

## WenZhou JiFeng Packaging Co.,Ltd

Provide the best packaging solution for your brand

#### **Company Overview**

Wenzhou Jifeng Packaging Co., Ltd. serves the packaging industry, supplying various styles of food bags: aluminum foil bags, clothing bags, plastic bags, packaging bags and other products.

We always believe that high-quality service and constantly upgrading products to adapt to new markets are what our customers really need.

Before the service, we provide real product sample for your reference.

In the service, we display various product attributes, and the freight situation will serve you intimately.

After the service, we will seriously accept the objective and fair suggestions and criticisms of the sellers, and continuously improve them.

#### Company qualification and quality assurance

Our company strictly follows Chinese national laws and regulations and industry norms, holds the "Business License" and relevant production and operation licenses issued by the industrial and commercial department, and has the qualifications of legal and compliance market entities. As a professional service provider in the field of packaging manufacturing, we have passed the quality management system certification, and fully implement the whole process of standardization control from raw material procurement, production and processing to finished product delivery to ensure product quality stability and Client Server reliability.

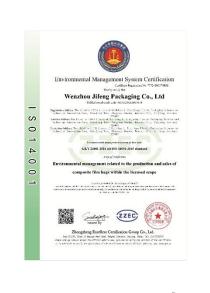

#### **Business Certification**

Our company's production base is located in the third to fifth floors of the No. 1 factory building, Xiaojiang Plastic Packaging Science and Technology Innovation Park, Xiaojiang Town, Pingyang District, Wenzhou City, Zhejiang Province. It covers a total area of 7,000 square meters and is equipped with modern standard factory buildings and intelligent production facilities. The factory area is planned scientifically and reasonably, and strictly follows the industry production specifications. It is divided into raw material storage area, production and processing area, quality inspection area, finished product packaging area and logistics distribution center to achieve efficient and coordinated operation of the whole process from raw materials to finished products.

The factory is equipped with automated production lines (such as fully automatic die-cutting machines, high-precision printing equipment, etc.), intelligent warehouse management systems and advanced environmental protection treatment facilities (such as exhaust gas purification devices, waste recycling systems) to ensure efficient production, stable quality and environmental protection requirements. At the same time, the workshop environment is strictly controlled, and through environmental management system certification and safety production standardization construction, employee safety and product hygiene standards are guaranteed.

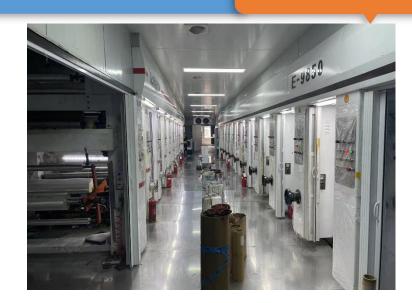

#### **Product Display**

Our company focuses on providing environmentally friendly and customized packaging solutions. Our main products are paper products and plastic packaging, covering degradable plastic bags and other products, which are widely used in food, electronics, beauty, ecommerce and other industries. Through ISO 9001 quality management system certification, we strictly control the whole production process to ensure stable quality; relying on modern factories and intelligent equipment, we support fast proofing and flexible order delivery. Adhering to the green concept, we promote recyclable and degradable materials to help customers reduce environmental costs and enhance brand value. From design to logistics, one-stop service meets diverse packaging needs.
