专注钢管制造38年

设备先进·精诚兴业·品质为王

FOCUSED ON STEEL PIPE MANUFACTURING FOR 38 YEARS

河北恒泰管道装备有限公司

Hebei Hengtai Pipeline Co., Ltd

公司简介

Company profile

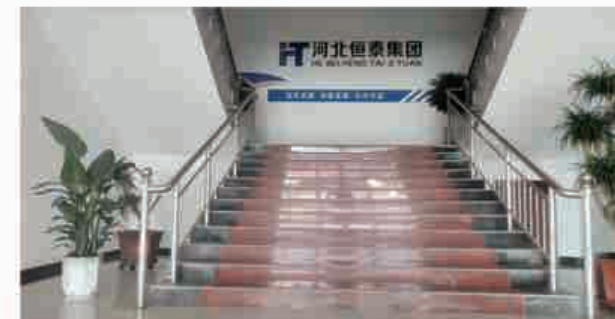

The company specializes in producing ASME/ASTM/API5L/ANSI/ISO/JIS/DIN/BS/GB standard pipelines(seamless steel pipe,straight seam steel pipe,spiral steel pipe,anti-corrosion steel pipe),pipe fittings (elbows, tees, reducers, caps, flanges), and according to the market requirement. Special materials such as low-temperature steel pipes, low-temperature pipe fittings, stainless steel (duplex steel) pipes, stainless steel (duplex steel) pipe fittings, alloys (steel pipes, pipe fittings), etc.

After years of unremitting development, Hengtai has obtained multiple international certifications, including API, ISO, CE, PED, ASME, classification society, etc., becoming a company that can provide complete products for the pipeline system. We can provide one-stop procurement service for fluid systems such as petroleum, chemical industry, natural gas, fire protection, electric power, heat supply, shipbuilding, chemical fertilizer and paper making.

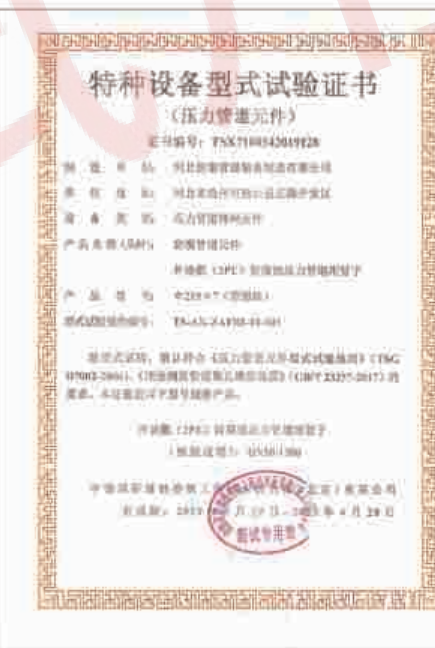

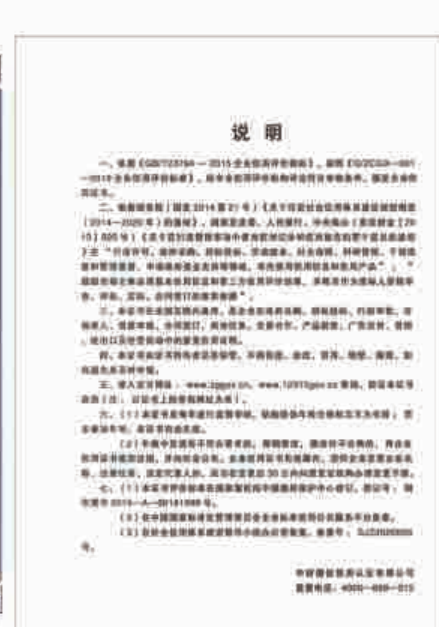

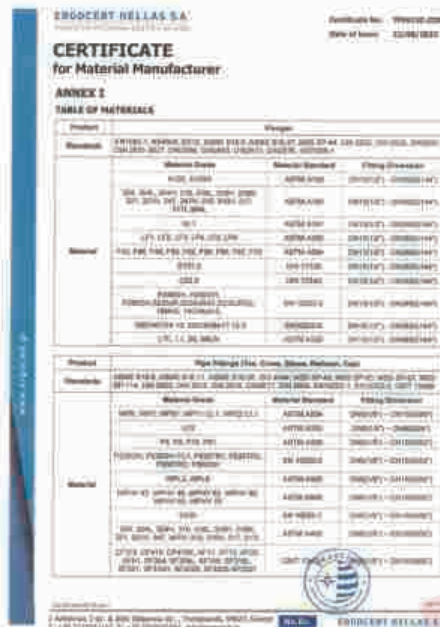

Our products are exported to the America, Canada, Russia, Australia, Italy, Belgium, Argentina, Iran, Emirates, South Korea, the Philippines, Vietnam, and other countries. Long-term product supply has not only won wide recognition from customers, but also established long term cooperation.

资质证书

Qualification certificate

车间设备

Workshop equipment.

检测设备

Testing Equipment

Seeking truth, seeking corroboration, inspection, excellent inspection and good inspection first.

无缝管道

Seamless pipes.

Seamless steel pipe is a type of steel pipe with uniform inner and outer diameters and consistent wall thickness, which is processed by a piercing machine from a solid cylindrical billet. Compared to welded steel pipes, it has advantages such as no welded joints and excellent mechanical properties, and is commonly used in pipeline transportation systems under high pressure, high temperature, low temperature, and corrosive environments. Common seamless steel pipe materials include carbon steel, alloy steel, and stainless steel.

直缝管道

Straight seam pipeline

Application scope: oil pipelines, natural gas, urban pipeline networks, mining coal slurry pipelines, high-voltage transmission lines, wind power, bridges, steel structure buildings of high-speed railways, etc.

Straight seam pipeline

Straight seam pipeline

Straight seam pipeline

Straight seam pipeline

螺旋管道

Spiral pipeline

SSAW pipe full name is Spiral Submerged arc welding pipe. The pipe is formed by spiral submerged arc welding technology which is called SSAW pipe. Generally speaking, when it comes to the same standard and steel grade, the price of SSAW pipe is cheaper or lower than ERW pipe and LSAW pipe. The strength is higher than the straight seam welded pipe.

We are strict with every production detail, just to bring you safe and reliable products.

防腐管道

Anticorrosive pipeline

Anticorrosive steel pipes refer to steel pipes that have undergone anti-corrosion processing and can effectively prevent or slow down the occurrence of chemical or electrochemical reactions during transportation and use, extending the service life of steel pipes and reducing their operating costs.

法兰系列

Flange series

Welded neck flange

Slip on flange

Lap joint flange

Screwed flange

Blind flanges

Spectacle blind flange

三通系列

Tee series

弯头系列

Elbow series
