# WHITE LIMESTONE

known for its light color and versatile applications in construction and landscaping. It ranges in color from pure white to light cream and can be used for flooring, cladding, countertops, and more

White Limestone

# Transform your spaces

White Limestone is one of the most sought-after natural stones in modern architecture and design – prized for its clean, neutral tone, consistent structure, and versatile beauty.

Quarried from select deposits in Pakistan, our White Limestone features a fine-grain texture and soft off-white hue that makes it ideal for both contemporary and classical projects.

From raw blocks directly sourced from our partnered quarry, to precision-cut slabs processed on advanced Italian machinery, and ready-to-ship tiles in custom sizes and finishes – Popular Marble offers full-spectrum solutions to meet the demands of international projects.

Our control over the supply chain ensures consistent quality, reliable volume, and on-time delivery – making Popular Marble a trusted name for White Limestone exports worldwide.

ideal for walls, floors, vanities, and cladding. At Popular Marble, we process each slab with precision using modern machinery, ensuring consistent thickness, smooth finishes, and global export quality.

# Surface Finishes

Our White Limestone slabs/tiles are offered in a variety of surface finishes, carefully crafted to suit a wide range of architectural and design applications.

The Honed finish delivers a smooth, matte surface that enhances the stone's natural color and grain – ideal for achieving a clean, sophisticated look in both residential and commercial interiors.

The Bush Hammered finish features a rugged, textured surface that is highly slip-resistant, making it perfect for outdoor paving, pool decks, and high-traffic areas where safety and durability are essential.

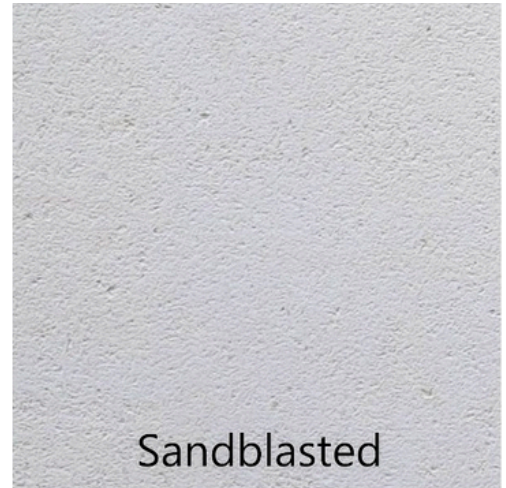

For a softer yet modern appearance, the Sandblasted finish provides a uniform texture that subtly diffuses light, giving the surface a muted, contemporary character.

Lastly, the Brushed finish offers a gently worn, aged feel by lightly softening the surface, revealing the stone's organic texture – perfect for warm, inviting spaces that seek a natural, lived-in charm.

Each finish is designed to enhance both the beauty and functionality of White Limestone, allowing it to adapt seamlessly across a variety of design styles and environments.

## French Pattern

Modern Tumble

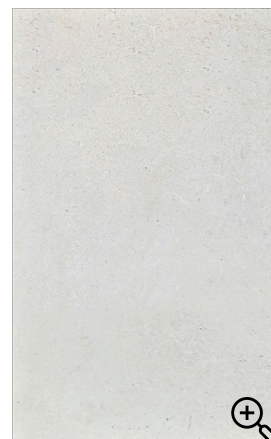

With softly rounded edges and a gently weathered surface, the Modern Tumble finish brings an antique charm to White Limestone French Pattern sets. This finish evokes a rustic, lived-in appeal that suits Mediterranean landscapes, garden paths, and vintage-inspired interiors – offering warmth, texture, and timeless atmosphere in every stone.

The Fine Picked finish adds a lightly etched texture to the surface, giving the stone a subtle grip while preserving its natural look. In the French Pattern layout, this finish emphasizes the clean lines and tonal variation of White Limestone – ideal for outdoor flooring, courtyards, and open terraces where both safety and style matter.

Fine Picked

Bush Hammered + Brushed

Perfect for outdoor applications like pool surrounds, patios, and walkways, this French Pattern in Bush Hammered + Brushed finish delivers a non-slip surface with soft texture. The bush hammered treatment adds grip and durability, while the brushed layer tones it down with a smooth, aged feel – ideal for areas that demand both function and elegance.

# Fine Picked

Fine Picked is a light-textured finish achieved by gently chiseling the surface with fine-tipped tools. It gives the stone a subtle, grainy feel without being overly rough – making it ideal for anti-slip applications like walkways, terraces, and wet areas. This finish also enhances the stone's natural color variation, offering a clean, uniform look with added grip and surface interest.

# Balusters

We also offer custom-made balusters in Shadow White Limestone, crafted with precision for both classic and contemporary applications. Available in various profiles and finishes, they add timeless elegance to staircases, balconies, and terraces.

# Tiles, Borders, Corniche, Arches

Crafted with precision to suit both modern and traditional designs. Whether it's flooring, edge detailing, or architectural accents, each piece is manufactured to match your project's specifications.

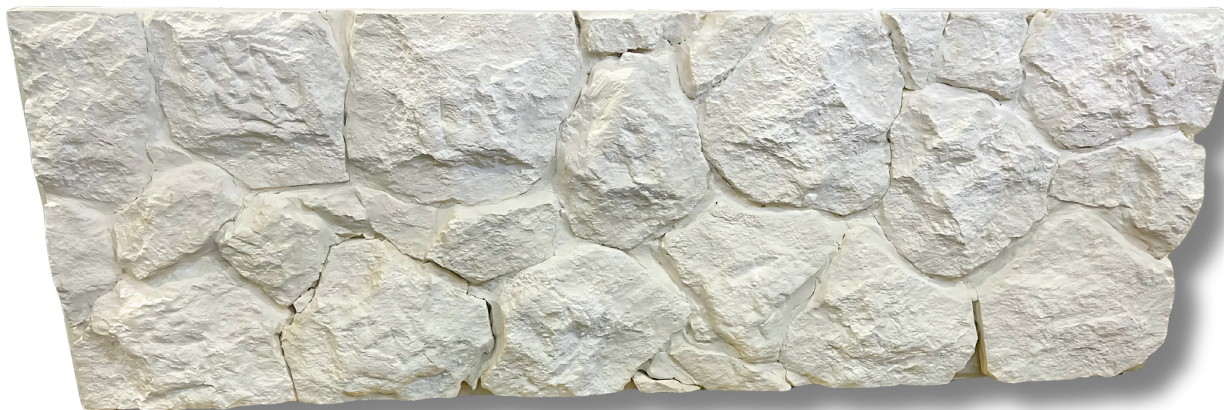

# Split Face/ Chiseled

This finish brings out the raw, natural beauty of stone with a rugged, textured surface. Ideal for feature walls, façades, and cladding, it adds bold character and depth – perfect for both modern and rustic designs.

# Mushroom Finish

A white limestone with a "mushroom" finish typically refers to a specific surface treatment that creates a textured, slightly uneven appearance, resembling the cap of a mushroom. This finish is often used for both interior and exterior cladding, particularly on walls, and is characterized by its rough, natural look.
