Vision

To be the most preferred source for material handling & turnkey solutions.

Mission

- To exceed customer satisfaction towards customer delight.
- To treat all our associates with dignity & respect.

Values

Integrity: Honoring the commitments made to our customers and vendors in our daily activities. Creating an environment where personal responsibility is achieved in all aspects of the business.

Customer Satisfaction: Being proactive, innovative and flexible in creating processes and plans to meet or exceed customer expectations. Understanding our customers and delivering it continuously.

Teamwork: Our competitive atmosphere is generated by our people. Empowering our staff with a learning process where ideas and knowledge is shared and executed. Welcoming changes, taking pride in everything we do and delivering best practices to all areas of Gadiya Industries.

Quality: Strive for continuous quality improvements with everything we produce. We are committed to providing superior service with the highest quality.

Partnering: Integrating our manufacturing practices to meet our customer's demands in a timely, cost efficient manner which is mutually beneficial. Constant communication and planning is vital in creating the true business partnerships that we develop.

Company Profile

Established in the year 1986, we are a professionally managed company that believes in sustainable and enjoyable long-term relationships with all its key stakeholders--including employees, customers and suppliers.

Company's in plant manufacturing activity comprises of well equipped Steel Melting Foundry and Machine Shop with suitable infrastructure to manufacture and test its products.

Gadiya Industries is engaged in manufacturing a range of products which includes **Rotary Airlock, Slide gates, Screw Conveyors, Machined Components and Alloy Steel Castings**. We offer superior quality products, which are reliable, efficient and have a long service life.

We are now geared up to meet the challenges of Process Industry in India and Global Market.

Infrastructure

Company's in plant manufacturing activity comprises of well-equipped Machine shop with suitable infrastructure to manufacture and test its products. We have a total of 15000 Sq feet factory area adjacent to Pune-Ahmednagar highway on main tar road and are flexible to manufacture any given profile in the shortest lead time by providing end-to end cost effective solutions. We also carry ample inventories for our standard products.

Our in house design & R&D are always at your service for changes suggestions and innovations.

Clients

Gadiya Industries has a long term relations with various clients from cement, steel and power sector for more than two decades. We have been branded as the most preferred supplier among the clients for the high quality products we cater.

Promoter's profile

Mr. Kumar Gadiya Metallurgical Engineer & MBA from Pune University, since then (from more than last 3 decades) in this activity having dealt with multi prolific customers and products at local, national and global level. The exposure of same is being added constantly in day to day techno commercial activities.

Akshay A. Gadiya Production Engineer from College of Engineering, Pune & MBA from Pune University, since then joined this organization for further development and refinement in the ongoing systems which has contributed substantially in sound R&D, design and production activities.

Products Profile

Rotary Air Lock Valves

Our company is engaged in offering a comprehensive range of Rotary Air Lock Valves.

We introduce ourselves as a leading manufacturer of Rotary Airlock Valve fabricated under the close surveillance of our expert professionals; these Rotary Airlock Valves deliver precise end results.

We are privileged in informing that we customize our collection as per the specification of our valued clients.

Available size: 100mm to 1100mm in square and round openings including high temperature operational environment for handling fine dust to coarse dust in various materials.

Features:

- Excellent strength
- Supreme durability
- Long lasting
- Highly efficient

Slide Gates

Our expertise lies in designing and developing an outstanding assortment of **Slide gate valve**. Under this range, we offer **Manual slide gate valve, chain wheel slide, motorized slide gate valve, pneumatic slide gate valve and hydraulic slide gate valve, gate valve** with provisions for step openings. Manufactured using high-grade basic material and latest methodology, these products conform to the defined parameters of the industry

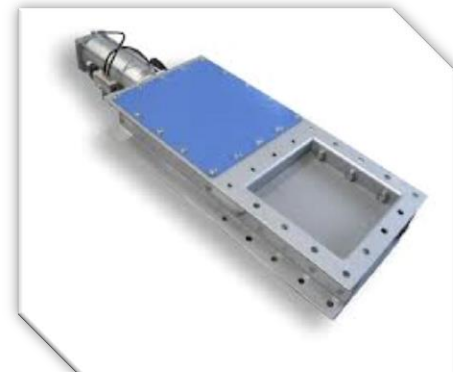

Features:

- Longer serviceability
- Fine finish
- Precise performance

Available size: 100 mm round to 500 mm round in various materials.

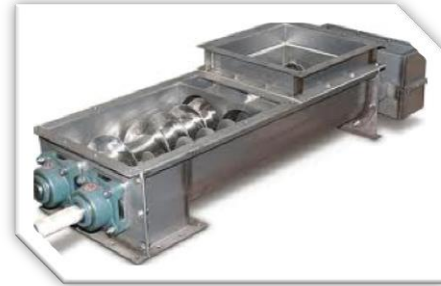

100 mm square to 1500 mm square in various materials.

These can also be customized according to the requirements of our clients

Conveyors

We bring forth impeccable **conveyors** for our valued clients. developed by making use of high-grade basic material, these offered products are in conformance with the illustrated quality parameters of the industry. Keeping in mind diversified demands of the clients, we offer these products in standard as well as customized sizes and specifications at an economical price.

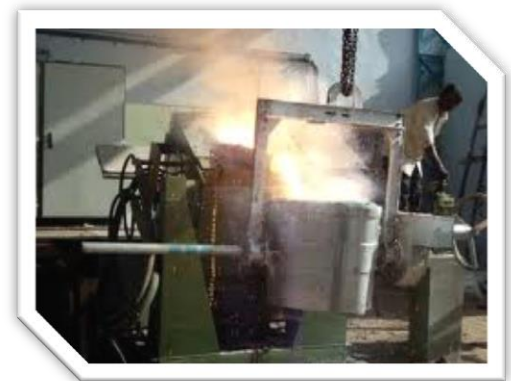

Below cited are the prominent attributes:

- Efficient performance
- Robust construction
- Smooth finish
- Longer service life

Castings

All types of castings manufactured from virgin based material. Ferrous and nonferrous castings in closed alloy composition manufactured by molding process as sand molding shell molding and machine molding. QC comprises of hardness tester chemical lab and spectrometer. Induction furnace of 400kgs steel melting capacity.

Machined components

We have a well-equipped general purpose machine shop comprising of horizontal boring machine, various types of lathe, radial drill-50 mm capacity, chain drill, tapping machine etc.

Services for heat treatment, all type of grinding, milling, Plano miller, CNC machines etc. are available at hand for committed supplies.

Light fabrication shop with transformer 400 amp, Co2 welding, light sheet bending machine, press brake and services of power press up to 200 tons capacity is also available at hand.

Quality control instruments consist of micrometer 0 to 150 mm; dial vernier 450 mm, surface plate 1 sq. mtr.

Industrial blowers

A well-equipped fabrication setup is available for heavy fabrication works. We are geared up to manufacture blowers of various mounts & units in various sizes, pressures and openings viz. round, square & rectangular according to the requirement of our valued customers. We can also design highly efficient blowers for various requirements of our clients which can improve the performance of the exhaust systems.

Considering latest technical developments, we reserve the right to modify the details given in this brochure without notice.
