

JMR Brass Industries

COMPANY PROFILE

OVER 20 YEARS IN THE METAL WORLD

WELCOME MESSAGE FROM CEO

Hi, this is

Prips Katheeriya

and you are visiting JMR Brass Industries

“JMR came into inception with a goal of satisfying the wide market share of Brass Components users. In order to achieve this goal, team of JMR is continuously working hard towards new product development, customer satisfaction, quality improvements, business policies or fighting competition. Here, we dare to develop, play hard to succeed, stay ready to move ahead”

BRIEF INTRODUCTION

JMR Brass Industries is a privately owned corporation with ISO 9001:2015 certification. Each member of our team brings a wealth of knowledge and experience to the table. As a result, JMR is able to treat its customers with respect and deliver the friendly, reliable, timely service that they have come to expect and deserve.

There are thousands of brass products available in our warehouse. You will find our Products in everything from Petrochemical and Chemical Industries, Energy & Power Generation Plant, Railway & Automobile Industry, Electricity Generation Plant, Oil, Gas & Water Treatment Plant, Agriculture & Irrigation Industry, Plumbing & Construction Industry, HVAC Industry to Appliances.

Our goal is to be a single source for all of our customers brass needs. We carry a large inventory of a wide range of Fasteners, Fittings & Valves, so that our customers do not have to rely on any other sources. In addition to the products that we offer, we can source non-standard products for our customers. Along with machining, we also provide general welding, brazing, sub-assemblies and complete second operations.

OUR COMPANY TIMELINE

1994

- We started our journey from MS components manufacturing. We were doing job work of other companies. And gradually we gained experience.

2006

- We jumped into the manufacturing of Brass Components and dared to search our own customers within local market rather to doing job work for others.

2012

- Added new products in our products range

2013

- Started to export world wide

2018

- Certified our system with ISO certification

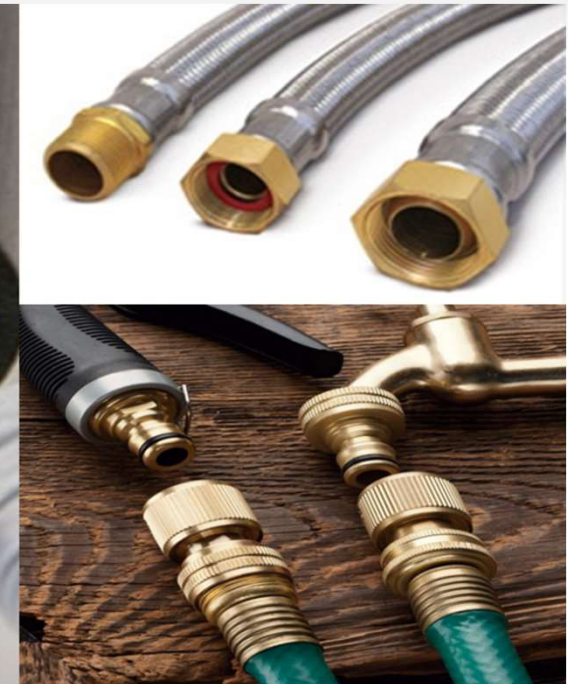

2025

- We are estimating our sales to be crossed over USD 50 Million

MATERIAL

Material we used is tested under the guidance of our technical team. We also provide MTC as per customers requirements. We use Extrusion & Casting material in order to suit the customers requirements. Our Brass Components are available in any material grade as are demanded by clients. We have well established infrastructure in order to handle, process & store the material.

Material grade we offer for Brass is;

Brass IS-319 Free Cutting

CA360 Brass for Bar stock fittings

CA377 Brass for forged fittings

Lead Free, DZR, Bronze, etc.

Any special customized grade.

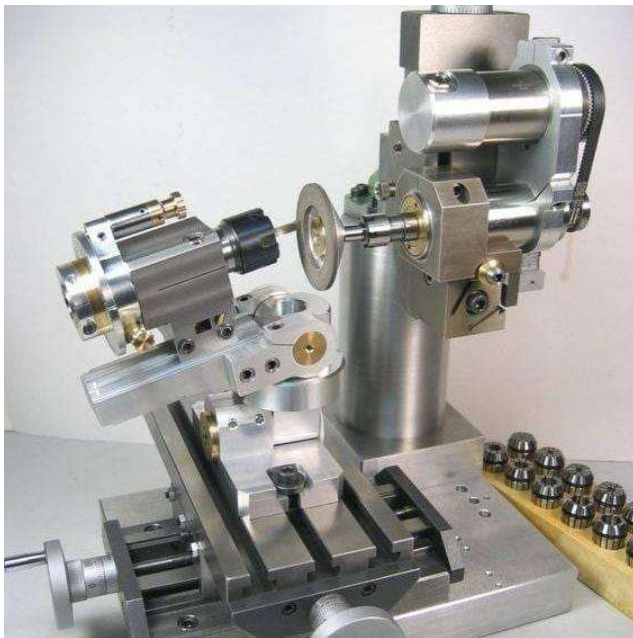

Threads : NPTF, BSP or any other customized threads

Finish : Natural Brass, Nickel Plated or
any special platings as per customer requirement.

INFRASTRUCTURE

We have established a state-of-the-art infrastructure that is well-segmented into various divisions in order to ensure hassle-free working. With having many different manufacturing facilities Segregated on the basis of items & area of operation, each department is facilitated with apt facilities, including modern tools and machines. Our infrastructure has not only enabled the production of quality range, but has also helped us to strengthen our position in the global market.

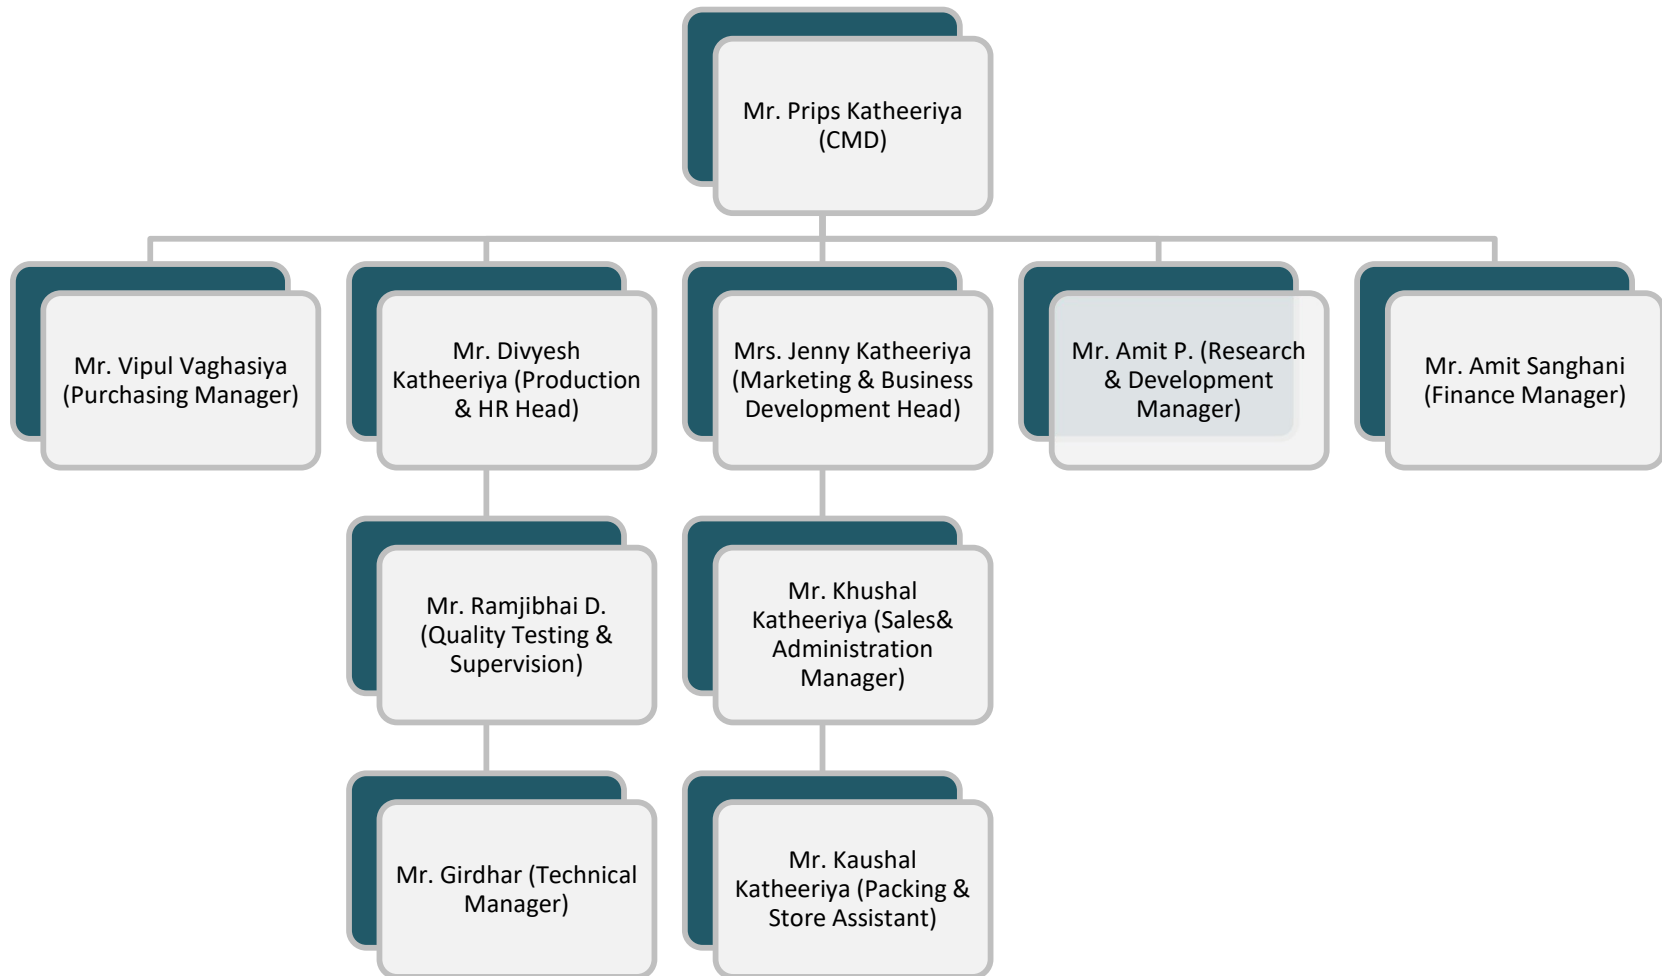

A HARD-WORKING TEAM BEHIND A SUCCESSFUL BRAND

MEET OUR TEAM

Our manufacturers are specialized in O.E.M. specialty screw machine products, die casting products, CNC machined products, forging products and custom manufacturing of any print or sample of brass component. So if you are looking for standard or hard to get components, special O.E.M. fittings, or a new custom design screw machine product, give JMR a call. Our friendly and courteous staff will put you at ease, and help you to find exactly what you are looking for.

INSPECTION AND QUALITY

By quality, we meant flawless supply of products. What is changed over the years is the number of products we offer and the ways we get those products into the hands of our customers. As we have expanded our offering to different styles and sizes, we are also projecting to grow our distribution network to meet the demands of our customers. Our key quality principals are responsiveness, outstanding service levels in meeting the needs of our customers, manufacturing to the highest standards, meeting international specifications, long-lasting service of design and durability of each component even in corrosive and abusive environments. To prove our superior quality, we back up every product with product traceability.

Our years of experience and technical expertise go a long way toward helping you choose the right fittings for your applications. That includes working with your design engineers to develop special fittings and altered standards to meet specific requirements.

JMR is the single source for all of your brass components requirements. Whether you have an emergency or an ongoing need, give us a call. We deliver the fittings you want, along with the quality, service and competitive price you deserve.

We have quality control department, which ensures that each product manufactured as exactly to the print and each process are controlled and the quality of the parts maintained throughout the entire process. We follow rigorous controls like Material control, Process control, Machining and Dimensional control, Assembly line quality control and Leakage / Pressure testing along with supplementary tests to ensure that our range is free from all kinds of defects. Due to our ethical business policies, we have been able to serve our esteemed clients, located across the globe. We provide inspection reports to our customers, if required.

PACKAGING

Our flexible assembly, packaging and shipping systems allows us to meet virtually any requirement, including parts combined in a "kit" for specific applications, custom labelling, Bar coding and customized packaging. We offer Export worthy customized packaging for Sea as well as for Air shipments. Our logistics department ensures that the products are delivered to the clients as per their demands, within the stipulated time frame. A wide range of option for packaging material like Customized Poly-bags & kit packing, Bar coding, Corrugated Boxes, Wooden Cases, Pallet Packing suitable for global requirements.
