

# Company introduction

Shandong Haihua New Materials Co., Ltd., was established in 2018. mainly engages in the production of chemical products such as baking soda, soda ash, calcium chloride, magnesium chloride, sodium metabisulfite, mirabilite, snow-melting agent, soft water salt, refined industrial salt, feed salt, sodium sulfite, and sodium bisulfite.

Factory is located in the Weifang Binhai Economic Development Zone, a well-known production and export base for chemical products.

Factory Got ISO9000.ISO9001 certificate, can took OEM and ODM orders according to customer demand!

# Advantages

## One stop shopping

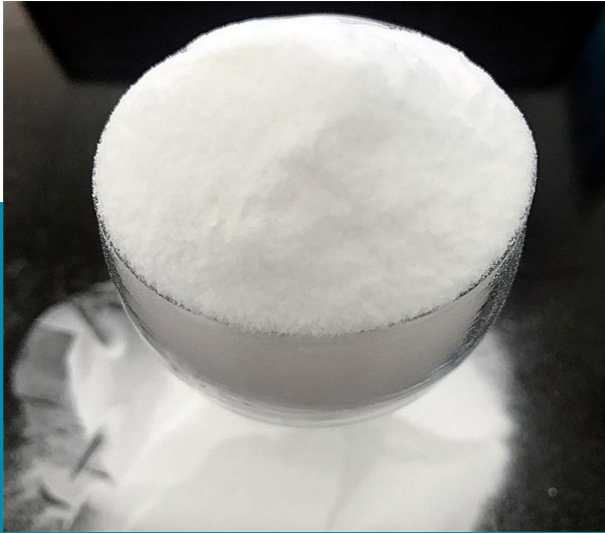

We provide one stop shopping for customer, plenty and various products in stock, fast and standard production, high quality, fast quotation and good service!

---

## Innovative Product Lines

The company offers a diverse range of products, including high-performance composites and eco-friendly materials, designed to meet market demands.

# Product Characteristics and Applications

Sodium carbonate

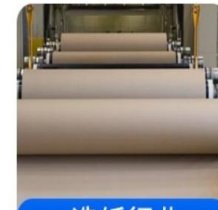

Sodium carbonate is the inorganic compound with the formula  $\text{Na}_2\text{CO}_3$  and its various hydrates. All forms are white, odorless, water-soluble salts that yield alkaline solutions in water. we export to south east asia, europe, latin america

冶金行业

化工行业

造纸行业

食品行业

玻璃加工

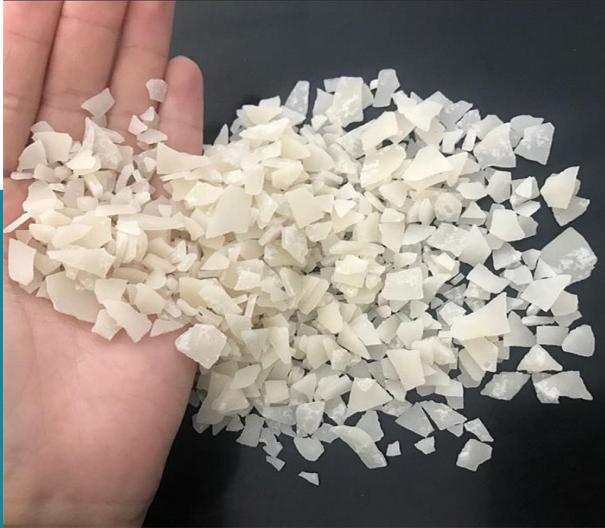

纺织印染

Applications

Metallurgy, chemical , paper, food industry, glasses, textiles, printing and dyeing

# Product Characteristics and Applications

Magnesium chloride

Magnesium Chloride, often simply known as  $\text{MgCl}_2$ , is a highly versatile and important inorganic compound.

Primarily sourced from seawater, it plays a fundamental role in a variety of applications, from healthcare to agriculture and industry.

冶金行业

化工行业

建材行业

交通行业

机械工业

纺织印染

Applications

Metallurgy, chemical , constraction, transportation, machinery, textiles, printing and dyeing

# Product Characteristics and Applications

Calcium chloride

Calcium chloride is an inorganic compound, a salt with the chemical formula  $\text{CaCl}_2$ . It is a white crystalline solid at room temperature, and it is highly soluble in water.

Applications

Food industry, construction, medical, environmental control, oil industry

# Product Characteristics and Applications

industry salt

Industrial salt is a highly purified form of sodium chloride ( $\text{NaCl}$ ) that is extracted from natural sources, such as salt mines, seawater, or brine wells.

## Applications

chemicals, food, water treatment, and de-icing

# Product Characteristics and Applications

Sodium metabisulfite

Sodium metabisulfite or sodium pyrosulfite (IUPAC spelling; Br. E. sodium metabisulphite or sodium pyrosulphite) is an inorganic compound of chemical formula  $\text{Na}_2\text{S}_2\text{O}_5$

照相行业

化工行业

香料行业

食品行业

电镀行业

纺织印染

Applications

Applied to photography, chemical, perfume, food industry, fabric and printing industry. It is used as a disinfectant, antioxidant, and preservative agent

# Product Characteristics and Applications

Snow melting agent

Snow melt agent is a chemical that can reduce the melting temperature of snow and ice. Mainly used for Snow removal in winter on roads, airports, urban streets and road freezing prevention.

Applications

Road, airport, bridges, street, sports  
squeer.

# Product Characteristics and Applications

sodium bicarbonate

Sodium bicarbonate, also known as baking soda, is a white solid that is crystalline but often appears as a fine powder. It is composed of a sodium cation ( $\text{Na}^+$ ) and a bicarbonate anion ( $\text{HCO}_3^-$ ) and has a slightly salty, alkaline taste.

污水处理

印染行业

建筑行业

石化行业

冶金行业

交通行业

## Applications

Wastewater treatment, printing, construction, metal, transportation, food industry. We can make superfine soda 300~3600 mesh according to customer demand.
