PRODUCT CATALOGUE
2025

A close-up photograph of a hand holding dark wooden chopsticks, poised to pick up a piece of food from a white bowl. The bowl contains sliced cucumbers and chunks of avocado. The background is slightly blurred, showing a textured surface and a green container.

PACKAGING FOR REAL CHANGE

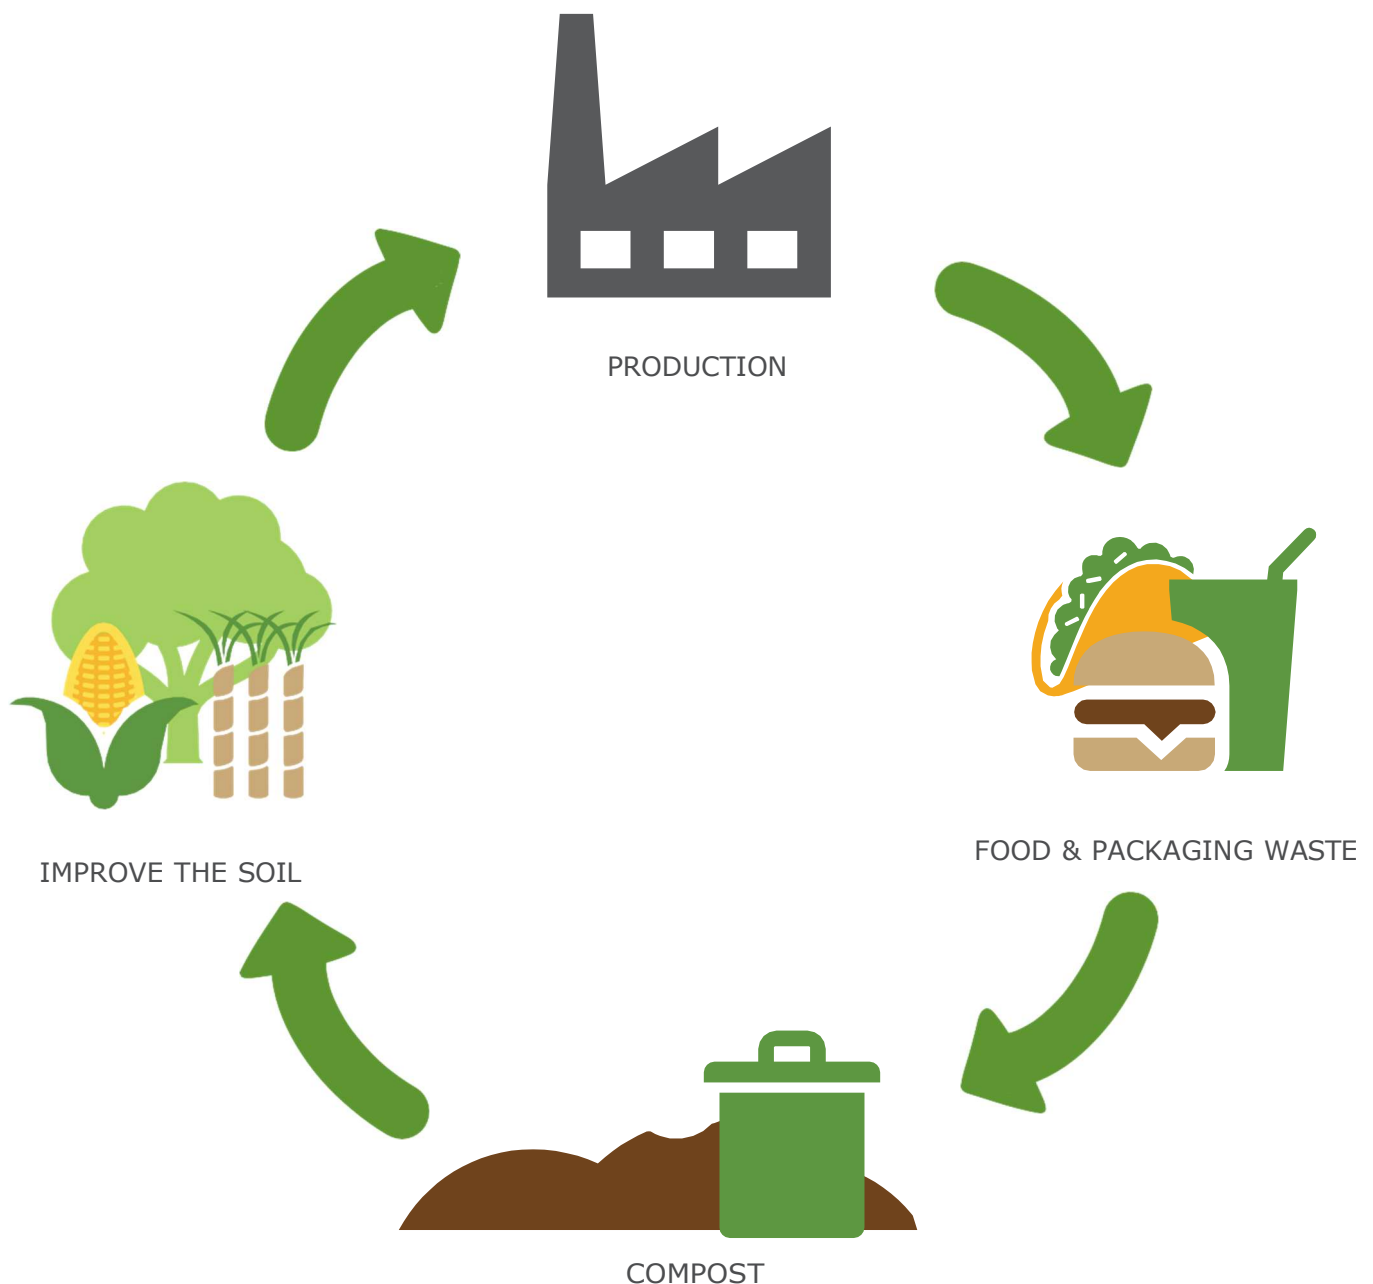

Our innovative and extensive portfolio of plant based takeaway packaging is inspired by the need to minimise our environmental footprint and deliver change for good.

The range is made from sustainable, renewable raw materials and is either compostable or recyclable – without compromising on function or quality. All items in the range are certified compostable to either Australian or international standards.

Sustainability needs to be simple, and we are committed to a world where we put waste to work. One use at a time.

Join us and make one BIG small change.

ARE YOU IN THE LOOP?

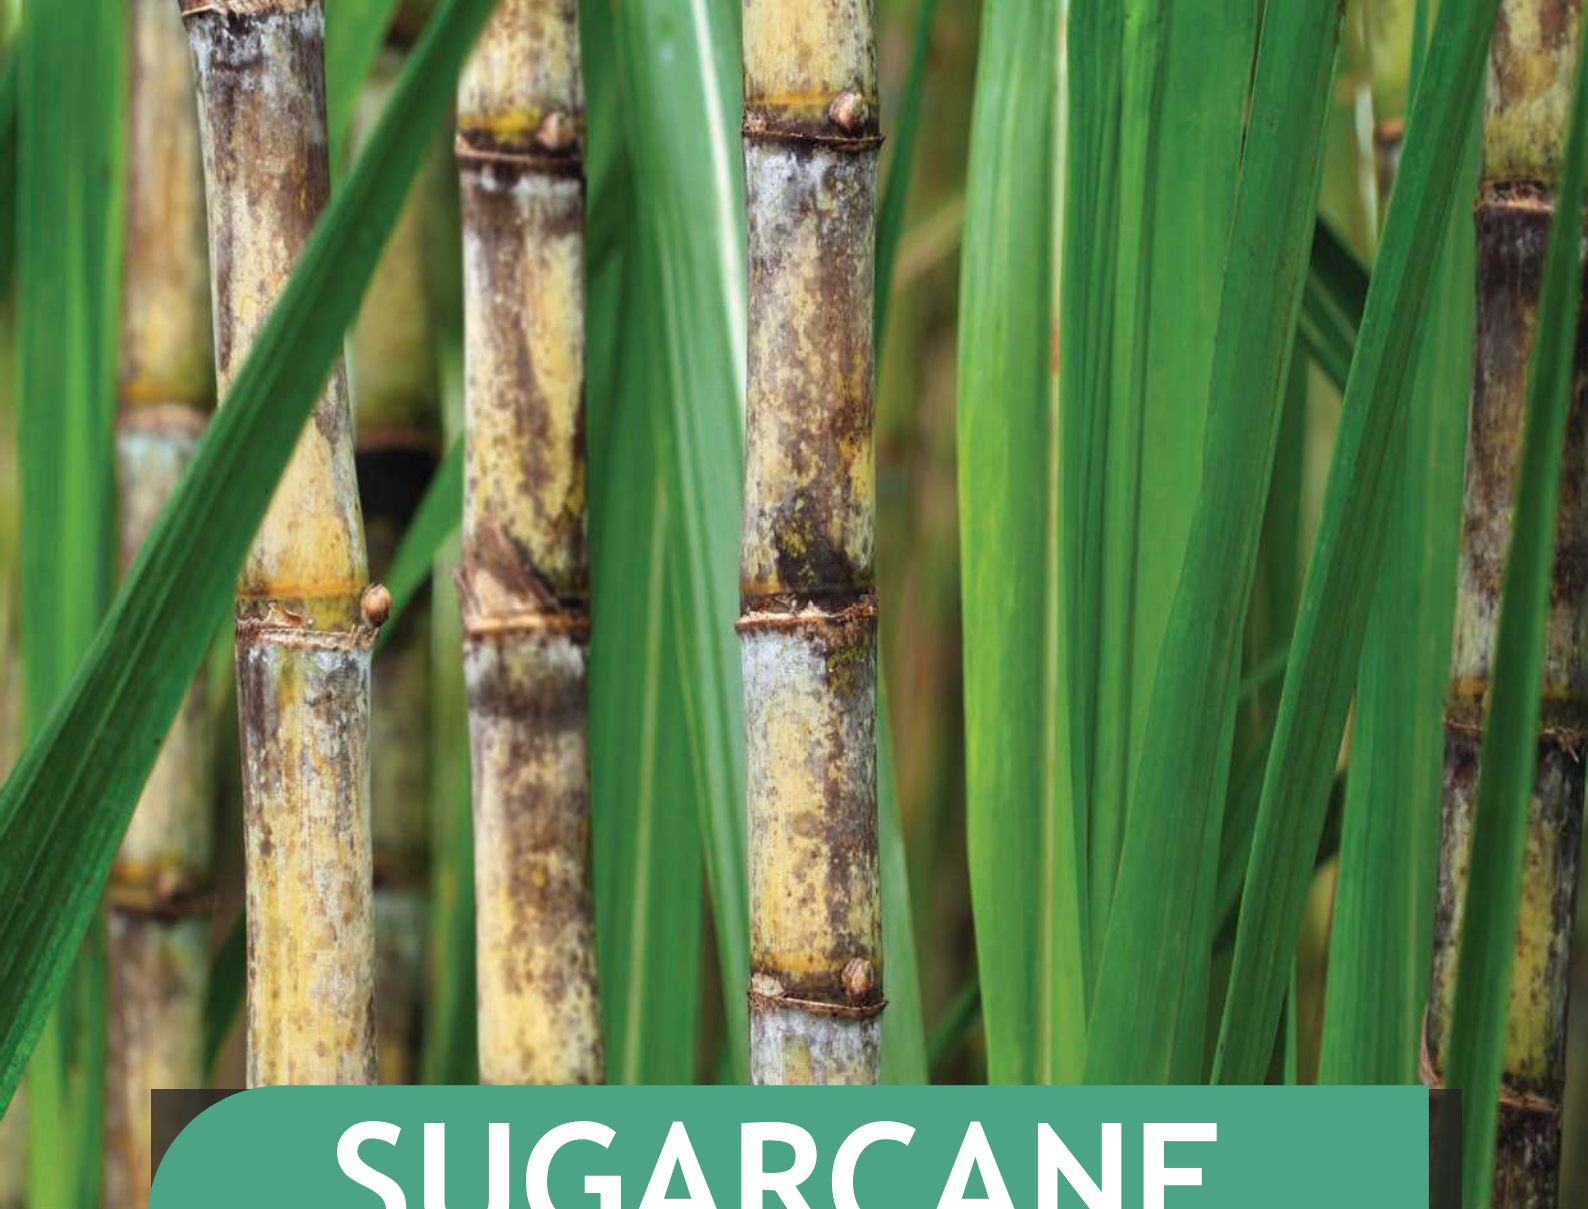

Striving for a sustainable world and delivering a circular economy means that we have to consider the real and growing impact of food soiled packaging that is not suitable for recycling. In fact, when directed to landfill, the methane gas produced as food breaks down is a very significant contributor to global greenhouse gas emissions.

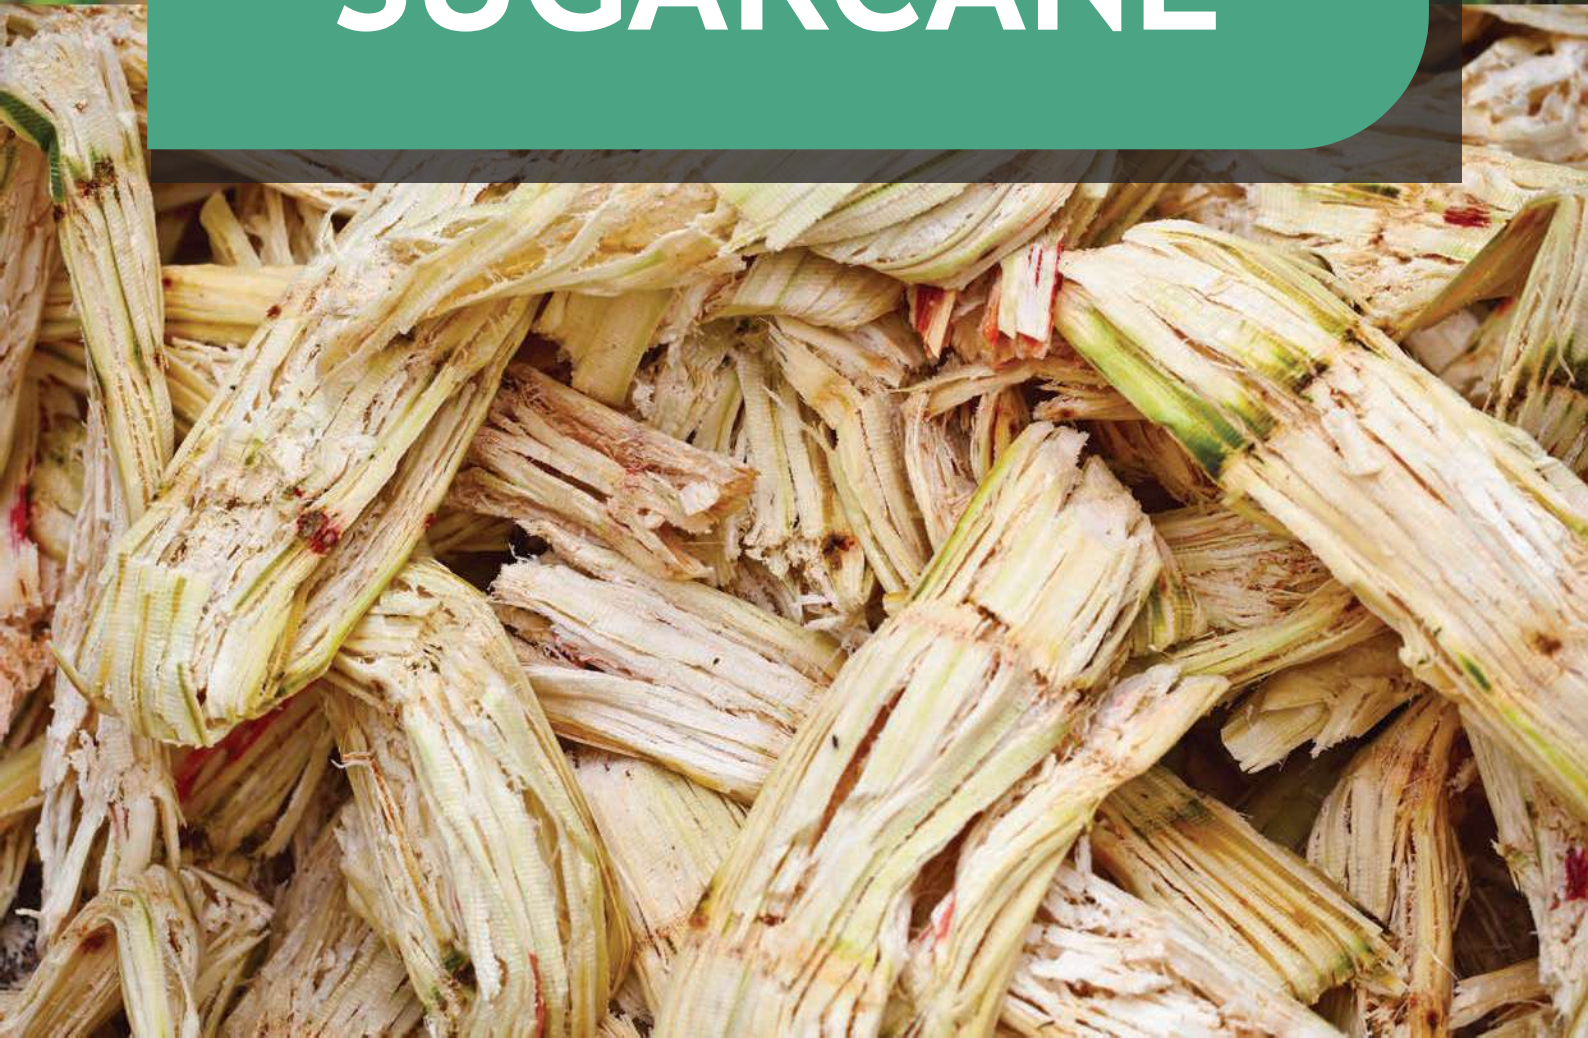

By choosing compostable packaging you can help to change this, as composting can be considered nature's circular economy - turning food scraps and compostable food soiled packaging into nutrient rich compost that can be used to improve soil diversity and support a healthier planet.

Our range of compostable packaging is made from plants and by choosing it you can play your part to support the plants of tomorrow and take-away the waste.

Join us and make one big small change.

SUGARCANE

Sugarcane (bagasse) is a by-product of making sugar. When the stalks are harvested and pressed, the remaining fibrous pulp is made into a paper-like substance called bagasse, which is then formed into a variety of products from small portion cups through to large catering trays.

This renewable and reclaimed resource is a strong alternative to traditional plastics or polystyrene.

Our complete sugarcane range is certified compostable and has the benefit of being breathable, cut and grease resistant and able to go in the microwave or oven, meaning your food stays hot and crispy.

We always recommend oven testing to ensure suitability for your operating conditions.

Performance Features

- Breathability keeps foods crisp
- Retains temperature
- Microwaveable and freezable
- Ovenable to 220°C for 20 minutes
- Hot and cold food friendly
- Grease and cut resistant
- Texture helps containers stack without sliding
- Won't melt and no liner needed - hot food can go straight in from the fryer
- Customisable - print or emboss
- Can be top sealed (subject to item shape)

Environmental Benefits

- Made with rapidly renewable resources
- Certified compostable;
EN 13432 - Commercially Compostable

SERVINGWARE

FEEDING A CROWD?

Our CATERING TRAYS, BOWLS and HALF PANS offer all the same environmental benefits as our other sugarcane products, including AS certification for both commercial and home composting.

With superior strength, these trays can be used with hot or cold foods and are freezer, microwave and ovenable to 200°C for up to 20 minutes. Lids sold separately.

SUGARCANE MEAT & PRODUCE TRAYS

Our sugarcane Meat & Produce Trays are perfect for both fridge and freezer applications and are able to be top sealed. A flexible solution for any food item you're packaging and selling.

PLA

Polylactic acid (PLA) is a natural starch derived from plants like corn, potatoes, tapioca and sugarcane that is processed to extract the starch and create a clear plastic- like film or bioplastic.

Unlike the traditional polyethylene (PE) or polyethylene terephthalate (PET) plastics, these innovative films and bioplastics are annually renewable and naturally compostable in a commercial facility.

Commercial compost facilities have the capacity to maintain ideal composting conditions and sustained heat and moisture needed for PLA to break down entirely with the appropriate soil bacteria, yeast, and fungi.

Performance Features

- Clear PLA offers great visibility when displaying food to grab 'n' go
- Cold food friendly
- Customisable (specific items)

Environmental Benefits

- Made with rapidly renewable resources
- Plant based plastic
- Reduces use of fossil fuel based plastics
- Certified compostable
EN 13432 - Commercially Compostable

PLA HOT CUPS

Grasp the Moment!

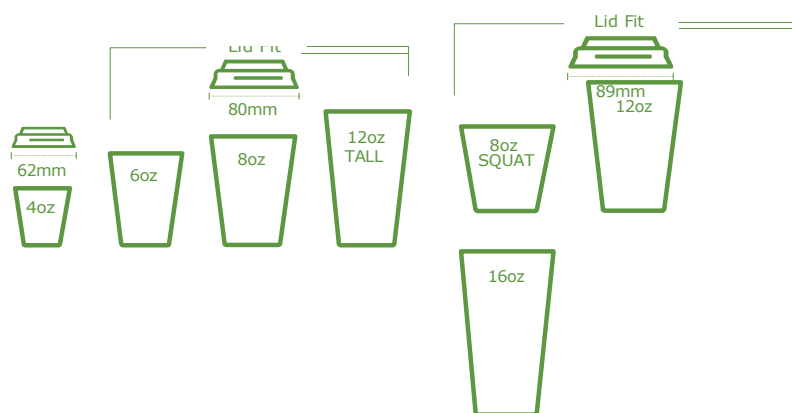

Introducing a new range of commercially compostable PLA paper hot cups in 2 designs.

The 'Grasp the Moment' range of four distinct retro illustrations features environmental messaging with new designs released every few months. Launching with an 8oz, 8oz squat, 12oz and 16oz cup, the range will grow to include a 6oz and 12oz tall in early 2022 with the release of the next 4 designs.

Greenstripe hot cups in brown and white include all of the sizes above plus the addition of a 4oz hot cup.

SIMPLE LID FITS

Our 'Grasp the Moment' range of hot cups and lids have been designed to be perfect partners, with simplified lid fits across all sizes and a choice of lid options covering all needs.

PLA HOT CUPS - GRASP THE MOMENT

IT'S RANDOM!

Grasp the Moment designs are randomly mixed, and you'll find up to 4 designs in any one carton. We can't guarantee which designs, or exactly how many of each you'll receive. Specific cup designs cannot be individually ordered.

CALLING OUT COMPOSTABILITY

How many people struggle to choose the right bin?

With a clear contrasting stripe on the back of the cups, our compostability message is aimed to make sustainability simple.

PLA HOT CUPS - GREENSTRIPE

Commercially compostable Greenstripe designs have smooth sides with subtle branding, enabling easy branding with the cafe's logo. These stock designs may be purchased by the carton.

Complete customisation and design services are also available. Minimum order quantity of 50,000 units will apply.

PLA COLD CUPS - GREENSTRIPE

With the same design as our hot cups, we've introduced clear PLA cold cups in 5 sizes, with a range of lid options to fit, including flat, domed or sipper lids.

Commercially compostable, these cold cups clearly communicate your environmental commitment.

As part of our commitment to sustainability, everything used to manufacture our products is assessed for its impact on the environment. Our products made from paper and paperboard and nothing else, are readily recyclable or commercially compostable, so you can be confident you're making a responsible choice.

From our takeaway bags to endura trays, to our wooden cutlery and napkins – our extensive range has compostable packaging solutions for all your foodservice needs.
