

ELIM Agri Export Trading - Coffee Profile

1. Guji Area Profile

Guji is a renowned coffee-growing region located in the southern part of Ethiopia, within the Oromia Region. It is part of the larger Oromia coffee belt but has established a distinct identity due to the unique flavor profiles of its coffees and its diverse microclimates. The region is named after the Guji tribe, which has a rich cultural heritage closely tied to coffee farming. Guji Uruga is located approximately 432 kilometers (268 miles) south of Addis Ababa, Ethiopia's capital city.

Geography and Climate

- **Location:** Situated in the highlands of southern Ethiopia, Guji is bordered by Sidama and Gedeo (Yirgacheffe) to the north and Borena to the south.

Product Specification

Type: - Grade 1

Plant Species: Arabica

Processing type: - Natural and Washed

Growing Altitude: - 1900-2800masl

Flavor/ Character: - Natural (Strong citric acidity, stone fruits, sweet chocolate and floral, jasmine, bergamot and spicy.)

Washed (Citrus, Floral, and stone fruit and also bright vibrant testing notes and clean, silky mouth feel) Variety: Ethiopia Heirloom Varieties

Cupping Score: 85- 90

2. Yirgacheffe Area Profile

Yirgacheffe is one of Ethiopia's most celebrated coffee-growing regions, located in the southern part of the country within the Gedeo Zone of the Southern Nations, Nationalities, and Peoples' Region (SNNPR). Renowned for producing exceptional washed coffees, Yirgacheffe has become synonymous with high-quality, specialty-grade coffee. Its distinct flavor profiles and ideal growing conditions make it a cornerstone of Ethiopia's coffee export market.

Geography and Climate

Yirgacheffe is approximately 400 kilometers (249 miles) south of Addis Ababa, Ethiopia's capital city. The region's well-maintained roads ensure the smooth transport of coffee to key export hubs, preserving its premium quality and freshness.

Product Specification

Type: - Grade 1

Plant Species: Arabica

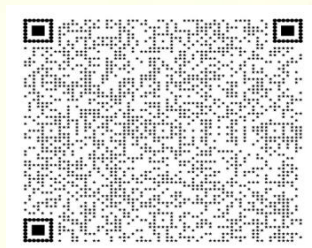

Processing type: - Natural and Washed

Growing Altitude: - 1700-2200 masl.

Flavor/ Character:- Natural type (Greyish, Clean, Fruity-toned, Mild acidity with Sweet, Juicy Flavor)

Washed Type (Greenish, Fruity, Floral, Sweet, Good Creamy Flavor)

Variety: Ethiopia Heirloom Varieties Cupping Score: 85- 90

3. Djimma Area Profile

Djimma is one of Ethiopia's prominent coffee-growing regions, located in the southwestern part of the country within the Oromia Region. Known for producing high-quality natural coffee, Djimma is a significant contributor to Ethiopia's coffee export market. Djimma is approximately 350 kilometers (217 miles) southwest of Addis Ababa, Ethiopia's capital city, while the Agaro area, a key coffee-producing sub-region within Djimma, is about 390 kilometers (242 miles) from Addis Ababa. The well-connected roads facilitate the efficient transport of coffee to export hubs.

Geography and Climate

- **Location:**

Djimma is situated in the lush highlands of southwestern Ethiopia, benefiting from fertile soils and abundant rainfall.

Product Specification

Type: - Grade 4

Plant Species: Arabica

Processing type: - Natural

Growing Altitude: - 1300-2100 masl.

Flavor/ Character:- Light acidity, full bodied with a fruity straw flavor

Variety: Ethiopia Heirloom Varieties (V-74112)

Cupping Score: 47- 62

4. Harar Area Profile

Harar is one of Ethiopia's most historic and renowned coffee-growing regions, located in the eastern part of the country within the Harari Regional State and parts of Oromia. Known for producing distinctively flavored natural (sun-dried) coffees, Harar is celebrated for its heritage as one of the oldest coffee cultivation areas in the world. Its unique flavor profiles and traditional processing methods make Harar coffee a prized choice in the global coffee market.

Geography and Climate

Harar is approximately 525 kilometers (326 miles) east of Addis Ababa, Ethiopia's capital city. Despite the longer distance, the region's strategic location along established trade routes ensures efficient transport of its coffee to export hubs, maintaining its exceptional quality and historical reputation.

Product Specification

Type: - Grade 4

Plant Species: Arabica

Processing type: - Natural

Growing Altitude: - 1300-2700 masl.

Flavor/ Character: - Natural type (Green tea, rose, apples, soft fruit, mocha, molasses, Browne sugar, caramel, slightly dry finishing)
