# SPC Flooring

SPC flooring is a type of flooring with a moisture-proof solid core constructed of limestone, PVC and stabilizers. Its surface layer provides protection from dirt and moisture, has antibacterial protection, is resistant to UV rays and stains, and has antistatic and sound-reducing qualities, among other advantages.

 Safe and environmental-friendly	 Waterproof and moisture-proof	 Anti-slip
 Wear-resistant	 Easy Cleaning and Maintenance	 Seamless Click-locking technique
 Fire Resistance and High Temperature Resistance	 Anti-mould, Insect-proof, Anti-bacteria	 Simple Installation
 High Stability	 Warm and Soft Foot Feeling	 Easy Repairing

# WPC ABA Flooring

FURMAN™

WPC ABA flooring is an advanced multi-layer composite flooring that merges the benefits of wood plastic composite(WPC) with a unique three-layer ABA structure, consisting of LVT-WPC-LVT layers. Compared to traditional WPC flooring, it offers greater stability and enhanced comfort. The dense core structure provides excellent sound insulation, which is ideal for quieter environments. Additionally, its user-friendly click-lock system simplifies installation, reducing both time and cost, with its ability to mimic the look of natural wood or stone, WPC ABA floor offers a wide range of design options to suit various interior styles.

Usage	Bedroom, Living room, Study room, Dressing room, Office, Hotel, Hall, Celling
Features	Ease of Installation, Design Options, Moisture Resistant, Stain and Fade Resistant,Easy to Maintain, Good for Kids, Eco Friendly, Pet Friendly, Alternative to More Expensive Flooring

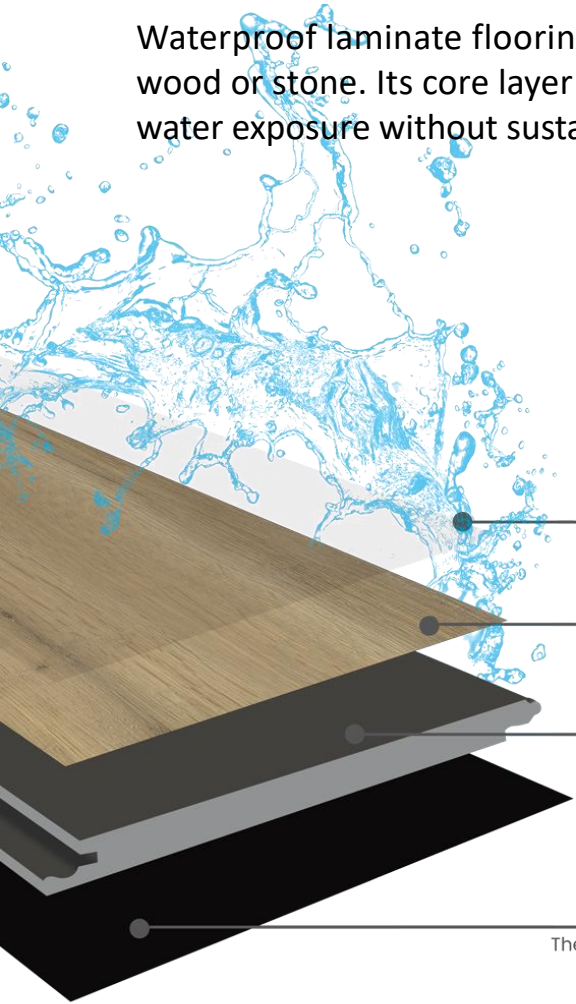

Laminate flooring is a practical, stylish and affordable flooring option compared to other flooring options, combining the look of natural materials with the durability and easy maintenance that modern lifestyles demand.

# Waterproof Laminate Flooring

Waterproof laminate flooring is a highly durable and moisture-resistant option that offers the aesthetic appeal of wood or stone. Its core layer is designed to be dense, waterproof, and resistant to swelling, allowing it to withstand water exposure without sustaining damage.

## **AC4 Wear Layer**

A thin lacquer coating of aluminum oxide provides a scratch-resistant and water-resistant surface

## **HD Decor Pattern Layer**

Advanced printing and embossing technology enables a realistic timber feel and finish

## **Ultra-High Density Fiber Core**

5% Waterproof Laminate Flooring Specification  
Compact Density Fiberboard (CDF)

10% Waterproof Laminate Flooring Specification

# Flooring Install

SPC/Laminate

**FURMAN™**

A click-and-go installation system is available, maximizing convenience and enabling users to complete the installation quickly and easily. Since no adhesives or specialized tools are required, the process is streamlined and user-friendly, reducing the time and effort typically required with traditional installation methods. This simplifies the installation process and minimizes environmental impact by eliminating the need for chemical adhesives or other materials. Additionally, the ease of the system makes it ideal for DIY enthusiasts, allowing even those with minimal experience to achieve professional-quality results in their home improvement projects.

# SPC Wall Panel

Furman SPC (Stone Plastic Composite) wall panel is a type of rigid wall panel made from a composite material consisting of natural limestone powder, polyvinyl chloride (PVC), and stabilizers. These panels are engineered to provide high durability, water resistance, and a long-lasting, aesthetically pleasing surface for interior walls. Easy maintenance and installation. Due to their robust properties, they are commonly used in residential, commercial, and industrial spaces, particularly in areas prone to moisture, such as bathrooms, kitchens, basements, etc.

# SPC Wall Panel

# Acoustic Wall Panel

FURMAN™

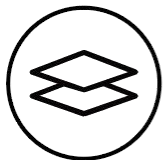

Furman Acoustic wall panels enhance sound control by absorbing sound waves, reducing echoes, and improving overall sound quality. They are ideal for spaces where sound clarity is crucial, like recording studios, theaters, offices, and home theaters. Made from materials such as medium-density fiberboard, high-density polyester, and other sound-absorbing components, Acoustic wall panels are available in various designs and sizes to seamlessly blend with interior decor.
