

STARWOOD

HPL TABLES 2025

WWW.STARWOOD.UA

StarWood

furniture

StarWood is a Ukrainian brand established in 2017 as a family business that has transformed into a furniture production with a professional team and a full production cycle. The production is engaged in the manufacture of tables made of HPL plastic, compact board, wood, metal and epoxy resin. TM "StarWood" has been an officially registered trademark in Ukraine since 2020.

Our company is constantly moving forward, embodying the latest trends in design and ergonomics. By regularly attending leading exhibitions and collaborating with top experts, we integrate innovative solutions that meet high standards of quality and modernity.

We participated in the following exhibitions:
Furniture & Design Isle 2022 Latvia
Meble Polska 2023 Poland
MOW 2023 Germany
InterBuildExpo 2024

The company is equipped with state-of-the-art European equipment and the latest technologies.

The company is currently developing rapidly, implementing advanced solutions to improve the quality and efficiency of production.

Tables are packaged to ensure their integrity during transportation.

Packaging can be made according to the relevant standards or customer requirements.

For export, packaging is made according to the shape of the product.

We work on individual orders for kitchens, living rooms, offices and HoReCa using materials:

Table tops:

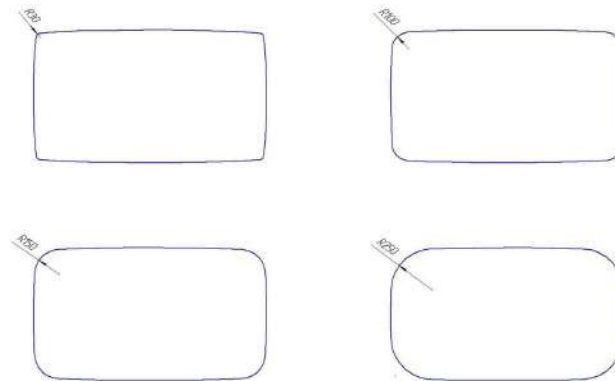

- HPL plastic (Italy, Austria) (high-pressure laminate) on the basis of MDF 22 mm
- Compact board (Italy, Austria) 12-13 mm
- Epoxy resin (Germany)
- Wood (Ukraine)

Table base

- Metal (Ukraine) is powder coated and baked at 200°, which in turn is resistant to corrosion and damage.
 - Wood (Ukraine) (beech, ash, oak, walnut) and covered with polyurethane paint and varnish
- For the underlay we select RAL and NCS paint.

We are proud to have a huge range of decors from leading manufacturers such as Arpa, Fenix, EGGER and Fundermax.

We can change the shape and radius of the corners of the table top for a rectangular table.

The materials have been tested for durability and resistance to chemical and mechanical tests.
