We Provide The Future

Not for quantity, Work for quality

“ Sustainability

Global Trading continues its activities by continuing its growth by 60% in 2018 with the contribution of its work on the basis of technology, quality and social benefit by combining the corporate culture it has built on the basis of sustainability with its strong financial structure.

”

Our Policy

1 Customer

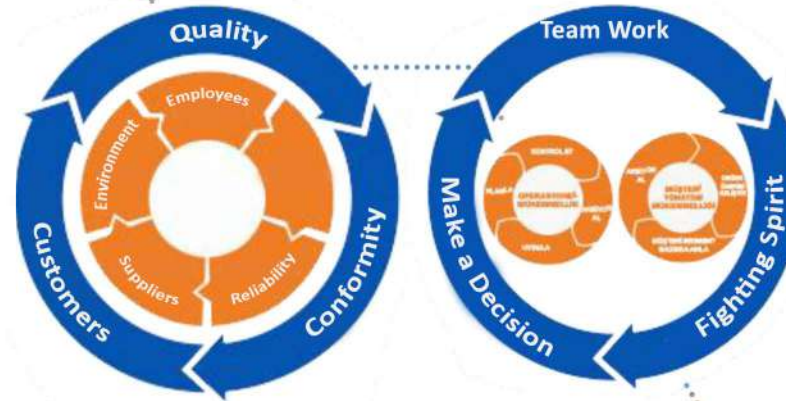

- We Are Customer Focused
- We become the customer's first choice

2 Quality

We provide high quality products and perfect service by ensuring environmental and occupational health and safety conditions..

3 Harmony

We act in accordance with all laws and social rules. We manage our business with fairness and transparency.

Our Principles

1 Spirit of Fighting

We set high goals and work with enthusiasm and enthusiasm to achieve our goals.

2 To Decide

We carefully examine all products and processes, and make our decisions based on concrete facts.

3 Team Work

We carry out all our work with cooperation and mutual understanding.

INNOVATIVE SOLUTIONS

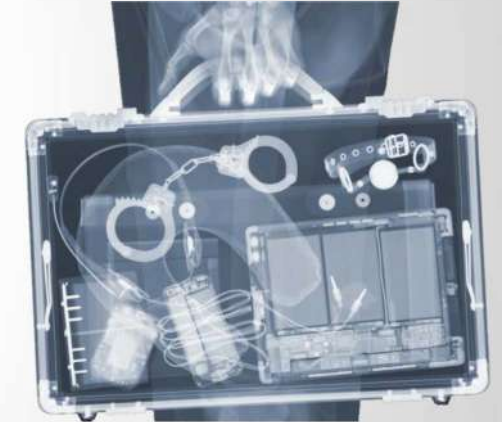

PG-5030A

Thanks to its small tunnel dimensions, bond bags, packages, laptop bags, etc. it is possible to view the items easily.

PG-6040+

Thanks to its medium-sized tunnel dimensions, bond bags, packages, medium-sized passenger suitcases, cargo and handbags, etc. it is possible to view the items easily.

PG-9000XP

The PowerGuard high-sensitivity walkthrough metal detector shows the position of the threatening object on the person passing through the independent LED light bars lined up along the door.

INNOVATIVE SOLUTIONS

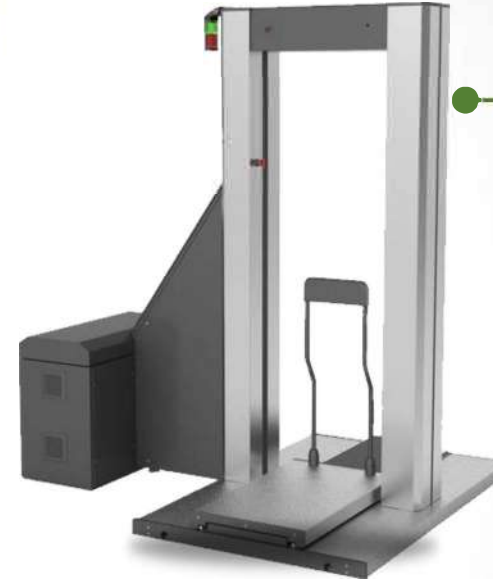

TRUCK SCANNER SYSTEM

With its unique dynamic 3D imaging technology, the DVP system is a high performance imaging device to quickly obtain stereoscopic scanning images during container / cargo scanning.

INNOVATIVE SOLUTIONS

INNOVATIVE SOLUTIONLER

The most widely used radio technology in wireless communication all over the world, with its wide coverage area, high data capabilities and economical solutions.

It has been introduced as the latest wireless communication technology by ETSI (European Standards Institute). It is a promising technology especially for intensive data communication such as video and pictures.

Systems that include the integration of objects into daily life by communicating with each other and with their environment, and using the internet's powerful data hearing, collection, transmission, analysis and distribution ability.

INNOVATIVE SOLUTIONS

IOT SOLUTIONS

Industrial Internet of Things (IoT) framework; It is a core component of both Industry 4.0 (© Germany!) and Smart Planet (© IBM) visions. Although more and more different configurations are proposed in this roof structure every day; The following three basic properties should be questioned for every IoT "Object":

Can it measure and control?

How smart are you?

What are connectivity skills?

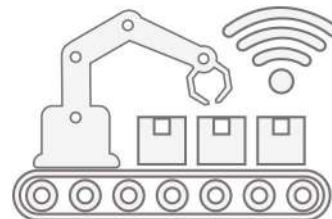

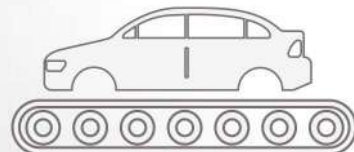

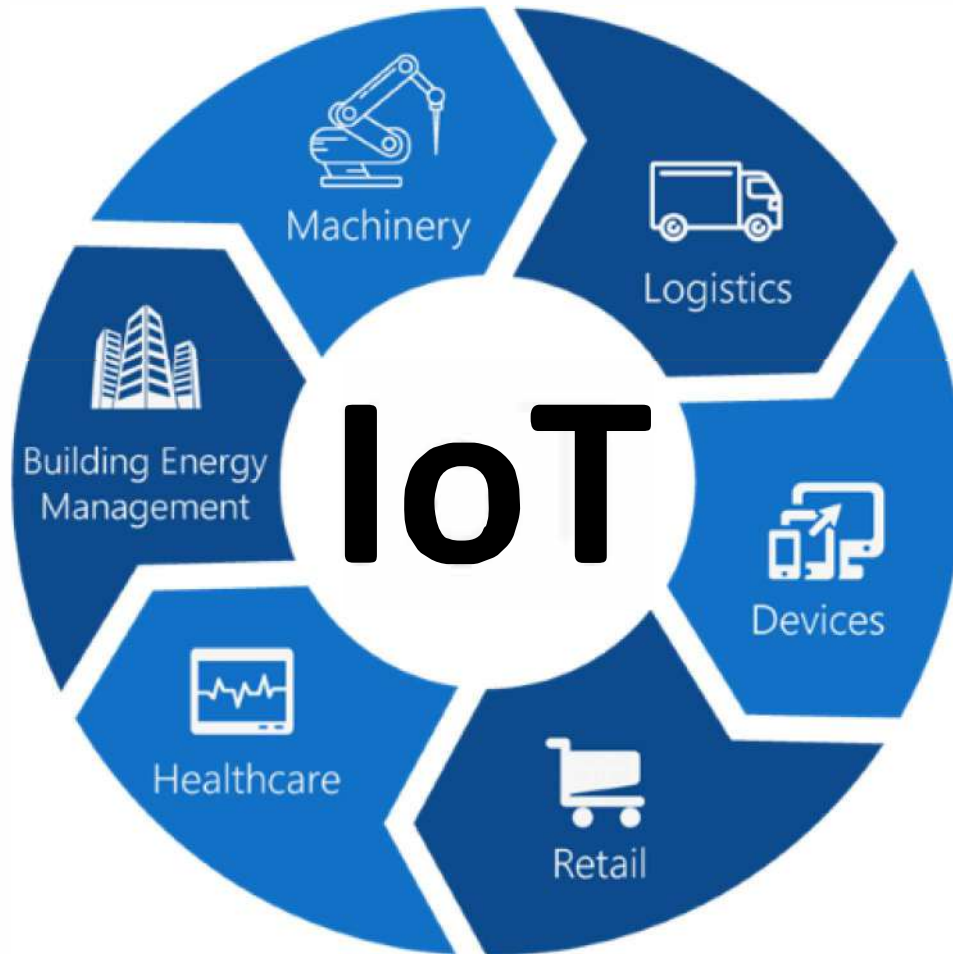

IOT SOLUTIONS

An industrial IOT system consists of: Intelligent entities that can detect, transmit and store information about themselves. That is, applications, controllers, sensors and security components.

Data communications infrastructure, such as the cloud;

Analytics and applications and people that generate business insight from raw data.
