

APPLE GRAY BASALT

Apple Gray Basalt is a versatile and durable stone, ideal for a wide range of architectural and design applications. With its consistent grey tone and fine-grained texture, it brings a modern, clean aesthetic to both interior and exterior spaces.

Transform your spaces

Apple Grey Basalt is a dense, fine-grained volcanic stone known for its uniform grey tone and understated elegance. Quarried in Pakistan,

it offers a clean, modern aesthetic while delivering excellent durability and performance – making it ideal for both indoor and outdoor use.

This versatile material is widely used in paving, cladding, coping, curbs, tiles, and architectural detailing. Its consistent texture and natural strength make it a reliable choice for high-traffic public spaces, contemporary landscaping, and minimalist design schemes.

At Popular Marble, we process Apple Grey Basalt in a range of sizes and formats, with strict quality control from quarry to final product.

Whether for large-scale commercial developments or bespoke residential projects, it delivers long-lasting beauty and structural reliability.

Surface Finishes

Our Apple Grey Basalt is offered in a wide range of surface finishes, each designed to enhance its natural character, durability, and suitability for different design applications.

Polished

Polished Apple Grey Basalt offers a smooth, reflective surface that deepens the stone's grey tones and highlights its fine-grained texture. This finish gives the stone a sophisticated, elegant appearance, ideal for interior flooring, feature walls, countertops, and decorative elements where a refined, high-end look is desired.

Honed

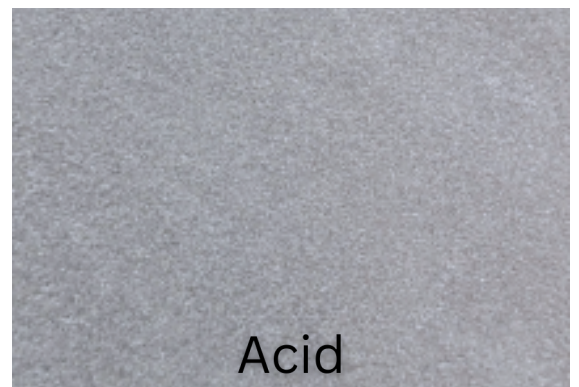

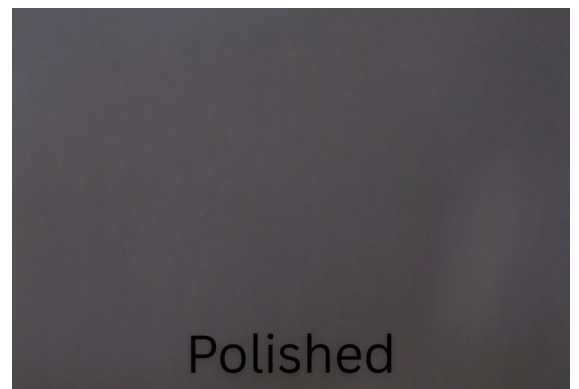

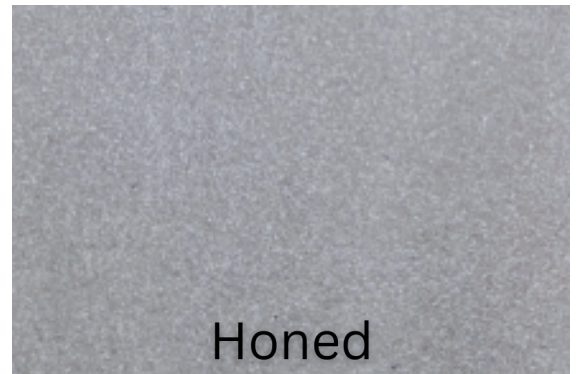

The honed finish provides a matte, silky surface with soft, muted tones. It removes surface gloss while maintaining a smooth feel, making it ideal for indoor applications such as flooring, wall cladding, and countertops where a contemporary, understated look is preferred.

Antique

The antique finish gives the stone a soft, weathered appearance with a slightly textured surface and worn edges, mimicking the look of aged stone. This finish is ideal for traditional, Mediterranean, or vintage-style projects, adding warmth and character to patios, walkways, and courtyards.

Acid-Washed

Acid-washed basalt has a lightly etched surface with enhanced color depth and a subtly rough texture. This finish increases slip resistance while maintaining an organic appearance, making it suitable for outdoor areas, terraces, and driveways where both function and style are important.

Apple Gray

Flamed

The flamed finish creates a rough, slightly grainy texture through intense heat treatment. This enhances the stone's slip resistance while giving it a rugged, natural appearance. Flamed Apple Grey Basalt is commonly used for exterior flooring, stairs, and commercial landscapes where traction and durability are essential.

Bush Hammered

Bush hammered Apple Grey Basalt features a highly textured, rugged surface created by mechanical hammering. It provides excellent slip resistance and a bold, tactile look, making it perfect for high-traffic areas, outdoor paving, pool surrounds, and urban landscapes where both safety and durability are priorities.

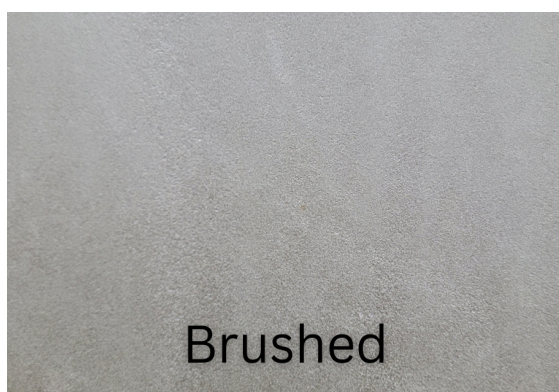

Bamboo Texture

The bamboo finish introduces a distinctive, linear groove texture that mimics the look of bamboo slats. This unique, decorative finish is ideal for feature walls, facades, and design-driven projects where a bold, architectural texture is desired.

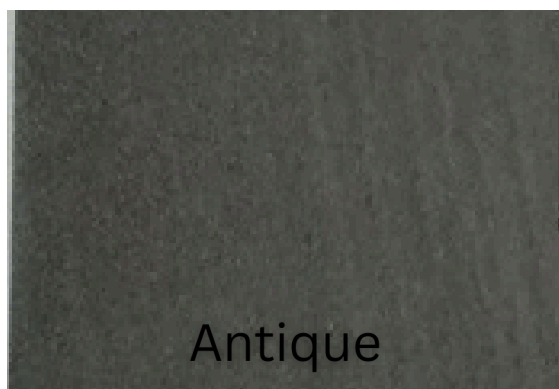

Brushed

Brushed Apple Grey Basalt has a slightly textured, soft surface created by brushing the stone with abrasive tools. This finish brings out subtle color variations and creates a naturally aged appearance while remaining smooth to the touch, ideal for indoor flooring, wall panels, and outdoor areas seeking a slightly weathered yet elegant look.

Antique

The antique finish gives the stone a soft, weathered appearance with a slightly textured surface and worn edges, mimicking the look of aged stone. This finish is ideal for traditional, Mediterranean, or vintage-style projects, adding warmth and character to patios, walkways, and courtyards.

Wall Cladding, Flooring, Landscaping

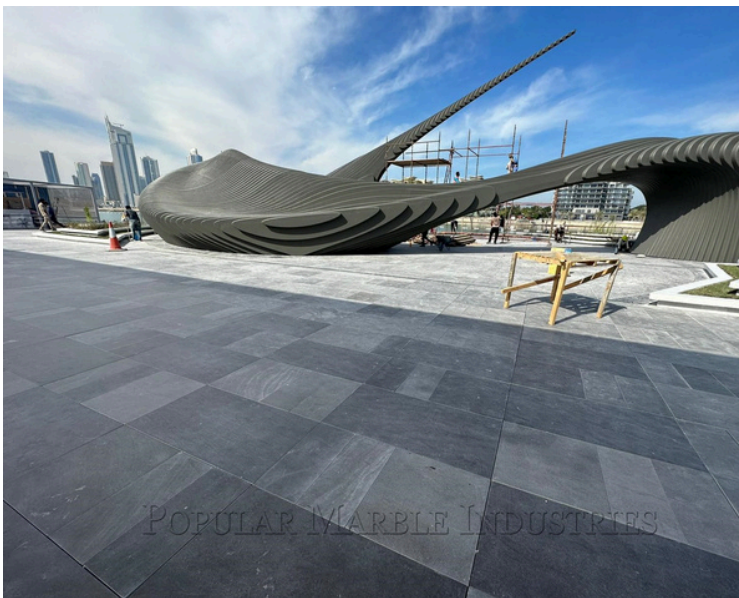

For wall cladding, Apple Grey Basalt offers a sleek and sophisticated look, perfect for facades, feature walls, and architectural accents. Its subtle elegance and durability make it suitable for both residential and commercial projects.

In flooring, this stone provides excellent wear resistance and a refined appearance, ideal for high-traffic areas such as lobbies, corridors, and open spaces. Its natural slip-resistant qualities make it suitable for both indoor and outdoor flooring solutions.

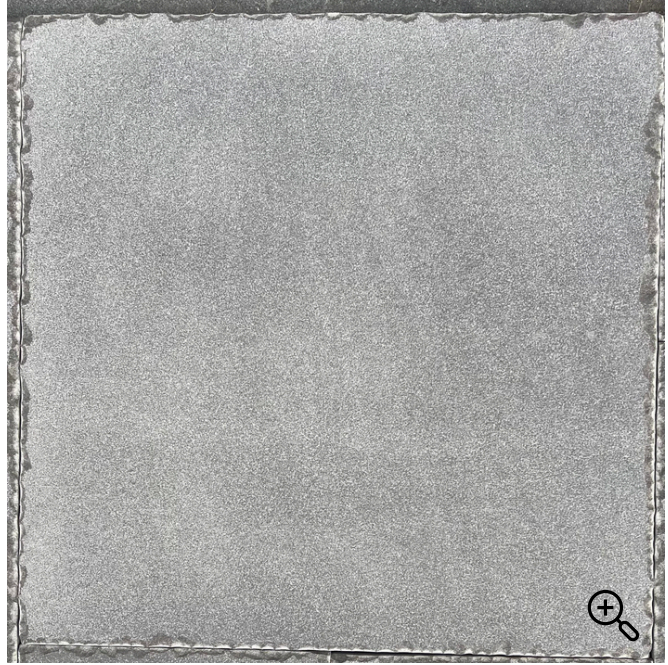

For landscaping, Apple Grey Basalt blends functionality with timeless beauty. It is commonly used for outdoor paving, garden paths, curbs, steps, and retaining walls – offering exceptional weather resistance and low maintenance, while enhancing the overall landscape design.

French Pattern, Pavers

Modern Tumble
(Fine Picked)

This finish combines a soft brushed surface with gently tumbled edges, giving the stone a weathered yet refined appearance. It's perfect for outdoor patios, courtyards, and pool decks where a relaxed, aged charm is desired – with modern ease of use.
