Pantoc Secret Mist

Foam cleanser for your face, body wash for your body,
shampoo for your hair, hand wash for your hands...

What about the Y-zone? Pantoc Secret Mist!

Are you washing your Y-zone with just water because you're afraid of cleansers that are too strong?
Water has a neutral pH of 7!

The Y-zone's structure means it's easily exposed to external bacteria, so it needs a more purified cleaning!

Can't I just use body wash?
Normal body washes are slightly alkaline with a pH between 8 and 11!

Each part of your body has a different pH level, so you need a cleanser tailored to that part. Especially for your Y-zone, which is more sensitive than other parts of the body!

Pantoc Secret Mist has a slightly acidic pH of 4.5!

Appropriate use of slightly acidic products helps balance a healthy Y-zone skin.

Why is Pantoc Secret Mist good?

POINT 1

Provides a clear moisturizing effect for vaginal dryness

Causes of vaginitis by age

10-20s

Increased cases of bacterial infection due to inexperienced management, a sedentary lifestyle, and frequent outdoor activities

20s-30s

Increased risk of exposure to vaginitis due to hormonal changes such as reduced immunity and childbirth

40s-60s

Increased risk of geriatric vaginitis accompanied by **"vaginal dryness"**, itching, and soreness due to a decrease in female hormones due to menopause
