

PAPER / PLASTIC / OCC CARTONS MANUAL VERTICAL BALING TECHNOLOGY

A MACHINE FOR TODAY'S STANDARD

OCC Carton Bale

Paper / Plastic / OCC Cartons Manual Vertical Baling Technology

The 'FABTEX' make Paper, Cardboard baling press is designed to bale up to 450kg, which can be compressed up to 1000mm. This important process in recycling resolves the problem of space and efficiency for most of the users. The volume reduction is approximately 10:1, this will mean reduced waste storage area and savings on transportation and labor costs. This machine mainly focuses on reliability, superior press force, and simple mechanism, maintenance free and safe functional working environment for the operator. This type of baling press is classic style, electrical button operation and safety chain lock.

This hydraulic driven vertical baler are suitable for small recycling facility, drug stores, departmental stores, grocery stores, printing facility, carton manufacturing units. With ease of operation the machine is carefully designed to meet all safety standards with semi-automatic bale ejection option across all models.

APPLICATIONS:

- Aluminium Cans,
- OCC Cartons,
- Paper,
- Pet Bottle,
- Dried Leafs,
- Soft Plastics,
- Foam,
- Garbage,
- Fibers.

MODEL	BALE SIZE			BALE WEIGHT (kgs)	PRODUCTION (bales/hr)	MOTOR POWER (hp)	OVERALL SIZE (feet)
	Length (mm)	Width (mm)	Height (mm)				
CB - 20	700	500	400	Upto 40	up to 2	5	6' x 3' x 9'
CB - 30	900	600	400	Upto 100	up to 3	7.5	6' x 4' x 10'
CB - 40	1100	700	400	Upto 160	up to 3	10	6' x 4' x 10'
CB - 50	1500	700	600	Upto 250	up to 3	10	7' x 4' x 10'
CB - 60	1800	1000	600	Upto 350	up to 4	15	8' x 5' x 12'

SPECIAL FEATURES:

- Customizable machine capacities(5t - 100t)
- Single Cylinder System
- Door locking Safety System

ADD-ON FEATURES:

- Semi-Automatic ejection system,
- Wide feed opening,
- No special foundation is required,
- Low space requirement,
- 180 deg Safety System,
- Optional Sliding Door.

HYDRAULICS:

- Hydraulic pumps with very low noise level.
- Leakage-free hydraulic pipe with O-ring.
- Indigenous compact design of the hydraulic control blocks offers a reliable function.
- 3 level safety interlocks for motor and pump.

Wide Feed Opening:

Chain for Ejection:

Bale Tying:
