Alkaione Water Features

Powerful Anti-Oxidant

Alkaione water Provides extra electrons that neutralize destructive free radicals present in our body. This carries High Negative ORP when first produced, making potential anti oxidant Higher the Negative number, greater the potential to reduce levels of Oxidation in body.

Signs Your Body is Too Acidic

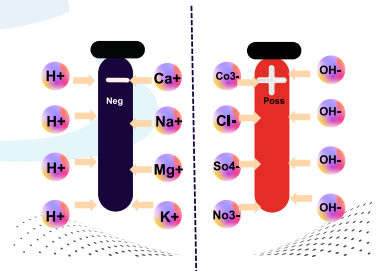

Alkalinity

Alkaione Water raises the water pH by ionizing or splitting the water molecule (H_2O resulting in ions H^+ (Hydrogen with positive electrical charge) and OH^- (Hydroxy ion with negative electric charge and separates them to give Alkaline / Acidic water.

Micro Clustered

The process of ionization reduces the size of the water cluster by two thirds, and create hexagonal shape. Similar, Hexagonal water clusters easily hydrate the cells, eliminating the toxins from the body.

Activated Minerals

Alkaione water ionizer can activate Minerals such as Calcium, Magnesium, Potassium, Sodium, Iron in elementary form. These are called as Essential elements required for human body.
