

SHADOW WHITE LIMESTONE

PMI White Limestone Project
SEOUL S. KOREA

known for its light color and versatile applications in construction and landscaping. It ranges in color from pure white to light cream and can be used for flooring, cladding, countertops, and more

Shadow White
Limestone

Transform your spaces

Shadow White Limestone is a sophisticated variation of classic limestone, admired for its cooler undertones, soft grain movement, and understated depth. Its refined palette and consistent texture make it a popular choice for designers seeking a clean yet distinctive look.

Quarried from carefully selected sites in Pakistan, our Shadow White Limestone features a gentle mix of off-white and pale grey tones – ideal for modern minimalist spaces, upscale interiors, and sleek architectural cladding.

From raw quarry blocks to calibrated slabs and tiles processed on state-of-the-art Italian lines, Popular Marble delivers Shadow White Limestone in a range of sizes, finishes, and thicknesses – ensuring design flexibility for large-scale commercial or bespoke residential projects.

With full control over quarrying, cutting, and finishing, we maintain strict quality standards across every order. Our reputation as a dependable supplier of Shadow White Limestone is built on consistent color selection, timely deliveries, and client-focused service.

Perfect for walls, floors, vanities, exteriors, and decorative applications – every slab is precision-processed to meet the demands of international clients seeking both performance and visual harmony

Surface Finishes

Our Shadow White Limestone slabs and tiles are available in a curated range of surface finishes, designed to highlight the stone's subtle grey undertones and fine-grain texture. Each finish brings out a different character in the stone, offering versatility across both contemporary and traditional design environments.

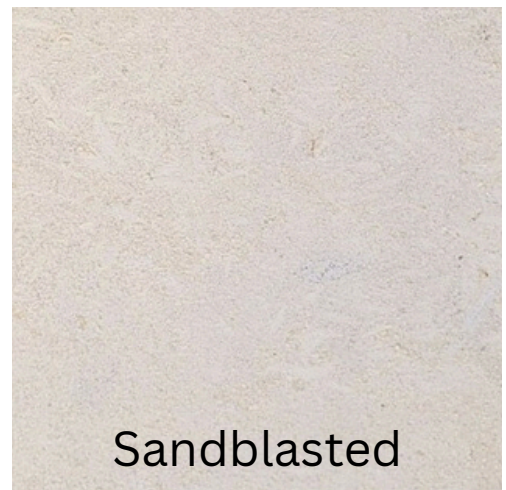

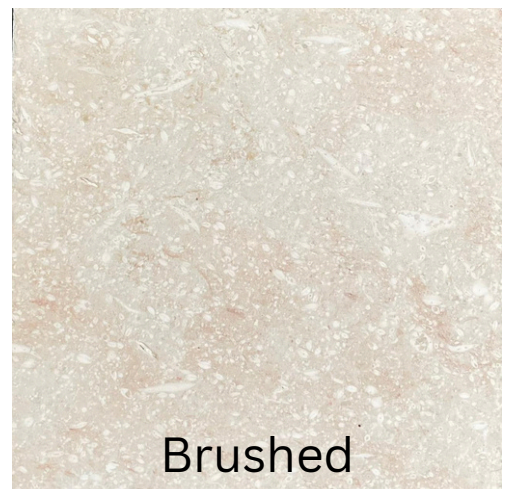

The Honed finish creates a smooth, matte surface that enhances the soft contrast and natural grain of Shadow White – ideal for refined interiors, minimalist aesthetics, and sleek wall or floor applications.

The Bush Hammered finish introduces a coarse, slip-resistant texture that provides excellent grip and resilience. Perfect for outdoor paving, pool decks, and commercial walkways, it balances function with understated beauty.

The Sandblasted finish gives the surface a uniform, slightly grainy texture that softens light reflection and brings a cool, contemporary feel. It's especially suited for façades, courtyards, and shaded outdoor areas.

The Brushed finish lightly distresses the stone, revealing its natural texture with a soft, aged feel. This treatment gives Shadow White Limestone a warm, organic look – perfect for relaxed interiors or transitional spaces blending old and new.

Each finish is carefully applied to maintain the integrity and elegance of Shadow White Limestone, making it adaptable to a wide range of architectural visions.

French Pattern

Modern Tumble

With its velvety surface and muted finish, the Brushed Shadow White Limestone French Pattern is ideal for interior floors, lounges, and light-use terraces. The smooth brushing softens the stone's natural texture, adding a contemporary feel to a classic layout. It offers a clean, understated elegance that suits minimalist and modern design palettes.

Combining the lightly textured surface of Fine Picked, this finish is suited for both indoor and shaded outdoor spaces. The Shadow White Limestone French Pattern in this duo-finish brings out the gentle tones and fossil patterns of the stone, while providing just enough traction for comfort and safety in transitional areas.

Fine Picked

Bush Hammered + Brushed

Perfect for outdoor applications like pool surrounds, patios, and walkways, this French Pattern in Bush Hammered + Brushed finish delivers a non-slip surface with soft texture. The bush hammered treatment adds grip and durability, while the brushed layer tones it down with a smooth, aged feel – ideal for areas that demand both function and elegance.

CNC CUT FEATURE WALL

At Popular Marble, we specialize in CNC-cut architectural elements crafted from Shadow White Limestone, offering bespoke solutions for high-impact spaces. Whether it's a dramatic double-height waterfall wall or an intricately carved feature panel, our advanced 5-axis CNC machinery ensures precision, depth, and artistic expression in every design.

With its fine grain, cool undertones, and structural consistency – is the perfect canvas for detailed carvings, linear fluting, geometric textures, or flowing organic patterns. It lends elegance and sophistication to modern interiors, hotel lobbies, luxury residences, and commercial spaces that demand a refined visual statement.

Split Face/ Chiseled

This finish brings out the raw, natural beauty of stone with a rugged, textured surface. Ideal for feature walls, façades, and cladding, it adds bold character and depth – perfect for both modern and rustic designs.

Tiles, Borders, Corniche, Arches

At Popular Marble, we offer a complete range of Shadow White Limestone architectural elements, expertly crafted to meet the needs of residential, commercial, and heritage projects.

Available in multiple sizes, thicknesses, and finishes, our tiles are suitable for both floors and walls – offering a clean, refined look that suits minimalist and classical interiors alike.

Precision-crafted cornices in Shadow White Limestone provide a refined transition between walls and ceilings or roofing elements. Available in traditional or modern profiles, they bring depth and character to façades, interiors, and decorative trim work.

We produce custom segmental, full, or pointed arches tailored to the architectural theme of your project. Whether it's a classical courtyard, arched hallway, or grand entrance, our Shadow White Limestone arches offer both structural integrity and timeless elegance. With full in-house processing capabilities and advanced CNC machinery, we ensure accuracy, finish consistency, and seamless integration of all stone elements – delivering end-to-end solutions for designers, architects, and builders worldwide.
