

# CPP FILMS

THE VERSATILE POLYMER

*Innovation Separates  
Those Who Lead From  
Those Who Follow*

# FILMEX<sup>III</sup>

## Our vision :

Creating new customer value and spreading widely by providing high-quality products and services to our customers through our non-stop innovation, while keeping in harmony with the continuous global development.

We are seeking Constantly for innovation and growth to be always one of the leading companies in Egypt and to export our exceptional high-quality products all over the world.

Our utmost priority is setting our Long-Term Business Plan as a part of great efforts to achieve our Corporate main Mission. In order to achieve this plan, it is vital that we conscientiously face difficult challenges.

## Mission

We believe that Innovation separates those who lead from those who follow, so we are always dedicated and committed to do our best (by using the dynamic technologies, effective innovation .the team spirit and our human resources -that enriched through cultural diversity - are the most significant elements of our success. In order to meet the needs of the end users, get their satisfaction and become a remarkable source of plastic film industry; Polyethylene (PE) and Cast Polypropylene (CPP) products in the national and international markets.

# Core Values

**RELIABLE:** Our customer relies on us to get the right work, as we always remain keen on being trustworthy and believable so we will do what we have promised.

**RESPONSIBILITY:** We strive to produce the best quality plastic film products for our customers in order to make sure that we take on responsibility so, we manufacture products with utmost care by using renewable appropriate resources.

**COMPETITIVENESS:** We believe that the value of our network defines our competitive advantage and that's the output of hard work, and we always improve our performance in order to be the Market leader.

(To deserve the market leadership)

**INNOVATION:** We are proud of our unique custom-designed solutions for our customers and always keep in our mind that Innovation separates those who lead from those who follow.

**CUSTOMER SERVICE:** Our customer care service exceeds the expectations of our customer in order to keep the Principle "The closest to its customers" in the first place.

## AlQuds CPP Film

When it comes to flexible packaging especially CPP film products, customers are looking for Quality, Service and good value of money, but they find it difficult to get all in one. So we started to change that standard, making it our goal to provide all three.

Our CPP films have excellent properties including good transparency, scratch resistance, heat resistance, and moisture proof. Its unique properties can be used for a wide range of applications.

Our R & D department is always engaged in continuous development and innovation with our state-of-art laboratory for testing and analysis. Proudly we give world-class capacity and competitive( products), we are fully geared to be the supplier of the right choice.

## Some of the major benefits of CPP are listed below:

- Excellent tensile strength, resistance to impact strength and puncture resistance.
- Excellent barrier properties to odors and gases “oxygen, nitrogen, carbon dioxide”.
- Excellent packaging integrity at extreme temperatures and high heat resistance.
- Excellent transparency, gloss and printing performance, with low haze.
- Excellent resistance to oil, fats and chemical solvent.
- Excellent toughness and abrasion resistance.
- No impact on the coefficient of friction control.
- Film can be thermally or ultrasonically sealed.
- High aesthetic quotient for enhanced shelf appeal.
- High yield per unit area and low specific weight.
- High permeability to water vapor.
- Customizable for special applications.

## Some of the major applications of CPP are listed below:

Some typical applications that Cpp film properties offer :

- Food packaging such as all bakery products, rice, pasta, indomie, coffee, tea, salt, powder, Legumes and vegetables.
- Boilable and puncture resistant packaging such as Pickles, liquid, ketchup and salad sauce.
- Non-food packaging materials such as tissues, wet wipes, detergent, Stationery, Flower slave.
- Lamination film one side treated ,other side or both sides can be heat-sealed depending on the degree.

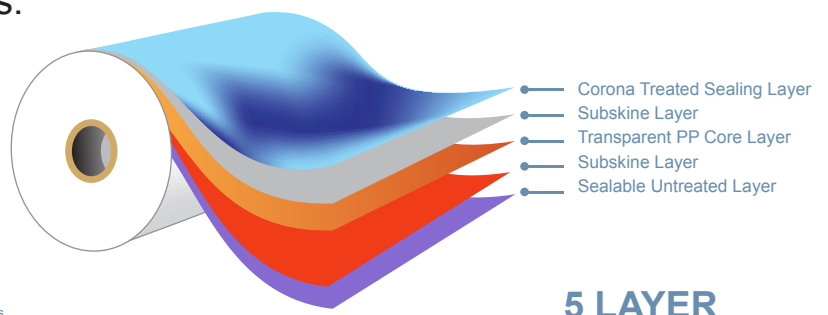

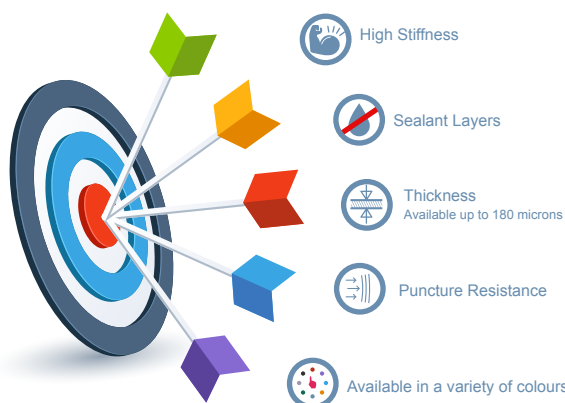

# Film Properties:

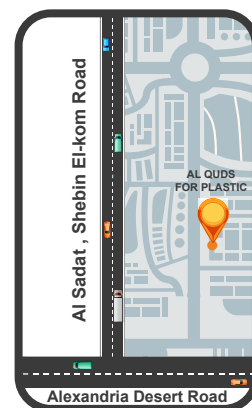

We offer a selection of homo and copolymer products to special grades with superior resistance to high and low temperature heat sealability that makes them ideal for various uses. The film is enhanced for impact resistance and heat-sealing strength (135°C or lower) making it suitable for high retort pouch applications and as a lamination sealant material.

## FEATURES:

- 5 Layers co-extrusion Cast Polypropylene Film by WINDMÖLLER & HÖLSCHER.
- Stiffness: High Stiffness (homopolymer) or soft (co-polymers) or medium stiffness.
- Sealant Layers: One or two sides; depending on the grade.
- Thickness: Available from 15 Microns up to 180 microns.
- Width: Available from 400 mm up to 2650 mm.
- Packaging: Horizontal or vertical packaging; small rolls can be boxed as specified
- Puncture Resistance: Increased resistance available on certain grades.
- Slip: Modifiable to be either high slip or low slip.
- Haze: Available  $\leq 2\%$  on some grades.
- Cores: Available in 3 or 6" inches.
- Available in (many) colors.

**6th industrial zone, Sadat City, Egypt**
