is not just a legal requirement; it is a manifestation of our dedication to establishing a more focused, coherent, and integrated system. We believe in setting benchmarks that surpass statutory and regulatory criteria.

Our certification is a mark of our pledge to meet and exceed all applicable food safety-related standards.

Food Safety Certification

This certification is a testament to our unwavering dedication to ensuring the purity and safety of our products, adhering to rigorous standards set forth in the realm of food safety. We prioritize the well-being of our consumers and are honored to be recognized for our efforts in maintaining the highest standards of food safety and quality.

ISO 14001

Is the international standard for environmental management systems (EMS) and the most widely used EMS in the world. This helps to control our environmental aspects, reduce impacts and ensure legal compliance.

ISO 45001

Is the world's international standard for occupational health and safety, issued to protect our employees and visitors from work-related accidents and diseases.

FSSC 22000

Certification Scheme for food safety management systems consisting of the following elements: FSSC-22000, ISO/TS 22002-1:2009 and additional FSSC 22000 requirements (Version 5.1).

OUR CERTIFICATES

Our Strategy

We are crafting a golden future

We firmly believe that excellence and competitiveness are born from innovative and creative strategic thinking.

Our commitment to staying at the forefront of the industry is not merely a business goal; it's a pledge to continuously evolve and adapt.

At Golden Oil, strategic thinking is not just a practice; it's embedded in our organizational DNA, propelling us towards continuous, improvement and setting industry benchmarks.

A Golden Standard

Our journey is guided by a golden standard that goes beyond business metrics.

We are driven by the belief that quality should be inherent, not negotiable.

Every drop of Golden Oil is a reflection of our unwavering commitment to health, safety, and excellence.

We believe in meeting and exceeding expectations, not just for compliance but for the peace of mind of every consumer who chooses Golden Oil.

Join us on this golden journey, where quality meets care, and every bottle is a promise fulfilled.

Our Products

Ravita Mixed Edible Oil (Soybeans, Sunflower)

A versatile cooking and frying oil, this blend combines the finest oils, including soybean and sunflower oil. The components of this meticulously crafted blend consist of refined soybean oil and sunflower oil, meeting the Egyptian Standard Enriched with TBHQ, a (2016/8041 M.Q.M) Specifications recognized antioxidant, this oil is carefully measured to maintain optimal freshness and quality. This cooking oil blend is designed to elevate culinary experiences, delivering a harmonious combination of flavors while adhering to stringent quality standards and antioxidant-rich composition.

Our Products

Golden moon (Sunflower oil)

Renowned for its heart-healthy benefits, Golden Moon Sunflower Oil is a vegetarian delight, rich in monounsaturated and polyunsaturated fats that actively contribute to reducing LDL cholesterol while promoting the increase of HDL cholesterol. Rich in omega vitamins -6 fatty acids, essential vitamins, and the potent antioxidant vitamin E, this golden elixir not only supports cardiovascular health but also nourishes your skin and fortifies your immune system. Our sunflower oil is a versatile companion in your kitchen, with a mild flavor and high smoke point perfect for sautéing, frying,

Our Products

Oily Pure (Soybeans pure)

Our process stages are subject to quality and control vision. It begins with receiving the seeds, ensuring their Quality, sifting to separate the impurities and keeping them in storage silos. Then prepare the seeds by cleaning and cooking. After that the seeds crushed and flaked to ensure the highest efficiency of the extraction process and extract every drop of oil in the seeds using the latest equipment and manufacturing technology.

The seeds sent to the extraction unit, where the oil extracted from seeds.

The meal heated, roasted, grinder and store or pack in bags.

The crude oil is treated by adding water to separate the gums to increase its quality.

The refining stage, in which FFA and color and odor causes are removed to produce pure and healthy refined edible oil that subject to food safety requirements.

At last The bottles are filled in different sizes meet customer requirements, using the latest oil filling line technology, where all steps are subject to continuous monitoring and the implementation of sterilization and analysis plans to ensure the safety of the work environment, the quality of the final product, and the fulfillment of health and nutritional requirements in the facility.

Our Products

Vegetarian oils:

At Golden Oil, we carefully select our seeds to produce pure, delicious and healthy edible oils, free of trans fats and rich in nutrients beneficial to the human body, such as: Unsaturated fatty acids, Omega 6, which helps to reduce (LDL) and increase (HDL) and protection from cardiovascular diseases (CVDs), Vitamins and Antioxidants that enhance the body's vitality and all these elements play a role in raising immunity and contribute to the body's vital processes and growth.

Soybean meal Hi-pro:

On the other hand, we produce soybean high-protein meal as a superior source of plant-based protein, making it an ideal choice as a component of the farm animals feeds rich in nutrients that contribute to increasing the development of livestock by producing calves and poultry with high productivity and low costs.

Soybean Hulls:

Soybean hulls are fibrous materials very valuable for ruminants, thus available and very valuable feeds for on-farm feeding of cattle. We produce Milled and pelleted hulls as a customer requires.

Vision

We aspire to ascend to prominent position as one of the leading production companies not only in Egypt but on global scale.

Setting an unparalleled benchmark for quality, innovation, and sustainability.

Golden Oil strives to be more than manufacturer.

We aim to deliver unparalleled products derived from the most exquisite seeds.

Mission

A silhouette of a person standing on a rooftop, looking out over a city skyline at dusk or dawn. The person is holding a briefcase in their right hand and has a bag slung over their left shoulder. The city skyline is visible in the background, with various buildings and structures. The overall tone is professional and aspirational.

Our comprehensive mission is anchored in excellence – from meticulously sourcing premium raw materials to the final artful bottling.

We are dedicated to the production and delivery of the finest vegetable oils, achieved through state-of-the-art extraction, refining, and bottling processes.

Who We Are

01

Golden Oil stands as the epitome of excellence in the vegetarian oil industry within Egypt and the Middle East. Comprising a dynamic group of creative minds and seasoned engineers, our team boasts extensive expertise in the art of extracting, refining and bottling vegetarian oil. We are not just a company; we are a collective force committed to the relentless pursuit of innovation and quality.

Our Expertise and Innovation

02

Our journey is guided by the fusion of creative brilliance and engineering excellence. At Golden Oil, we bring together the best minds in the industry, utilizing cutting-edge scientific and technological techniques. This fusion has propelled our group to the forefront of the field, setting new standards for quality and innovation in the extraction, refining, and bottling of vegetarian oils.

ALMagd Group's Legacy

03

In alignment with the remarkable successes achieved by the ALMagd group across various industries, Golden Oil emerges as a strategic venture specializing in the extraction, refining, and bottling of vegetable oils. Strategically located in the Sixth Industrial Zone in 6th October city. Our state-of-the-art facility operates in collaboration with renowned international companies such as Desmet ballestra, Bühler Group and Sidel.

Core Values at Golden Oil

Quality Excellence

Each drop of golden oil embodies excellence meeting and exceeding the highest industry standards.

Innovation and Creativity

We continually seek and embrace novel ideas, technologies and processes to stay at the forefront of the vegetarian oil industry.

Customer and Satisfaction

Ensuring that every experience with Golden Oil is not just satisfactory but exceptional.

Environmental Responsibility

Golden oil is dedicated to sustainable practices that contribute to the well-being of our planet.

Employee Well-being

We prioritize a safe inclusive and collaborative work environment that encourages personal growth and professional development.

National Pride

As an Egyptian company, we take immense pride in our national identity.

Logistics

Shareholders' message

We believe that our implemented success in achieving customer loyalty done throughout focus on high quality of raw material and manufacturing process, we work under big efficiency to reach the optimize.

Extraction Section

The extraction section has five important steps:

- 1- Preparing the seeds: cleaning, cooking and flaking the seed into flakes to facilitate the process of oil extracting
- 2- Extracting oil from seeds using the latest methods and equipment for pressing and extraction with organic solvents
- 3- Roasting the meal (seed pulp after extracting the oil) resulting from the extraction process, grinding and packaging it
- 4- Separate the oil from the hexane from the miscella mixture by distillation to produce the crude oil
- 5- Removing gums and impurities from crude oil

Oil Refining Department

Oil Refining Department specializes in making crude oil safe for consumption, using advanced technology from Desmet International. With a daily capacity of 400 tons, the factory has sections for Gum Removal, Neutralization, Bleaching, Dewaxing, and Deodorization. It processes various vegetable oils, with a focus on soybean oil. The key units include Bleaching, Gum Removal, Dewaxing, and Deodorization machines, along with storage tanks.

Packaging section for soybean meal and hulls

The soybean meal and hulls get packaged at the packing stations, either in bulk or bags, based on what the customer needs.

All the manufacturing processes are running in closed belts, pipes and equipments belts and machines. It's all controlled from a monitoring and adjustment room (SCADA) using special devices and programs. This is done to make the operation work better and to stop any mistakes or issues that might come up because of people.

Packaging section for oil bottles

Packaging is done using the best methods and modern techniques to ensure the highest quality.

- 1- Rafita oil, which is a blend of the finest sunflower oils and soybean.
- 2- Golden Moon oil, which is refined sunflower oil.
- 3- Oily Pure oil, refined soybean oil.
