

DELFINLOG

Innovative Transportation Solutions

DELFINLOG

DelfinLog Mission

DelfinLog began with a clear mission: put the customer first, deliver quality, and strive to be the best at what we do. Today, our mission remains the same. We believe that complex transportation problems can be solved in the hands of the right people, with the right tools, and the right experience

Solutions

Custom built-for you

DelfinLog provides transportation and logistics solutions for projects in UK, Europe, Middle-East, Eurasia and all around the world like Asia, Africa and America. Over land, on water, in the air – or in any combination – we help customers get the job done. No matter where your freight is going, DelfinLog can get it there. We enjoy the challenge of fitting the puzzle pieces together to arrange pickups and deliveries to some of the world's most remote and inaccessible locations.

We have built a reputation of superior service to diverse industries including industrial farming plants, construction and mechanic-electronic freights. The DelfinLog partner companies and our dedicated people deliver a complete integrated freight transportation package – and we've been doing it for over a decade.

At DelfinLog, we don't believe in one-size-fits-all solutions. We start the process by asking questions. We listen to your needs and the unique challenges you face, then using the most efficient equipment in the transportation industry, we develop a customized solution just for you. It will have just the right mix of speed, mode, technology and people to add value to your supply chain while meeting your business objectives. We don't try to fit you into our world. We build the world around you. That's our way.

With years of experience operating in challenging areas like Middle East, Europe and around the world, we know what it takes to help you complete projects and do business in the most difficult and remote locations. With an extensive fleet of equipment to call upon, we can handle the toughest, most unusual assignments anywhere. Trust us to put together a transportation or logistics plan that fits your needs, timeframe and budget.

Projects Project shipping Logistics

- From the startup of a mine operation to flying supplies into the jungle for the construction, food cool chain, raw material supply, chemical IMO freights, DelfinLog has played a part in some of the world's most complex and challenging construction and turnkey projects like poultry egg, meat, feed mill projects. We've been behind the scenes delivering freight, flying charters of oversized equipment, or out in front. We also support our customers by providing whatever is needed to make their unique project a success. Our people have years of experience also the farming equipment and livestock freights, construction, electronic-mechanic components and the skills to deal with government agencies, international organizations and customs regulations. DelfinLog's unique multi-modal transportation options and all-in-one logistics services set us apart from other companies. You can count on us to know exactly what to do and how to do it.

Oversized and Heavy Freight

No challenge is too big

A drill rig, a wrecked airplane, massive fuel tanks... For DelfinLog, no load is too wide, too tall or too heavy. Handling oversized and overweight freight is our specialty, and we take pride in coming up with cost-effective and creative ways to deliver it. With a variety of equipment, including special trailers, barges with removable fences built to carry bulk freight we can handle any challenge. Projects in Europe or Middle-East, all over the world have given us the experience and knowledge to handle the bulkiest pieces of freight. But specialty moves require more than just the right equipment. Our skilled drivers, staff and captains know the load, the road and how to get it there.

Bulk

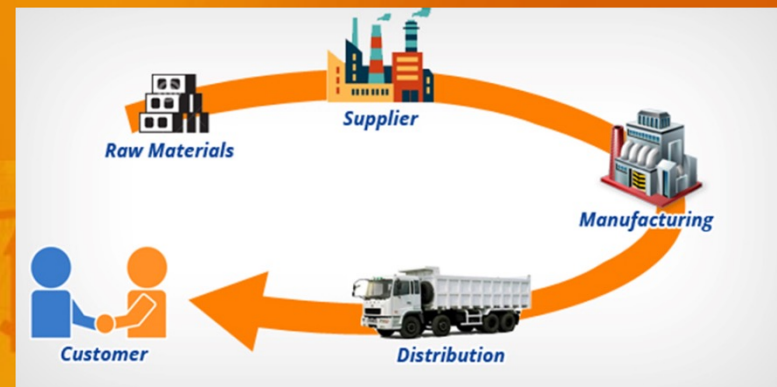

- From a product as wholesome as milk, egg or to the most hazardous liquid chemicals, DelfinLog will transport your liquid and dry bulk products with the ultimate level of care and attention. Special commodities are just that: special. Chemicals, hazardous waste or temperature-controlled edibles are unique products that require a knowledgeable and experienced transportation partner. DelfinLog uses specially designed and manufactured steel tankers equipment to transport and deliver your sensitive products in the same condition as the minute they were loaded. Milk, wine or oilfield chemicals – we can handle it.

Logistics

Supply chain logistics

Logistics success comes from selecting the right company to get the right items to the right place at the right time. DelfinLog is that company. With multiple solutions – transportation, warehousing and distribution, return programs, purchasing, order management, customs clearance, facility management and raw materials handling – we help you stay competitive while meeting your goals. Our experienced staff handles everything from pick-and-pack operations for your goods just-in-time warehousing to contractor management and hands-on multi-modal transportation programs. We can do it all; from a complete “turn-key” approach for managing distribution, inventory, customer orders and accounts receivable, to handling just one link in the supply chain, such as warehousing and distribution. We can also assess your current logistics operation and suggest ways to make it more efficient and cost-effective.

Cool Chain Logistics

DelfinLog's Cool Chain logistics service manages your frozen food supply chain from start to finish. We pick up where the food is caught and deliver it to where it is consumed. From sea or factory to serve. We may ship seasonal fresh and frozen fish. We have the network, knowledgeable employees and equipment to bring the frozen food, egg to market while maintaining its quality at every point. DelfinLog's Cool Chain delivers via highway, sea, and air, or we can provide cold storage at our facilities.

Providing solutions to your transportation and logistics challenges. We have the answers..
