编织网

Woven Wire Mesh

编织网 Woven Wire Mesh/Wire Cloth

DZ 可以生产各种规格的编织网，目数从零点几目到用于精密过滤的几目甚至几千目，适用于各种编织方法和材质以及应用领域。DZ 可为您加工裁片。裁条。多层焊点儿网片，圆片，圆环，超号丝编织网，并可以根据客户要求加工定做，数量不限。

We manufacture wire cloth in all meshes from larger opening to fine mesh filter cloth. We produce all of weave types with various materials your applications required. DZ is happy to supply small or larger quantity in roll stock, cut-to-size, slit rolls, aggregate screens, discs, circles, heavy woven mesh or custom weaves. Most metals and meshes are in stock.

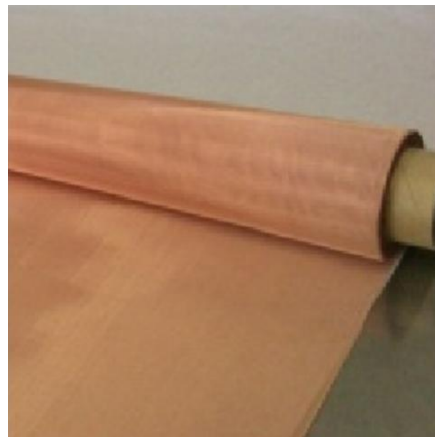

DZ would give you the right wire cloth for industrial plants and manufacturing operations, power generation, filter manufactures, automobile manufactures and assembly etc.

Available Materials (材质):

D: wire diameter in mm.

W: mesh opening, distance in mm between two adjacent wires.

S%: working surface, approximate percentage of the total surface of the openings of a mesh.

Mesh(目数): $25.4/(W+D)$ $S=100w^2/(W+D^2)$ D:丝径 (mm) W:孔径 (mm) S%:筛分率

Mesh width: 0.003 to 10.70mm(other dimensions on inquiry)

Roll width: up to 6.0mm

Scope: standard roll, or customer's requirement

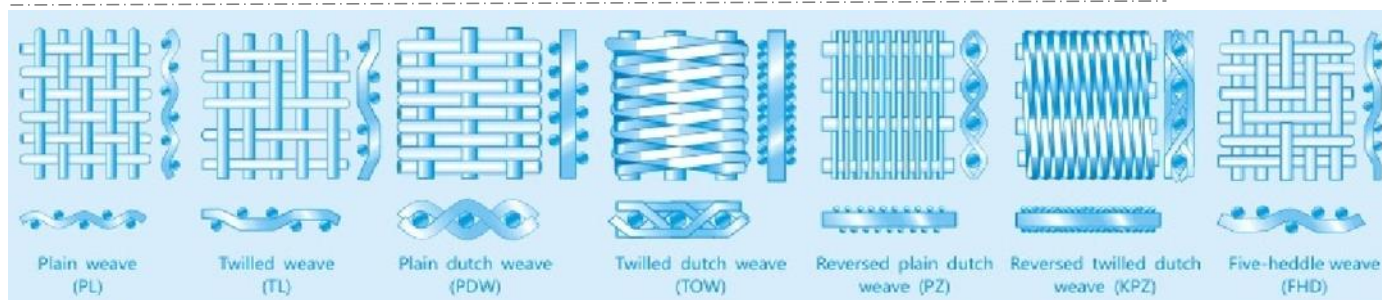

Kinds of weaving:

Plain or Twilled weave 平织/斜织

Plain or Twilled Dutch weave 平织/斜织席型网

Five heddle weave 五宗编织

Reverse Plain or Twilled Dutch weave 反差平织或斜织席型网

不锈钢编织网 Stainless Steel Woven Wire Mesh/ Cloth

Stainless steel woven wire mesh offer flat surface, firm structure and good integrity. It is widely used in industry, agriculture, construction, breeding, transport, mining exploitation, transport, entertainment facilities and other public places.

>>Materials:

Stainless steel woven wire meshes are generally made of stainless steel Type 302, 304, 304L, 316, 316L, 321 and 430 etc. Many different grades of stainless are used in wire cloth. T304 is the most common one, but others are also used in specific applications

>>Weaving Types:

Plain or Twilled Weave, Plain or Twilled Dutch Weave, Five heddle Weave, Reverse Plain or Twilled Dutch Weave

>>Features

Stainless steel wire mesh have the features of wear resistance, heat-resisting, acid-resisting, alkali resisting, durable structure, and corrosion resistance.

Meantime stainless steel woven mesh also have high temperature resistance, good electric conductivity and washing resistance.

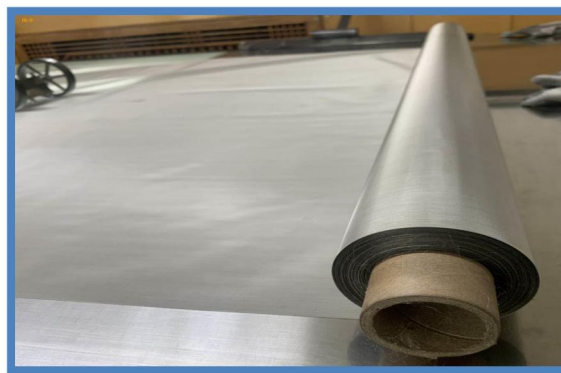

>>Application:

Stainless steel woven wire mesh is widely used in mining, petroleum, chemical industry, food industry , pharmaceutical industry and sifting and screening mesh in chemical and chemical fiber industry.

>>Specifications of Stainless Steel Woven Wire Mesh

Roll Width: 36", 40", 48", 60"

Roll Length: 25Ft, 50Ft and 100Ft

>>Quality Control 质量控制

Inspection standard of the wire 网线检验标准

We check the wire according to the national standard (GB5330-85) and our enterprise regulation about raw material defects and relative solution.

Inspection standard of the mesh 成品检验标准

We check quality of end products according to China National Standard GB/T17492-1998, equivalent ISO9044-1990, and our standard.

The major checking items of wire mesh 主要检验项目

First, we check the basic data: wire diameter, mesh counts, roll width and roll length

Secondly, the surface condition: opening, color, flat or not and defects.

Thirdly, the edge of wire mesh should be neat and without defects.

Checking standard if metal reed 织 检验

The steel reed should be flat and clean, with correct wire going, the inside height, inside length and thickness should be correct.

General Packing 包装方式

Stainless steel woven wire mesh is rolled around paper tube first, moisture-proof paper outside or plastic fabrics. Customized packing is available.

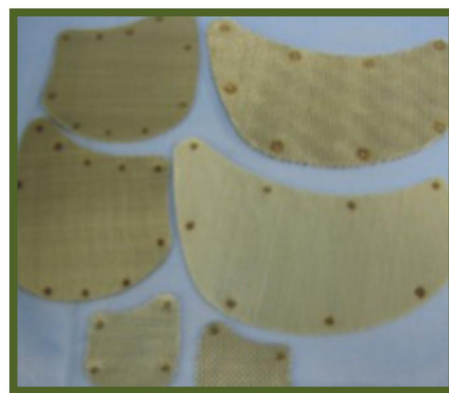

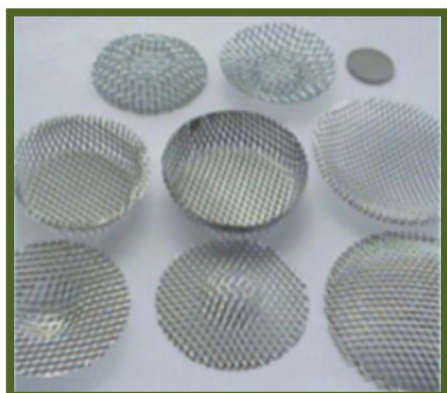

In this catalogue we list industry standard specifications. However, should your application require additional custom fabrication, filter mesh is able to provide, or set up value-added services to take our product from standard off-the-shelf to custom fabricated product specific to your installation needs

- * Shearing or cutting
- * Painting or powder coating
- * Rolling
- * Anodizing
- * Slitting
- * welding
- * Braking or forming
- * Soldering
- * Hooking
- * Galvanizing
- * Punching or grommeting
