

KRAFT PAPER ROLLS

Kraft paper is a strong, durable, and biodegradable packaging material made from wood pulp using the kraft process. Its high tear resistance and natural finish make it ideal for industrial wrapping, surface protection, and eco-friendly packaging.

It offers excellent printability for branding, labeling, and custom designs. Widely used across logistics, food, agriculture, and retail industries, it balances performance with sustainability and cost-effectiveness.

Specifications

- GSM : 40 to 200 GSM
- Width : 300mm to 1800mm
- Length : As per requirement
- Core : 3" - 6"
- Color : Natural Brown / White
- Finish : Smooth / Ribbed / Glazed
- Moisture : <8%
- Packaging : Stretch / HDPE wrapped

Variants

- Virgin Kraft Paper – Strong, smooth surface, ideal for premium packaging.
- Recycled Kraft Paper – Cost-effective and eco-conscious option.
- Bleached Kraft Paper – White finish for a clean, high-end look.
- Natural Brown Kraft Paper – Popular for rustic and organic branding.

Features

- High tensile and burst strength
- Biodegradable & recyclable
- Food-safe options available
- Custom printing available

Applications

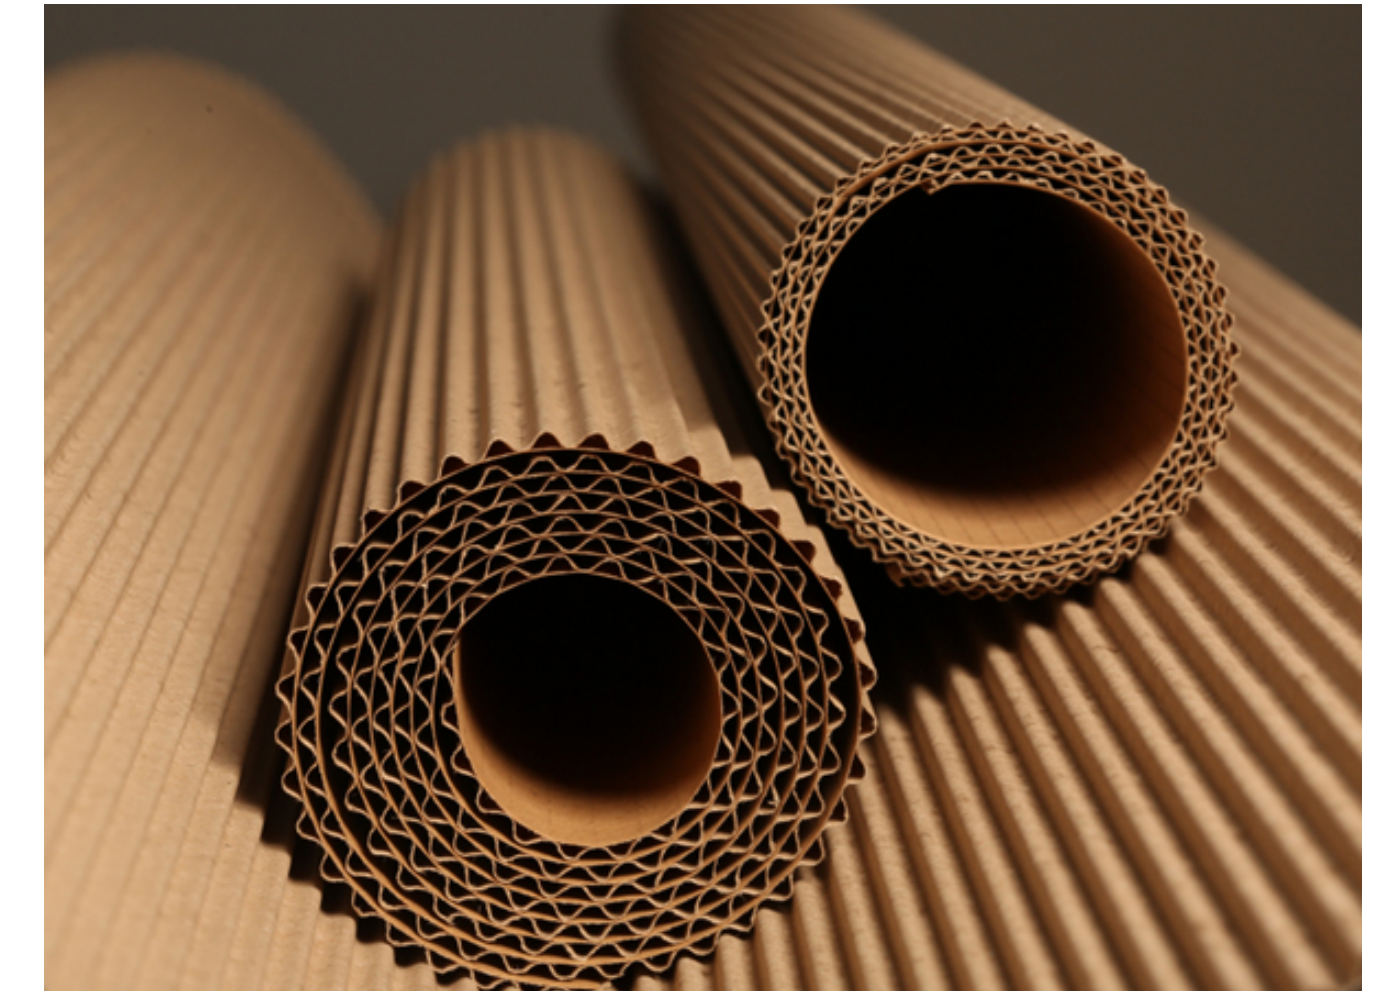

- Wrapping & Cushioning
- Corrugated Board Liners
- Carrier Bags & Envelopes
- Pallet Protection

CORRUGATED PAPER ROLLS

Corrugated paper rolls are flexible packaging materials made by combining a fluted (wavy) sheet and one or two flat linerboards. They provide excellent cushioning, surface protection, and shock absorption—ideal for wrapping and safeguarding fragile items during shipping and storage.

Lightweight yet durable, they easily conform to various shapes and surfaces. Widely used in e-commerce, manufacturing, and logistics, they offer a sustainable alternative to plastic packaging.

Specifications

- Flute Type : A, B, C, E
- Width : 300mm to 1800mm
- Length : As per requirement
- Core : 3"
- Color : Natural Brown / White
- GSM : 100 – 300 GSM (Combined)
- Ply : 2-ply/3-ply
- Packaging : Stretch / HDPE wrapped

Variants

- Single Face Corrugated Roll – One liner + one fluted medium, ideal for wrapping
- Double Face (2-ply) Rolls – Extra durability for added protection
- Kraft-Lined Corrugated Rolls – High strength with smooth outer surface for branding

Features

- Lightweight yet impact-resistant
- Recyclable and eco-friendly
- Highly flexible for wrapping irregular shapes
- Cost-effective & Customisation available

Applications

- Industrial packaging & surface protection
- Wrapping furniture, glass, ceramics & machinery
- Layering between pallets or products
- Void filling & cushioning

KRAFT PAPER SHEETS

Kraft paper sheets are flat, pre-cut sheets made from high-strength wood pulp using the kraft process. Known for their durability, tear resistance, and eco-friendliness, these sheets are widely used for wrapping, layering, interleaving, and craft applications across various industries.

They offer excellent printability, foldability, and compatibility with manual or automated packaging systems, making them ideal for both commercial and creative uses.

Specifications

- GSM : 40 to 200 GSM
- Sheet Sizes : A4, A3, 15x20, 20x30 inch (custom sizes available)
- Packaging : Bundled & shrink-wrapped
- Color : Natural Brown / White / Custom Shades
- Finish : Smooth / Ribbed / Glazed

Variants

- Virgin Kraft Paper – Strong, smooth surface, ideal for premium packaging.
- Recycled Kraft Paper – Cost-effective and eco-conscious option.
- Bleached Kraft Paper – White finish for a clean, high-end look.
- Natural Brown Kraft Paper – Popular for rustic and organic branding.

Features

- High tensile and burst strength
- Biodegradable & recyclable
- Food-safe options available
- Custom printing available

Applications

- Wrapping & Cushioning
- Corrugated Board Liners
- Carrier Bags & Envelopes
- Pallet Protection
- Gift and craft packaging
- Printing, stenciling, and artwork
- Food wrapping

CORRUGATED PAPER SHEETS

Corrugated paper rolls are flexible packaging materials made by combining a fluted (wavy) sheet and one or two flat linerboards. They provide excellent cushioning, surface protection, and shock absorption—ideal for wrapping and safeguarding fragile items during shipping and storage.

Lightweight yet durable, they easily conform to various shapes and surfaces. Widely used in e-commerce, manufacturing, and logistics, they offer a sustainable alternative to plastic packaging.

Specifications

- Ply : 2-ply/3-ply/5-ply/7-ply
- Sheet : Standard & custom sizes available
- Packaging : Bundled with Stretch/HDPE wrapped
- Flute Type : A, B, C, E/Custom
- Color : Brown / White / Custom print
- GSM : 100 – 600 GSM (Combined)
- Finish : Plain / Printed / Laminated

Variants

- 2-Ply Corrugated Sheets – Fluted medium with one liner, flexible yet protective
- 3-Ply Sheets – Two liners and one flute layer for added strength
- 5-Ply & 7-Ply Sheets – Heavy-duty options for bulk packaging and export use
- Laminated Corrugated Sheets – For enhanced surface finish and printability

Features

- Lightweight yet impact-resistant
- Recyclable and eco-friendly
- High compressive and burst strength
- Customizable in terms of ply, size, & printing

Applications

- Layering between stacked goods or pallets
- Carton box manufacturing
- Product cushioning and shock absorption
- Furniture, glass, and electronics packaging

PACKAGING BOXES

Paperboard Box: Paperboard boxes, or folding cartons, are lightweight and ideal for retail packaging. They offer excellent printability, making them great for branding and product display. Commonly used for cosmetics, food, and pharmaceuticals. Available in styles like tuck-end, window, and auto-lock bottom. Recyclable and suited for low- to medium-weight items.

Corrugated Box: Corrugated boxes are made from fluted sheets between linerboards, offering strength and protection. Ideal for shipping, storage, and packaging of heavy or fragile items. Available in single-wall to multi-ply for varying durability needs. Customizable in size, strength, and printing. Eco-friendly and widely used in logistics and e-commerce.

Rigid Box: Rigid boxes are made from thick, sturdy board and do not collapse like folding cartons. Used for luxury items like electronics, jewelry, and premium gifts. Offer a high-end look with options like magnetic closures or ribbon ties. Enhance product value and unboxing experience. Durable, elegant, and fully customizable.

PE FOAM ROLL

PE (Polyethylene) foam rolls are lightweight, flexible, and soft cushioning materials used to protect delicate surfaces during packaging and transit. They provide excellent shock absorption, insulation, and scratch resistance. Ideal for wrapping electronics, glassware, furniture, and automotive parts. Water-resistant and non-abrasive, making them safe and secure for polished or painted surfaces. Available in various thicknesses, roll widths, and perforated options. PE foam is reusable, recyclable, and easy to cut or shape as needed.

BUBBLE WRAP ROLL

Bubble wrap rolls are made of transparent plastic sheets with air-filled bubbles that provide superior cushioning and impact resistance. They are widely used for wrapping fragile items such as ceramics, electronics, and glass. The trapped air in the bubbles absorbs shocks and prevents breakage during transit. Available in small and large bubble sizes, depending on the level of protection required. Lightweight, moisture-resistant, and easy to use with or without adhesive backing. Perforated rolls offer convenience for quick packaging. A cost-effective and reusable packaging solution for all industries.

GREEN WRAP

GreenWrap is an excellent alternative to plastic bubble wrap, providing cushioning and protection for fragile items during transit, ensuring safety.

Available Sizes:

- 380 mm x 100 meters (Expandable up to 70%)
- 500 mm x 250 meters (Expandable up to 70%)

Thickness:

80 GSM

Colors:

- Brown
- White

GREEN FILL

GreenFill is used to fill empty spaces in shipping boxes, preventing items from shifting, breaking, or getting damaged during transit.

Available Sizes:

- 380 mm (Perforated Side) x 230 mm
- Standard Length: 350 meters

Thickness:

70 GSM

Colors:

- Brown

STRETCH FILM

Stretch Film, made from LDPE, protects and secures furniture, boxes, and pallets, ensuring safety and stability during storage and transportation.

Thickness:

9µm - 70µm

Widths:

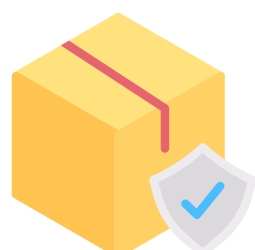

50mm to 2000 mm

Colors:

- Transparent
- Custom Colors

Grades:

- Manual
- Machine

GREEN WRAP DISPENSER

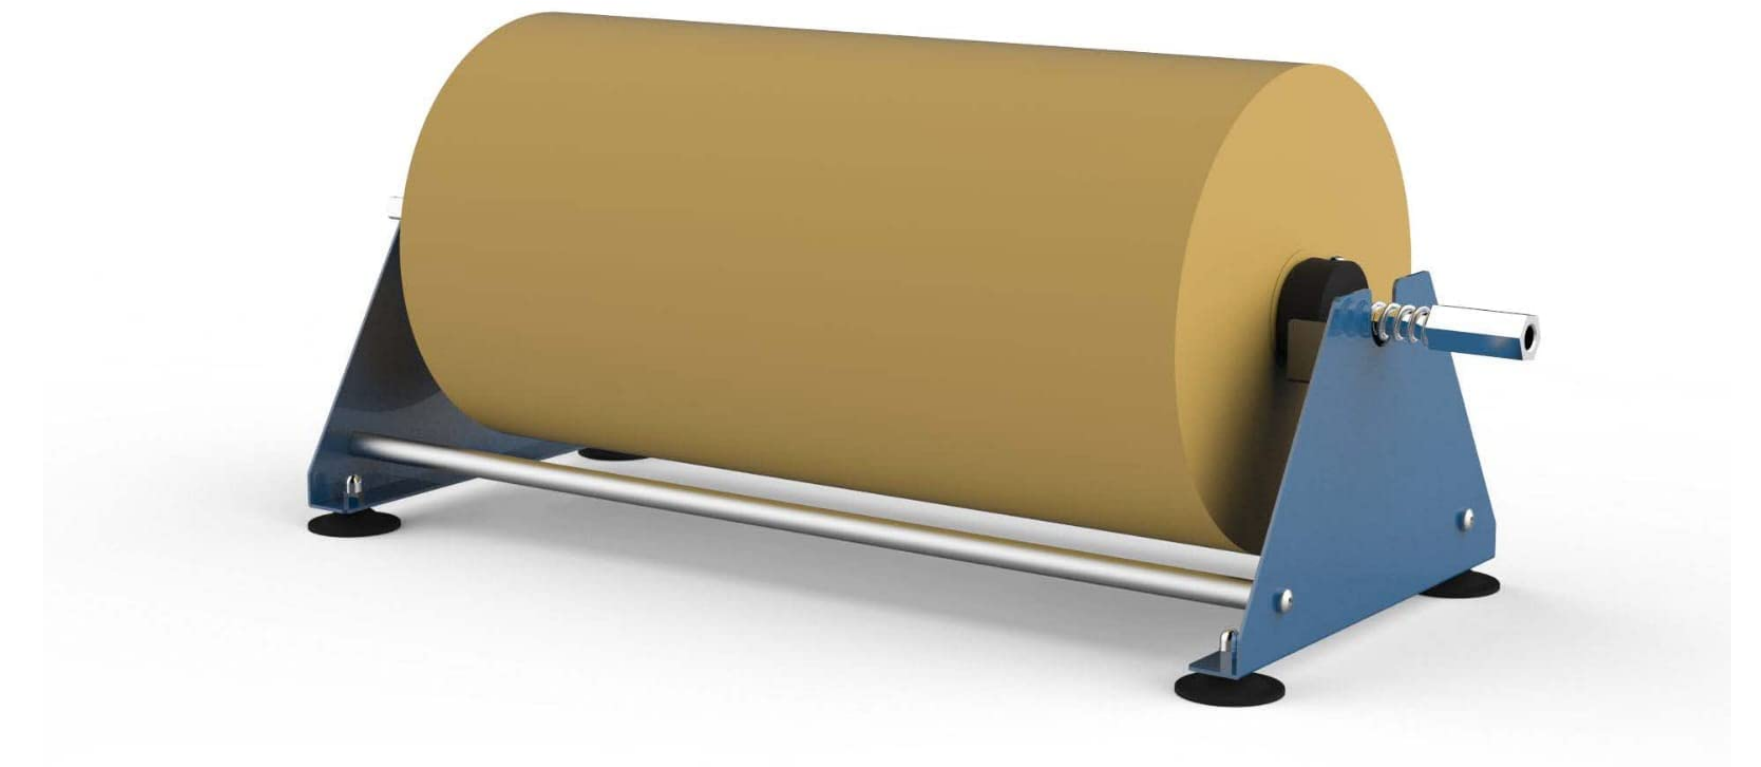

A mini tape desktop dispenser is a small yet functional accessory for offices, schools, and homes. It provides a stable base for one-handed tape dispensing, ensuring convenience and precision. Designed for standard tape rolls, it helps in effortless cutting and application. Its compact size makes it perfect for desks without taking up much space.

Features:

- Compatible with Upto 500mm Rolls
- Suitable for All Core Id's
- Adjustable Tension Mechanism for a Smoother Usage

Applications:

- For Dispensing and Stretching Of Honeycomb Paper

GREEN FILL DISPENSER

A mini tape desktop dispenser is a small yet functional accessory for offices, schools, and homes. It provides a stable base for one-handed tape dispensing, ensuring convenience and precision. Designed for standard tape rolls, it helps in effortless cutting and application. Its compact size makes it perfect for desks without taking up much space.

Features:

- Adjustable Knob at the Bottom to Fix it on any Tabletop
- Easy to Assemble and Carry
- A Simple to Pull & Use Dispenser

Applications:

- For Easy & Effortless Dispensing Of The GreenFill Paper

BOX STRAPPING ROLL

Box strapping rolls are durable, stretch-resistant plastic straps used to secure and bundle cartons, pallets, and heavy packages. Made from high-strength polypropylene (PP) or polyester (PET), these rolls provide tight, reliable, and tamper-evident sealing during storage, handling, and transportation, even under demanding conditions.

They are weather-resistant, cost-effective, reusable, and compatible with manual or automatic strapping tools.

Specifications

- Material : PP / PET
- Width : 6mm to 19mm
- Length : 1000-3000 meters
- Thickness : 0.5mm - 1.2mm
- Color : White / Black / Custom
- Finish : Embossed / Plain
- Core : 200 mm / 406 mm
- Printing : Single or multi-color print

Variants

- PP (Polypropylene) Strapping Roll – Lightweight, economical, ideal for medium loads
- PET (Polyester) Strapping Roll – Stronger, more rigid, ideal for heavy-duty applications
- Manual & Machine Grade Rolls – Suitable for hand tools, semi-auto, and fully automatic machines
- Colored & Printed Straps – For branding or product identification

Features

- High tensile strength and elongation
- Moisture-resistant & Rust-free alternative to metal straps
- Lightweight and cost-efficient

Applications

- Securing cartons, pallets, and crates
- Bundling pipes, rods, or industrial components
- Packaging in logistics, warehouses & export units
- Agriculture and FMCG product strapping
