PE Stretch Film

Hand stretch film features good puncture resistance, high stretch rate, good tear resistance, and high clarity. With mentioned characteristics our hand stretch film is good for wrapping cargo, reducing collapse risks, preventing cargo shifting when storage. Our client can benefit our product when secure packaged, and reduce worker injury.

Hand stretch film is suitable for the manufacturing industry, storage industry, transportation industry, and packaging industry. Currently, hand stretch film has 4 thicknesses 15 μ m, 17 μ m, 20 μ m, 23 μ m for client's choices. We accept customize thickness if order big quantity. Hand stretch film usually packs every 4~6 rolls in a cardboard box

Stretch film is uniquely designed and manufactured specifically based on the best of advanced technically in the world so 5 layers are pressed to be ultra-thin and highly transparent..

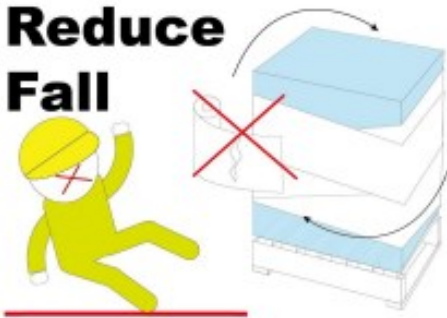

Manufacturing Plant based in Vietnam, we own the most modern machinery system in the world so we are sure and proud of our products which are good quality , eco-friendly and have high application

Stretch film also known as molded film, is produced by an extrusion molding process. The Typical characteristics of the film are optical properties, gloss, transparency, toughness, smooth stretching, thin, light, and high adhesion.

We use our expertise and manufacturing capabilities to launch new products that are better cheaper and more economical with ISO 9001:2015 Quality Management System Certified
